The Army Universal Task List

Contents

PREFACE
INTRODUCTION

Chapter 1

ART 1.0: THE MOVEMENT AND MANEUVER WARFIGHTING FUNCTION

Section I – ART 1.1: Perform Tactical Actions Associated with Force
Projection and Deployment

ART 1.1.1 Conduct Mobilization of Tactical Units
ART 1.1.2 Conduct Tactical Deployment and Redeployment Activities
ART 1.1.3 Conduct Demobilization of Tactical Units
ART 1.1.4 Conduct Rear Detachment Activities

Section II – ART 1.2: Conduct Tactical Maneuver

ART 1.2.1 Conduct One of the Six Forms of Maneuver
ART 1.2.2 Employ Combat Formations
ART 1.2.3 Employ Combat Patrols
ART 1.2.4 Conduct Counterambush Actions
ART 1.2.5 Exploit Terrain to Expedite Tactical Movements
ART 1.2.6 Cross a Danger Area
ART 1.2.7 Link Up With Other Tactical Forces
ART 1.2.8 Conduct Passage of Lines
ART 1.2.9 Conduct a Relief in Place
ART 1.2.10 Navigate From One Point to Another
ART 1.2.11 Conduct a Survivability Move
ART 1.2.12 Conduct Sniper Active Countermeasures
ART 1.2.13 Conduct Sniper Passive Countermeasures

Section III – ART 1.3: Conduct Tactical Troop Movements

ART 1.3.1 Prepare Forces for Movement
ART 1.3.2 Conduct Tactical Road March
ART 1.3.3 Conduct Tactical Convoy

Distribution Restriction: Approved for public release; distribution is unlimited.

*This publication supersedes FM 7-15, 27 February 2009.
ART 1.3.4 Conduct an Approach March ........................................................... 1-24

**Section IV – ART 1.4: Conduct Direct Fires** ............................................. 1-25
ART 1.4.1 Conduct Lethal Direct Fire Against a Surface Target ................. 1-26
ART 1.4.2 Conduct Nonlethal Direct Fire Against a Surface Target ............ 1-26

**Section V – ART 1.5: Occupy an Area** ...................................................... 1-27
ART 1.5.1 Occupy an Assembly Area ............................................................ 1-27
ART 1.5.2 Occupy an Attack and Assault Position ...................................... 1-28
ART 1.5.3 Occupy and Establish a Battle or Defensive Position ................. 1-28
ART 1.5.4 Conduct Drop Zone Operations .................................................. 1-29
ART 1.5.5 Conduct Landing Zone Operations .............................................. 1-29

**Section VI – ART 1.6: Conduct Mobility Operations** ................................ 1-30
ART 1.6.1 Overcome Barriers, Obstacles, and Mines .................................... 1-31
ART 1.6.2 Enhance Movement and Maneuver ............................................ 1-36
ART 1.6.3 Negotiate a Tactical Area of Operations ...................................... 1-41
ART 1.6.4 Provide Diver Support ............................................................... 1-42
ART 1.6.5 Conduct Administrative Movements ......................................... 1-43

**Section VII – ART 1.7: Conduct Countermobility Operations** ............... 1-43
ART 1.7.1 Site Obstacles ............................................................................. 1-45
ART 1.7.2 Construct, Emplace, or Detonate Obstacles ............................... 1-45
ART 1.7.3 Mark, Report, and Record Obstacles .......................................... 1-46
ART 1.7.4 Maintain Obstacle Integration .................................................. 1-46

**Section VIII – ART 1.8: Conduct Reconnaissance** .................................. 1-47

**Section IX – ART 1.9: Employ Obscurants** .......................................... 1-52

**Section X – ART 1.10: Conduct Maneuver Support Operations** ............. 1-52

**Chapter 2**

**ART 2.0: THE INTELLIGENCE WARFIGHTING FUNCTION** ........................ 2-1

**Section I – ART 2.1: Provide Intelligence Support to Force Generation** .... 2-2
ART 2.1.1 Provide Intelligence Readiness ..................................................... 2-2
ART 2.1.2 Establish Intelligence Architecture ............................................ 2-4
ART 2.1.3 Provide Intelligence Overwatch .............................................. 2-8
ART 2.1.4 Generate Intelligence Knowledge ............................................. 2-8
ART 2.1.5 Tailor the Intelligence Force ..................................................... 2-14

**Section II – ART 2.2: Provide Support to Situational Understanding** ...... 2-15
ART 2.2.1 Perform Intelligence Preparation of the Battlefield ..................... 2-16
ART 2.2.2 Perform Situation Development .............................................. 2-19
ART 2.2.3 Provide Intelligence Support to Protection ............................... 2-20
ART 2.2.4 Provide Tactical Intelligence Overwatch ................................. 2-21
ART 2.2.5 Conduct Police Intelligence Operations .................................... 2-21
ART 2.2.6 Provide Intelligence Support to Civil Affairs Operations .......... 2-26

**Section III – ART 2.3: Conduct Information Collection** .......................... 2-27
ART 2.3.1 Plan Requirements and Assess Collection ................................. 2-28
ART 2.3.2 Direct Information Collection .................................................. 2-30
ART 2.3.3 Execute Collection ................................................................ 2-32
ART 2.3.4 Conduct Intelligence-Related Missions and Operations .......... 2-33

**Section IV – ART 2.4: Provide Intelligence Support to Targeting and**
**Information-Related Capabilities** ......................................................... 2-43
ART 2.4.1 Provide Intelligence Support to Targeting ........................................... 2-44
ART 2.4.2 Provide Intelligence Support to Information-Related Capabilities ... 2-46
ART 2.4.3 Provide Intelligence Support to Combat Assessment ...................... 2-50

Chapter 3
ART 3.0: THE FIRES WARFIGHTING FUNCTION ......................................... 3-1
Section I – ART 3.1: Integrate Fires ............................................................... 3-1
ART 3.1.1 Conduct Targeting ........................................................................... 3-2
ART 3.1.2 Decide Surface Targets ................................................................. 3-2
ART 3.1.3 Detect Surface Targets ................................................................. 3-3
ART 3.1.4 Nominate Electronic Attack Effects on Targets .............................. 3-3
ART 3.1.5 Nominate Computer Network Attack Effects on Targets .............. 3-4

Section II – ART 3.2: Provide Fire Support ................................................. 3-4
ART 3.2.1 Employ Fires .................................................................................. 3-5
ART 3.2.2 Conduct Counterfire Operations .................................................... 3-10
ART 3.2.3 Conduct Survey Operations ........................................................ 3-10
ART 3.2.4 Conduct Meteorological Operations ............................................. 3-11

Section III – ART 3.3: Integrate Air-Ground Operations ............................. 3-11

Section IV – ART 3.4: Employ Air and Missile Defense ............................... 3-12
ART 3.4.1 Process Tactical Aerial Platforms ................................................. 3-12
ART 3.4.2 Destroy Aerial Platforms .............................................................. 3-14
ART 3.4.3 Deny Enemy Use of Airspace ....................................................... 3-19
ART 3.4.4 React to Enemy Aerial Attack ..................................................... 3-19
ART 3.4.5 Plan Rocket, Artillery, and Mortar Defense ................................. 3-19
ART 3.4.6 Conduct Rocket, Artillery, and Mortar Defense ............................ 3-20

Chapter 4
ART 4.0: THE SUSTAINMENT WARFIGHTING FUNCTION ........................... 4-1
Section I – ART 4.1: Provide Logistics Support ............................................ 4-2
ART 4.1.1 Provide Field Maintenance Support ............................................. 4-3
ART 4.1.2 Provide Transportation Support ................................................... 4-9
ART 4.1.3 Provide Supplies ......................................................................... 4-17
ART 4.1.4 Provide Field Services ................................................................. 4-35
ART 4.1.5 Provide Operational Contract Support ........................................ 4-41
ART 4.1.6 Provide Distribution .................................................................... 4-42
ART 4.1.7 Provide General Engineering Support .......................................... 4-47

Section II – ART 4.2: Provide Personnel Support ........................................ 4-68
ART 4.2.1 Provide Human Resources Support ............................................ 4-68
ART 4.2.2 Provide Financial Management Support ...................................... 4-75
ART 4.2.3 Provide Legal Support ................................................................. 4-79
ART 4.2.4 Provide Religious Support .......................................................... 4-85
ART 4.2.5 Provide Band Support ................................................................ 4-88

Section III – ART 4.3: Provide Health Service Support ............................... 4-89
ART 4.3.1 Provide Combat Casualty Care .................................................... 4-90
ART 4.3.2 Provide Medical Evacuation (Air and Ground) ............................. 4-95
ART 4.3.3 Provide Medical Regulating Support ......................................... 4-96
ART 4.3.4 Provide Medical Logistics ............................................................ 4-96

Chapter 5
ART 5.0: CONDUCT MISSION COMMAND ............................................. 5-1
Section I – ART 5.1: Conduct the Operations Process ................................ 5-2
ART 5.1.1 Plan Operations ................................................................. 5-2
ART 5.1.2 Prepare for Tactical Operations ........................................ 5-13
ART 5.1.3 Execute Tactical Operations ............................................. 5-16
ART 5.1.4 Assess Tactical Situations and Operations ....................... 5-22

Section II – ART 5.2: Conduct Command Post Operations ............ 5-27
ART 5.2.1 Conduct Command Post Operations to Support Tactical Operations ................................................................. 5-28
ART 5.2.2 Displace the Command Post ............................................. 5-29
ART 5.2.3 Execute Sleep Plans ....................................................... 5-30
ART 5.2.4 Manage Stress ............................................................... 5-31
ART 5.2.5 Maintain Continuity of Command ................................... 5-31
ART 5.2.6 Transition to a Joint Task Force ........................................ 5-31
ART 5.2.7 Transition to a Joint Force Land Component .................. 5-32

Section III – ART 5.3: Conduct Knowledge Management and Information Management ................................. 5-33
ART 5.3.1 Conduct Knowledge Management .................................... 5-34
ART 5.3.2 Conduct Information Management ................................... 5-34
ART 5.3.3 Manage Information and Data ........................................... 5-37
ART 5.3.4 Conduct Geospatial Engineering Activities .................... 5-37

Section IV – ART 5.4: Control Tactical Airspace ......................... 5-38

Section V – ART 5.5: Execute Command Programs ...................... 5-39
ART 5.5.1 Support Commander’s Leadership Responsibilities for Morale, Welfare, and Discipline ......................................................... 5-39
ART 5.5.2 Preserve Historical Documentation and Artifacts ................ 5-44
ART 5.5.3 Conduct Official Ceremonial, Musical, Public, and Special Events ......................................................... 5-49
ART 5.5.4 Develop a Command Environmental Program ................ 5-49
ART 5.5.5 Develop a Command Lessons Learned Program ............ 5-50
ART 5.5.6 Establish and Maintain Discipline .................................... 5-50

Section VI – ART 5.6: Integrate Space Operations ......................... 5-51
ART 5.6.1 Provide Space Force Enhancement .................................... 5-51
ART 5.6.2 Provide Space Control .................................................... 5-54
ART 5.6.3 Provide Army Space Support .......................................... 5-55
ART 5.6.4 Provide Space Situational Awareness .............................. 5-56
ART 5.6.5 Coordinate Army Space Capabilities ............................... 5-56

Section VII – ART 5.7: Conduct Public Affairs Operations ............. 5-57
ART 5.7.1 Provide Advice and Counsel to the Commander .............. 5-57
ART 5.7.2 Conduct Public Affairs Planning ..................................... 5-57
ART 5.7.3 Conduct Public Affairs Training ...................................... 5-58
ART 5.7.4 Conduct Media Facilitation ............................................ 5-58
ART 5.7.5 Conduct Public Communication ..................................... 5-59

Section VIII – ART 5.8: Develop Teams ...................................... 5-59
ART 5.8.1 Form Teams ................................................................. 5-60
ART 5.8.2 Enrich Teams ............................................................... 5-60
ART 5.8.3 Sustain Teams ............................................................... 5-60

Section IX – ART 5.9: Conduct Cyber Electromagnetic Activities .... 5-61
ART 5.9.1 Conduct Cyberspace Operations ..................................... 5-61
ART 5.9.2 Conduct Electronic Warfare ............................................................ 5-64
ART 5.9.3 Conduct Electromagnetic Spectrum Operations ............................. 5-66

Section X – ART 5.10: Install, Operate, and Maintain the Network .......... 5-69
Art 5.10.1 Provide Network Transport and Information Services .............. 5-69
Art 5.10.2 Perform Department of Defense Information Network Operations .. 5-70
Art 5.10.3 Employ Communications Security ............................................. 5-74

Section XI – ART 5.11: Conduct Military Deception .................................... 5-75
ART 5.11.1 Plan Military Deception ............................................................... 5-76
ART 5.11.2 Perform Counterdeception .......................................................... 5-76

Section XII – ART 5.12: Synchronize Information-Related Capabilities .... 5-77
ART 5.12.1 Integrate Information-Related Capabilities ............................. 5-78
ART 5.12.2 Support Information Operations ................................................ 5-79

Section XIII – ART 5.13: Conduct Soldier and Leader Engagement ........ 5-83

Section XIV – ART 5.14: Employ Military Information Support Operations ....................................................................................................... 5-86

Section XV – ART 5.15: Conduct Civil Affairs Operations .......................... 5-89
ART 5.15.1 Conduct Civil Information Management .................................. 5-90
ART 5.15.2 Conduct Nation Assistance ......................................................... 5-91
ART 5.15.3 Support Civil Administration ....................................................... 5-92
ART 5.15.4 Provide Civil Affairs Functional Specialty Support ................. 5-93
ART 5.15.5 Conduct Civil-Military Operations Center Operations .......... 5-98
ART 5.15.6 Plan Civil Affairs Operations and Civil-Military Operations .... 5-99
ART 5.15.7 Conduct Civil-Military Operations ............................................. 5-99
ART 5.15.8 Provide Interface or Liaison Among Military and Civilian Organizations ......................................................................................... 5-101
ART 5.15.9 Locate and Identify Population Centers ...................................... 5-101
ART 5.15.10 Identify Local Resources, Facilities, and Support .................. 5-102
ART 5.15.11 Advise Commanders of Obligations to Civilian Population .... 5-102
ART 5.15.12 Conduct Negotiations With and Between Other Government Agencies and Nongovernmental Organizations ................................. 5-103

ART 5.15.6 Plan Civil Affairs Operations and Civil-Military Operations .... 5-99
ART 5.15.7 Conduct Civil-Military Operations ............................................. 5-99
ART 5.15.8 Provide Interface or Liaison Among Military and Civilian Organizations ......................................................................................... 5-101
ART 5.15.9 Locate and Identify Population Centers ...................................... 5-101
ART 5.15.10 Identify Local Resources, Facilities, and Support .................. 5-102
ART 5.15.11 Advise Commanders of Obligations to Civilian Population .... 5-102
ART 5.15.12 Conduct Negotiations With and Between Other Government Agencies and Nongovernmental Organizations ................................. 5-103

Chapter 6
ART 6.0: THE PROTECTION WARFIGHTING FUNCTION ......................... 6-1

Section I – ART 6.1: Coordinate Air and Missile Defense ....................... 6-1
ART 6.1.1 Plan Ballistic Missile Defense ....................................................... 6-2
ART 6.1.2 Conduct Ballistic Missile Defense .............................................. 6-2
ART 6.1.3 Manage System Configuration ................................................. 6-3
ART 6.1.4 Perform Asset Management ...................................................... 6-4
ART 6.1.5 Provide Global Missile Defense Capabilities ............................. 6-4

Section II – ART 6.2: Conduct Personnel Recovery Operations ........... 6-5
ART 6.2.1 Plan Personnel Recovery Operations ......................................... 6-6
ART 6.2.2 Prepare for Personnel Recovery Operations ............................. 6-7
ART 6.2.3 Coordinate Personnel Recovery Operations ............................. 6-10

SECTION III – ART 6.3: Implement Physical Security Procedures .......... 6-12
ART 6.3.1 Employ Camouflage, Concealment, and Decoy Techniques ....... 6-12
ART 6.3.2 Employ Noise, Light, Thermal, and Physical Evidence Controls ..... 6-13

Section IV – ART 6.4: Conduct Operational Area Security .................... 6-14
ART 6.4.1 Conduct Area and Base Security Operations .......................... 6-16
Section XII – ART 6.12: Conduct Detention Operations ........................................ 6-96
ART 6.12.1 Perform Enemy Prisoner of War Operations .................................. 6-97
ART 6.12.2 Perform Detainee Operations ......................................................... 6-98
ART 6.12.3 Intern United States Military Prisoners .......................................... 6-98

ART 6.13.1 Perform Law Enforcement ............................................................. 6-100
ART 6.13.2 Conduct Criminal Investigations .................................................. 6-100
ART 6.13.3 Conduct Traffic Management and Enforcement ............................ 6-101
ART 6.13.4 Employ Forensic Capabilities ...................................................... 6-102
ART 6.13.5 Conduct Police Engagement ....................................................... 6-103
ART 6.13.6 Provide Customs Support ............................................................. 6-103
ART 6.13.7 Provide Straggler Movement Control ............................................ 6-104

Section XIV – ART 6.14: Conduct Resettlement Operations ........................ 6-105

Chapter 7 ART 7.0: TACTICAL MISSION TASKS AND MILITARY OPERATIONS .... 7-1
Section I – ART 7.1: Conduct Offensive Tasks .............................................. 7-2
ART 7.1.1 Conduct a Movement to Contact ..................................................... 7-3
ART 7.1.2 Conduct an Attack ........................................................................... 7-3
ART 7.1.3 Conduct an Exploitation ................................................................. 7-4
ART 7.1.4 Conduct a Pursuit ........................................................................... 7-4

Section II – ART 7.2: Conduct Defensive Tasks ............................................ 7-5
ART 7.2.1 Conduct a Mobile Defense ............................................................... 7-5
ART 7.2.2 Conduct an Area Defense ............................................................... 7-5
ART 7.2.3 Conduct a Retrograde ..................................................................... 7-6

Section III – ART 7.3: Conduct Stability Tasks ............................................ 7-7
ART 7.3.1 Establish Civil Security ................................................................. 7-8
ART 7.3.2 Establish Civil Control ................................................................. 7-13
ART 7.3.3 Restore Essential Services ........................................................... 7-16
ART 7.3.4 Support Governance ................................................................. 7-20
ART 7.3.5 Support Economic and Infrastructure Development .................... 7-22

Section IV – ART 7.4: Conduct Defense Support of Civil Authorities .......... 7-25
ART 7.4.1 Provide Support for Domestic Civil Law Enforcement Agencies .... 7-25
ART 7.4.2 Provide Support for Domestic Chemical, Biological, Radiological, and Nuclear Incidents ................................................................. 7-26
ART 7.4.3 Provide Support for Domestic Disasters ........................................ 7-26
ART 7.4.4 Provide Other Designated Support ............................................. 7-26
ART 7.4.5 Conduct Civil Support Operations ............................................. 7-26

Section V – ART 7.5: Conduct Tactical Mission Tasks .................................. 7-27
ART 7.5.1 Attack by Fire an Enemy Force or Position ................................... 7-28
ART 7.5.2 Block an Enemy Force .................................................................. 7-28
ART 7.5.3 Breach Enemy Defensive Positions ............................................. 7-28
ART 7.5.4 Bypass Enemy Obstacles, Forces, or Positions ........................... 7-28
ART 7.5.5 Canalize Enemy Movement ....................................................... 7-28
ART 7.5.6 Clear Enemy Forces ..................................................................... 7-28
ART 7.5.7 Conduct Counterreconnaissance .............................................. 7-28
ART 7.5.8 Contain an Enemy Force ............................................................... 7-28
ART 7.5.9 Control an Area .......................................................................... 7-29
Preface

ADRP 1-03 provides the structure and content of the Army Universal Task List (AUTL). The AUTL is intended to inform all members of the Profession of Arms of what the Army contributes to the joint force in terms of tasks performed. Additionally, it is intended that proponent training developers use the AUTL to develop more comprehensive training and evaluation outline evaluation criteria for collective tasks and proponent combat developers to better understand the tasks a given unit must perform.

The AUTL is a comprehensive, but not all-inclusive listing of Army tasks, missions, and operations. Units and staffs perform tasks, provide capabilities, accomplish missions, and conduct operations at corps level and below. For each task, the AUTL provides a numeric reference, a task title, a task description, a doctrine reference, and, in most cases, recommended measures of performance (measures). Training developers use these measures to develop training and evaluation outline evaluation criteria for supporting collective tasks. The task proponent is responsible for developing the training and evaluation outlines that supports each AUTL task. As a catalog, the AUTL captures doctrine as it existed on the date of its publication.

The principal audience for ADRP 1-03 is the institutional force, specifically personnel performing capability development, integration functions, and training development. Commanders and staffs in the operational force should refer to the Combined Arms Training Strategies (known as CATS) in the Army Training Management System (known as ATMS) which contain training and evaluation outlines (known as T&EO) for collective and individual task. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces.

Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States, international and, in some cases, host-nation laws and regulations. Commanders at all levels ensure their Soldiers operate in accordance with the law of war and the rules of engagement (see FM 27-10).

ADRP 1-03 uses joint terms where applicable. Selected joint and Army terms and definitions appear in both the glossary and the text. Terms for which ADRP 1-03 is the proponent publication (the authority) are marked with an asterisk (*) in the glossary. Definitions for which ADRP 1-03 is the proponent publication are boldfaced in the text. For other definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition.

ADRP 1-03 applies to the Active Army, Army National Guard/Army National Guard of the United States, and United States Army Reserve unless otherwise stated. The proponent of ADRP 1-03 is the United States Army Combined Arms Center. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center. Send comments and recommendations on a DA Form 2028 (Recommended Changes to Publications and Blank Forms) to Commander, U.S. Army Combined Arms Center and Fort Leavenworth, ATTN: ATZL-MCD (ADRP 1-03), 300 McPherson Avenue, Fort Leavenworth, KS 66027-2337; by e-mail to usarmy.leavenworth.mccoembx.cadd-org-mailbox@mail.mil; or submit an electronic DA Form 2028.

Introduction

The Army Universal Task List (AUTL) describes what well-trained, well-led, and well-equipped Soldiers do for the Nation. While focused on the land dimension, abilities of Army forces complement abilities of other Services. The ability of Army forces to perform tasks builds the credible land power necessary for joint force commanders to preclude and deter enemy action, win decisively if deterrence fails, and establish a rapid return to sustained stability.

The AUTL provides a common language and reference system for doctrine, capability, and training developers. Proponents and schools use AUTL tasks, those tasks’ recommended measures of performance, and the unit’s table of organization and equipment to establish unit-specific, collective task training and evaluation outlines. Proponent training and evaluation outlines provide the measurable conditions and standards to be used by commanders in evaluating an organization and individuals’ abilities to perform these tasks.

The AUTL’s link to the Universal Joint Task List (UJTL) at tactical, operational, and strategic levels aids analysts and planners in understanding the Army’s role and integrating joint operations.

For Army units, the primary source for standards is their proponent-approved individual and collective tasks. Proponents revise standards when the mission variables described in ADRP 3-0 of mission, enemy, terrain and weather, troops and support available, time available, and civil considerations (METT-TC) significantly differ from those standards associated with a task training and evaluation outline. Significant differences between assumed METT-TC in the tasks outlined in this manual and a commander’s assessment of METT-TC may include new unit equipment, a table of organization, force packaging decisions during deployment, or new unit tasks.

The AUTL divides the warfighting functions into Army tactical tasks (ARTs). Many ARTs have parallel tasks at the other levels of war, which are addressed in the UJTL. For example, ARTs associated with preparations for overseas movement link vertically to operational-level, force projection tasks. Vertical task links provide connectivity among tactical, operational, and strategic activities. However, contributions of tactical land power to joint military power are unique in some cases and do not necessarily link directly to operational and strategic-level UJTL tasks.

The AUTL does not include tasks that Army forces perform as part of joint and multinational forces at the strategic and operational levels. Those tasks are included in the UJTL. The UJTL defines tasks and functions performed by Army forces operating at the strategic and operational levels of war. The UJTL provides an overall description of joint tasks to apply at strategic, operational, and tactical levels of command. The UJTL also provides a standard reference system used by TRADOC combat developers for analysis, such as front-end analysis of force element capabilities. Each military Service is required to publish its own tactical task list to supplement the UJTL. The AUTL is the Army supplement to the UJTL.

The AUTL complements the UJTL by providing tactical level of war, Army specific tasks. The AUTL—

- Provides a common, doctrinal structure for collective tasks that support Army tactical missions and operations conducted by Army units and staffs.
- Articulates what tasks the Army performs to accomplish missions without describing how success occurs or standards are met.
- Applies to offensive, defensive, stability, and defense support of civil authorities tasks.
- Provides standard definitions and helps establish a common language and reference system for all echelons (from company to corps) and staff sections.
- Uses approved definitions or derived definitions from current doctrine.
- Addresses each ART in only one location.
Introduction

- Lists ARTs subordinate to each of the six warfighting functions (chapters 1-6) and tasks that support execution of the Army’s missions (chapter 7).
- Provides a table with measures of performance used by training developers that can be used to develop standards for each task in chapters 1-6 and generic measures of performance for tasks in chapter 7.

At the upper echelons, the AUTL concisely identifies the major activities of a force. At lower echelons, it provides increased detail on what the force must do to accomplish its mission.

Throughout the manual, where no specific measures are developed, generic measures of performance address tasks—

- For mission accomplishment that occur within the higher commander’s intent of what the force must do and under what conditions.
- For mission accomplishment that occurs within the higher commander’s specified timeline as well as the risk assessment for fratricide avoidance and collateral damage.
- For mission accomplishment that occur with the minimum expenditure of resources.
- After mission accomplishment so the unit remains capable of accomplishing future missions and operations.

The AUTL numbering system provides a standard reference for addressing and reporting requirements, capabilities, or issues. Diagrams in each chapter illustrate each ART’s relationship to the warfighting function that contains it. The horizontal links of ARTs from different warfighting functions require synchronizing their performance in space and time based on the concept of operations. The position of any Army tactical mission or task within the AUTL structure has no relationship to its importance. That importance always depends on the mission. Likewise, the position of an Army tactical mission or task does not imply either command or staff oversight.

Each ART appears only once in the AUTL. Doctrine determines the subordination of ARTs. If several logical locations for an ART exist, then it appears where it depicts its most common relationships. While some warfighting functions resemble one another, their definitions clearly distinguish them.

Chapter 1 includes the movement and maneuver warfighting function tasks. Chapter 1 incorporates reconnaissance and surveillance into movement and maneuver.

Chapter 2 includes the intelligence warfighting tasks and aligns them into the four categories: support to force generation, support to situational understanding, conduct information collection, and support to targeting and information capabilities.

Chapter 3 includes the tasks performed within the fires warfighting function. These are integrate fires, provide fire support, and integrate air-ground operations.

Chapter 4 includes the tasks associated with the sustainment warfighting function: logistics, personnel services, and health service support.

Chapter 5 includes the tasks associated with the mission command warfighting function.

Chapter 6 includes the tasks associated with the protection warfighting function.

Chapter 7 contains tactical mission tasks and military operations. This chapter also consists of the mission tasks associated with offense, defense, stability, and defense support of civil authorities.

This publication contains three appendixes. Appendix A discusses task development. Appendix B discusses task submission procedures. Appendix C discusses front-end analyses of the task.

In applying the AUTL to the Army training and education development process, a number of basic terms apply. The introductory table shows their definitions and proponents. Understanding the relationships of ARTs, operations, and missions makes using the AUTL to develop learning products more successful.

In applying the AUTL to the Army training process, a number of basic terms apply. The introductory table shows their definitions and proponents. Understanding the relationships of ARTs, operations, and missions makes using the AUTL to establish training requirements more successful.
## Introductory Table

</tbody>
</table>

The primary source for tasks and training and evaluation outlines is the Army Training Management System. Proponents approve tasks and training and evaluation outlines. From the task proponent, commanders request new or revised standards when the factors of METT-TC significantly differ from those associated with a task identified in a training and evaluation outline. Significant METT-TC differences may result from new unit equipment or force package decisions in support of a mission. An example of this would be a cannon equipped field artillery battery providing installation security.

Figures and tables in chapters of this publication intentionally contain no captions. The figures simply delineate the organization of the ARTs and contain no content. As such, the corresponding ART sufficiently labels each figure. Tables are ART-specific measures (as discussed in Appendix A). Each table applies only to that ART. As such, the corresponding ART sufficiently labels each table and introduces any acronyms.
This page intentionally left blank.
Chapter 1

ART 1.0: The Movement and Maneuver Warfighting Function

The movement and maneuver warfighting function is the related tasks and systems that move and employ forces to achieve a position of relative advantage over the enemy and other threats. Direct fire, reconnaissance, and close combat are inherent in maneuver. The movement and maneuver warfighting function includes tasks associated with force projection related to gaining a position of advantage over the enemy. Movement is necessary to disperse and displace the force as a whole or in part when maneuvering. Maneuver is the employment of forces in the operational area. It works through movement and with fires to achieve a position of advantage relative to the enemy to accomplish the mission. Effective maneuver requires close coordination with fires. Both tactical and operational maneuver require sustainment support. (ADRP 3-0) (USACAC)
1-1. Force projection is the military instrument of national power that systemically and rapidly moves military forces in response to national requirements. Force projection demonstrates the ability of the nation to alert, mobilize, and rapidly deploy combat forces and sustainment units (Regular Army, the Army National Guard/Army National Guard of the United States, and the United States Army Reserve forces) to operate effectively anywhere in the world. The ability to rapidly deploy Army forces with sufficient depth and strength to sustain multiple, simultaneous operations contributes to mission accomplishment. (ATP 3-35) (CASCOM)

ART 1.0: The Movement and Maneuver Warfighting Function

ART 1.1.1 CONDUCT MOBILIZATION OF TACTICAL UNITS

1-2. Mobilization is the process by which Army tactical forces or parts of the forces are brought to a state of readiness for war or other national emergency. (See JP 1-02 for a complete definition.) It includes activating all or part of the Reserve Components as well as assembling and organizing personnel, supplies, and materiel. (ATP 3-35) (CASCOM)

</tr>
</tbody>
</table>

ART 1.1.1.2 CONDUCT HOME STATION MOBILIZATION ACTIVITIES

1-4. This task involves activities of Reserve Components at home station after receiving a mobilization order followed by entry onto Federal active duty or other mission changes. It includes taking action to speed transition to active duty status, such as identifying shortages of critical personnel and equipment. Task activities include inventorying unit property, dispatching an advance party to the mobilization station, and loading the unit on organic equipment or designated carriers. Commanders designate the stay-behind rear commander and organizational structure of nondeployable personnel. Movement is coordinated with state area commands defense movement coordinator, unit movement coordinator, installation transportation offices, and Military Surface Deployment and Distribution Command. (ATP 3-35) (CASCOM)

<table>

</tr>
</tbody>
</table>
ART 1.1.1.3 CONDUCT MOBILIZATION STATION ACTIVITIES

1-5. This task encompasses actions required to meet deployment or other unit validation criteria. It results in assuring the unit’s mission capability. Members of Reserve Components transition to active duty. Commanders conduct necessary individual and collective training that may vary as evaluations and circumstances dictate. Personnel complete preparation for overseas movement. Soldiers prepare equipment for deployment. Mobilization station commanders verify training and processing is completed at home station to preclude it being repeated. Depending on the situation, units may move through a mobilization site rather than a mobilization station. (ATP 3-35) (CASCOM)

</tbody>
</table>

ART 1.1.2 CONDUCT TACTICAL DEPLOYMENT AND REDEPLOYMENT ACTIVITIES

1-6. Deployment consists of activities required to prepare and move forces, supplies, and equipment to a theater. Deployment directly impacts the timing and amount of deliverable combat power. Redeployment involves the return of personnel, equipment, and materiel to home station, demobilization stations, or both home and demobilization stations. Commanders consider redeployment as an operational movement critical in reestablishing force readiness. Redeployment planning is an integral part of employment planning and should be coordinated with mission termination or transition plans. (ATP 3-35) (CASCOM)

Note: The following deployment and redeployment tasks are addressed elsewhere in ADRP 1-03:
- ART 1.3 (Conduct Tactical Troop Movements) addresses onward movement.
- ART 4.1.2.3.2 (Move by Air) addresses intra-theater lift.
- ART 4.1.2.3.3 (Move by Water) addresses intra-theater lift.

ART 1.1.2.2 CONDUCT MOVEMENT TO THE PORT OF EMBARKATION

1-8. This task begins with planning and preparation for movement. It involves coordination among the state area command defense movement coordinator, installation transportation office, unit movement officer, Military Surface Deployment and Distribution Command, Air Mobility Command, and unit commander. Task activities include updating movement plans, developing unit deployment lists, verifying load and stow plans, preparing cargo documentation and radio frequency devices, identifying support equipment and personnel requirements, and planning movement control and convoy. (ATP 3-35) (CASCOM)
ART 1.1.2.3 PREPARE FOR MOVEMENT TO THE PORT OF DEBARKATION

1-9. Strategic movement includes all actions required to process unit equipment, containerized cargo, hazardous materials (HAZMAT)—including HAZMAT compatibility, agricultural inspections, and validation of equipment—and HAZMAT cargo documentation during final preparation for loading. Movement by sea involves transporting unit personnel, equipment, and cargo by ocean vessel from the seaport of embarkation to the seaport of debarkation. Movement by air involves transporting unit personnel and equipment by strategic airlift from the airport of embarkation to the airport of debarkation. (ATP 3-35) (CASCOM)

ART 1.1.2.4 PARTICIPATE IN TACTICAL RECEPTION, STAGING, ONWARD MOVEMENT, AND INTEGRATION ACTIVITIES

1-10. The process of reception, staging, onward movement, and integration (known as RSOI) is designed to rapidly combine and integrate arriving elements of personnel, equipment, and materiel into combat power. This task involves unit reception at the port of debarkation (POD). Contractors report to the applicable contracting officer or contracting officer representative. ART 1.1.2.4 may include drawing equipment from pre-positioned stocks. This task begins when the first strategic lift system of the main body arrives at the POD. It ends when units are combat ready. (ATP 3-35) (CASCOM)

SECTION II – ART 1.2: CONDUCT TACTICAL MANEUVER

1-14. Maneuver is employment of forces in the operational area through movement in combination with fires to achieve a position of advantage in respect to the enemy (JP 3-0). Commanders take full advantage of terrain and combat formations when maneuvering their forces. (ADRP 3-90) (USACAC)

### Chapter 1

#### ART 1.2.1 CONDUCT ONE OF THE SIX FORMS OF MANEUVER

1-15. Forms of maneuver are distinct tactical combinations of fire and movement with a unique set of doctrinal characteristics that differ primarily in the relationship between the maneuvering force and the enemy. The forms of maneuver are envelopment, turning movement, infiltration, penetration, frontal attack, and flank attack. While normally combined, each form of maneuver attacks the enemy differently. A single operation may contain several forms of offensive maneuver. For example, a frontal attack to clear a security area may be followed by a penetration to create a gap in the defenses. This could be followed by an envelopment to destroy the first line of defense. Each form of maneuver poses different challenges for attackers and different dangers for defenders. Commanders determine the form of maneuver to use by analyzing the factors of mission, enemy, terrain and weather, troops and support available, time available, and civil considerations. (ADRP 3-90) (USACAC)

#### ART 1.2.1.1 CONDUCT AN ENVELOPMENT

1-16. An envelopment is a form of maneuver in which an attacking force seeks to avoid the principal enemy defenses by seizing objectives behind those defenses that allow the targeted enemy force to be destroyed in their current positions. At the tactical level, envelopments focus on seizing terrain, destroying specific enemy forces, and interdicting enemy withdrawal routes. Envelopments avoid the enemy front where enemy forces are protected and can easily concentrate fires. Single envelopments maneuver against one enemy flank; double envelopments maneuver against both flanks. A vertical envelopment (an air assault or airborne operation) creates an assailable flank by arriving from an unexpected direction. An envelopment may result in an encirclement. (FM 3-90-1) (USACAC)

---

**Note:** Airborne assault, air assault, and amphibious operations are tactical aspects of forcible entry operations that involve seizing and holding a military lodgment in the face of armed opposition. Joint force commanders conduct forcible entry operations at the operational level. (See JP 3-18.) Forcible entry operation tasks are addressed in the Universal Joint Task List (known as UJTL).

#### ART 1.2.1.1.1 Conduct an Airborne Assault into Area of Operations

1-17. An airborne assault is the use of airborne forces to parachute into an objective area to attack or eliminate armed resistance and secure designated objectives from which to conduct lodgment activities or to seize key terrain to block or deny its use by the enemy. This mission begins when paratroopers and equipment exit the aircraft by parachute or are air landed. The mission ends when all elements of the relevant airborne echelon are delivered to the objective area and the assault objective has been seized. (JP 3-18) (JS)
Note: Marshaling forces for airborne operations is addressed as ART 1.3.1.3 (Marshal Forces to Conduct an Airborne Assault).

- The air movement phase of airborne operations is addressed as ART 4.1.2.3.2 (Move by Air).
- Tasks for the ground tactical-phase of airborne operations duplicate missions are contained elsewhere in this chapter.

</tbody>
</table>

ART 1.2.1.1.2 Conduct an Air Assault

1-18. An air assault secures a defendable airhead or other key terrain from which to conduct lodgment activities or follow-on tactical operations. The mission ends when all elements of the relevant air assault echelon are delivered to the objective area and the assault objective has been seized. (FM 3-99) (USAMCOE)

Note: ART 1.2.1.1.2 does not include air traffic control. Air traffic control is addressed under ART 5.4 (Control Tactical Airspace).

- ART 1.2.1.1.2 does not include efforts to improve the landing zone. Landing zone improvement is addressed under ART 1.6.2 (Enhance Movement and Maneuver).
- Pickup zone operations are addressed as ART 1.3.1.4 (Conduct Pickup Zone Operations).
- The air movement phase of air assault operations is addressed as ART 4.1.2.3.2 (Move by Air).
- Tasks for the ground tactical phase of air assault operations duplicate missions contained elsewhere in this chapter.
- Scale and measures assigned to ART 1.2.1.1.1 (Conduct an Airborne Assault into Area of Operations) apply.

ART 1.2.1.1.3 Conduct an Amphibious Assault

1-19. The Army conducts an amphibious assault as a member of the landing force in conducting one of four forcible entry operations. It may also conduct forcible entry operations via airborne assault, air assault, or a combination of any or all of these forcible entry techniques. An amphibious assault secures a defendable beachhead from which to conduct lodgment activities. This mission begins when Soldiers and equipment leave the ships that bring them to the amphibious objective area and transfer to the landing craft that will
deliver them to the beach. The mission ends when all elements of the amphibious force are delivered onto
the beachhead and the assault objective has been seized. (JP 3-02) (JS)

Note: Army forces follow joint doctrine and Marine Corps doctrinal publications when tasked to
conduct amphibious operations.
- Scale and measures assigned to ART 1.2.1.1 (Conduct an Airborne Assault into Area of
  Operations) apply.

ART 1.2.1.4 Conduct an Encirclement Operation

1-20. Encirclement operations are operations where one force loses its freedom of maneuver because an
opposing force is able to isolate it by controlling all ground lines of communications and reinforcement.
(ADRP 3-90) (USACAC)

ART 1.2.1.2 CONDUCT A TURNING MOVEMENT

1-21. A turning movement is a form of maneuver in which the attacking force seeks to avoid the enemy’s
principle defensive positions by seizing objectives behind the enemy’s current positions thereby causing the
enemy force to move out of their current positions or divert major forces to meet the threat. (FM 3-90-1)
(USACAC)

ART 1.2.1.3 CONDUCT AN INFILTRATION

1-22. An infiltration is a form of maneuver in which an attacking force conducts undetected movement
through or into an area occupied by enemy forces to occupy a position of advantage behind those enemy
positions while exposing only small elements to enemy defensive fires. (FM 3-90-1) (USACAC)

Note: Infiltration is also a tactical march technique used within a friendly territory to move forces
in small groups at extended or irregular intervals.

ART 1.2.1.4 CONDUCT A PENETRATION

1-23. A penetration is a form of maneuver in which an attacking force seeks to rupture enemy defenses on
a narrow front to disrupt the defensive system. Commanders direct penetrations when enemy flanks are not
assailable or time does not permit another form of maneuver. Successful penetrations create assailable
flanks and provide access to enemy sustainment areas. (FM 3-90-1) (USACAC)

ART 1.2.1.5 CONDUCT A FRONTAL ATTACK

1-24. A frontal attack is a form of maneuver in which an attacking force seeks to destroy a weaker enemy
force or fix a larger enemy force in place over a broad front. At the tactical level, an attacking force can use
a frontal attack to overrun a weaker enemy force rapidly. A frontal attack strikes the enemy across a wide
front and over the most direct approaches. Commanders normally use it when they possess overwhelming
combat power and the enemy is at a clear disadvantage. (FM 3-90-1) (USACAC)

ART 1.2.1.6 CONDUCT A FLANK ATTACK

1-25. A flank attack is a form of offensive maneuver directed at the flank of an enemy. A flank is the right
or left side of a military formation and is not oriented toward the enemy. It is usually not as strong in terms
of forces or fires as is the front of a military formation. A flank may be created by the attacker through the
use of fires or by a successful penetration. (FM 3-90-1) (USACAC)
ART 1.2.2 EMPLOY COMBAT FORMATIONS

1-26. Units use an ordered arrangement of troops and vehicles for a specific purpose. Commanders use one of seven different combat formations: column, line, echelon (left or right), box, diamond, wedge, and vee. Their use depends on the factors of mission, enemy, terrain and weather, troops and support available, time available, and civil considerations (known as METT-TC). (ADRP 3-90) (USACAC)

ART 1.2.2.4 Conduct Actions on Contact

1-30. Units conduct a series of combat actions, often nearly simultaneously, when taking on contact with the enemy to develop the situation. Actions on contact include all forms of contact: sensor; direct and indirect lethal fires and nonlethal effects; air; obstacle or device; electronic warfare; and chemical, biological, radiological, and nuclear. Whether attacking or defending, commanders generate and sustain overwhelming combat power at the point combat forces collide to defeat the enemy rapidly. (ADRP 3-90) (USACAC)

ART 1.2.7 LINK UP WITH OTHER TACTICAL FORCES

1-35. A **linkup** is a meeting of friendly ground forces, which occurs in a variety of circumstances. It happens when an advancing force reaches an objective area previously seized by an airborne or air assault force; when an encircled element breaks out to rejoin friendly forces or a force comes to the relief of an encircled force; and when converging maneuver forces meet. Forces may be moving toward each other, or one may be stationary. (ADRP 3-90) (USACAC)

ART 1.2.9 CONDUCT A RELIEF IN PLACE

1-39. A relief in place is an operation in which, by direction of higher authority, all or part of a unit is replaced in an area by the incoming unit and the responsibilities of the replaced elements for the mission and the assigned zone of operations are transferred to the incoming unit. The responsibilities of the replaced elements for the mission and the assigned zone of operations are transferred to the incoming unit. The incoming unit continues the operation as ordered. The relieving unit usually assumes the same responsibilities and initially deploys in the same configuration as the outgoing unit. Relief in place is executed for a number of reasons including introducing a new unit into combat, changing a unit’s mission, relieving a depleted unit in contact, retaining a unit, relieving the stress of prolonged operations in adverse conditions, resting a unit after long periods in a mission-oriented protective posture, decontaminating a unit, and avoiding excessive radiation exposure. A relief in place may be hasty or deliberate. This task may contain significant environmental considerations, especially if the relief in place occurs at a base camp or other similar place. (JP 3-07.3) (JS)

ART 1.3.2 CONDUCT TACTICAL ROAD MARCH

1-50. A tactical road march is a rapid movement used to relocate units within an area of operations to prepare for combat operations. Commanders arrange troops and vehicles to expedite their movement and conserve time, energy, and unit integrity. They anticipate no interference except by enemy forces or sympathizers. Units conducting tactical road marches employ three tactical march techniques: open column, close column, and infiltration. (ADRP 3-90) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>

<td>Of unit casualties.</td>
</tr>
</tbody>
</table>

ART 1.3.4 CONDUCT AN APPROACH MARCH

1-52. Units conduct an approach march—the advance of a combat unit when direct contact with the enemy is intended. An approach march emphasizes speed over tactical deployment. Units use an approach march when the enemy’s approximate location is known and allows the attacking force to move with greater speed...
and less physical security or dispersion. An approach march ends in an attack position, assembly area, or assault position; or it transitions to an attack. (ADRP 3-90) (USACAC)

<table>

SECTION IV – ART 1.4: CONDUCT DIRECT FIRES

1-53. Units conduct lethal and nonlethal direct fires. Examples of direct-fire systems include small arms, tanks, antitank weapons, automatic weapons, directed energy, optical weapons, acoustic weapons, and blunt trauma weapons. ART 1.4 includes attack helicopter fires and direct fire tied directly to battlefield movement. (JP 3-09.3) (JS)

Note: ART 1.7.1 (Site Obstacles) addresses the elements of direct fire planning, such as the integration of indirect fires, obstacles and terrain, and air and ground assets with control measures designed to mass fires.

SECTION V – ART 1.5: OCCUPY AN AREA

1-56. Units move forces into and secure an area from which to conduct future operations. Units use the minimum control measures required to successfully complete the mission while providing subordinates the flexibility needed to respond to changes in the situation. This task includes occupying assembly areas; occupying attack or assault positions; and establishing and occupying defensive positions, including the five types of battle positions: primary, alternate, supplementary, subsequent, and strong point. (ADRP 3-90) (USACAC)

</tr>
</tbody>
</table>
ART 1.5.2 OCCUPY AN ATTACK AND ASSAULT POSITION

1-58. As part of an offensive operation, units move tactical forces into and through these positions to prepare for further action or support actions of another force. The attack position is the last position an attacking force occupies or passes through before crossing the line of departure. Activities include making last-minute coordination and tactical adjustments, preparing specialized equipment for immediate use, and protecting the occupying force until supporting fire is lifted or shifted. This task includes the use of attack-by-fire and support-by-fire positions and holding areas by attack helicopters. (ADRP 3-90) (USACAC)

</tbody>
</table>

ART 1.5.3 OCCUPY AND ESTABLISH A BATTLE OR DEFENSIVE POSITION

1-59. As part of a defensive operation, units move tactical forces into positions to prepare for further action. A battle position is a defensive location oriented on a likely enemy avenue of approach. Five kinds of battle positions exist: primary, alternate, supplementary, subsequent, and strongpoint. The positions may be located on any type of land and terrain, such as urban, natural, mountainous, piedmont, steppe, delta, desert, jungle, and arctic. (See CJCSM 3500.04F condition 1.0 [Physical Environment] for factors that describe the physical environment.) (ADRP 3-90) (USACAC)

1-62. Assured mobility is a framework—of processes, actions, and capabilities—that assures the ability of a force to deploy, move, and maneuver where and when desired, without interruption or delay, to accomplish the mission. The assured mobility fundamentals—predict, detect, prevent, neutralize, and protect—support the implementation of the assured mobility framework. Freedom of movement and maneuver within the area of operations allows a unit to gain and maintain a position of advantage and achieve decisive results across the range of military operations. Decisive results include denying the enemy freedom of action to attain a position of advantage. Mobility operations are performed as combined arms operations. (ATTP 3-90.4) (USAMSCOE)

Note: The term “breaching system” used in this section includes both manual and mechanical means.

ART 1.6.1 OVERCOME BARRIERS, OBSTACLES, AND MINES

1-63. Units enable a force to maintain its mobility by reducing, bypassing, or clearing obstacles. An obstacle is any natural or man-made obstruction designed or employed to disrupt, fix, turn, or block the movement of an opposing force, and to impose additional losses in personnel, time, and equipment on the opposing force (JP 3-15). Naturally existing obstacles can include rivers, mountains, barrier reefs, and cities. Man-made or reinforcing obstacles can include minefields and antitank ditches. A complex obstacle is a combination of different types of individual obstacles that requires more than one reduction technique (explosive, mechanical, or manual) to create a lane through the obstacle. A reinforcing obstacle is an obstacle that is specifically constructed, emplaced, or detonated through military effort. (ATTP 3-90.4) (USAMSCOE)

ART 1.6.1.1 CONDUCT BREACHING OPERATIONS

1-64. Units conduct a combined arms operation to project combat power to the far side of an obstacle. Breaching tenets include intelligence, synchronization, mass, breach fundamentals (suppress, obscure, secure, reduce, and assault), and breach organization (support, assault, and breach forces). ART 1.6.1.1 includes the reduction of minefields and other obstacles. Reduction is the creation of lanes through or over an obstacle to allow an attacking force to pass. The number and width of lanes created varies with the enemy situation, the assault force’s size and composition, and the concept of operations. The lanes must allow the assault force to rapidly pass through the obstacle. The breach force will reduce, proof (if required), mark, and report lane locations and the land-marking method to higher headquarters. Follow-on units will further reduce or clear the obstacle when required. (ATTP 3-90.4) (USAMSCOE)

ART 1.6.1.2 CONDUCT CLEARING OPERATIONS

1-65. Units conduct clearing operations (area or route clearance) to enable the use of a designated area or route. Clearing is the total elimination or neutralization of an obstacle (to include explosives hazards) or portions of an obstacle. Clearing operations are typically not conducted under fire and may be conducted after a breaching operation where an obstacle is a hazard or hinders friendly movement or occupation of a location. ART 1.6.1.2.1 (Conduct Area Clearance) focuses on obstacle clearance of a designated area and is typically not a combined arms operation. ART 1.6.1.2.2 (Conduct Route Clearance) focuses on obstacle clearance along a specific route, typically conducted as a combined arms operation, and may be performed in situations where enemy contact is likely. (ATTP 3-90.4) (USAMSCOE)

ART 1.6.1.3 CONDUCT GAP-CROSSING OPERATIONS

1-68. A gap-crossing operation is a mobility operation consisting of river crossing, brigade-level crossing, and special gap-crossing operations conducted to project combat power across a linear obstacle (wet or dry gap). The obstacle is linear in that it creates a line crossing all or a significant portion of the area of operations. The obstacle can be wet gap (water obstacle) or dry gap that is too wide to overcome by self-bridging. The nature of the obstacle differentiates a gap crossing from a breaching operation. A wet gap crossing (river crossing) is also unique because the water obstacle is significantly large enough to prevent normal ground maneuver. A gap crossing generally requires special planning and support. Factors of mission, enemy, terrain and weather, troops and support available, time available, and civil considerations dictate the type of crossing (hasty, deliberate, or retrograde). Gap crossing generally includes preparing access and egress routes, completing a hydrographic survey (underwater obstacle detection or reduction), employing crossing means (bridging and rafts), and operating an engineer regulating point if required. This task is measured against a river crossing, the most difficult standard of gap-crossing operations. Crossing fundamentals include surprise, extensive preparation, a flexible plan, traffic control, organization, and speed. Gap crossings may be conducted in support of combat maneuver or in support of lines of communications. (ATTP 3-90.4) (USAMSCOE)

Note: The engineer bridge, raft, and assault boat systems percentages in this task apply to the individual ribbon bridge bays and rafts, and to individual assault boats; they do not apply to a ribbon or assault bridge set as a whole.
ART 1.6.1.3.1 Conduct Gap Crossing in Support of Combat Maneuver

1-69. Conduct gap crossing in support of combat maneuver includes both hasty and deliberate gap crossings and the majority of river crossing operations. It includes both those operations conducted primarily at the level of brigade combat team and those conducted by the division or corps level organization. Those gap crossings conducted as a reduction method within a combined arms breaching operation are also included in this ART. However, since the primary focus of planning and preparation is on the breaching operation, they are typically discussed as a part of the breaching operation rather than as a separate gap-crossing operation in that context. (ATTP 3-90.4) (USAMSCOE)

ART 1.6.1.3.2 Conduct Line of Communications Gap Crossing Support

1-70. Conduct line of communications (LOC) gap crossing support is not tactically focused, although it may clearly affect tactical operations. This support may provide the means for combat maneuver forces to move, but it is not directly in support of combat maneuver. As the title implies this task focuses on ultimately using nonstandard bridging. Both assault and tactical bridging is designed to support the flow of traffic requirements (number of passes) of LOCs. (ATTP 3-90.4) (USAMSCOE)

Note: For construction and maintenance of roads and highways, see ART 1.6.2.1 (Construct Combat Roads and Trails).

**ART 1.6.2 ENHANCE MOVEMENT AND MANEUVER**

1-71. Units enhance movement and maneuver to increase the freedom of action of the maneuver force by proactively applying all available means. This may include mobility operations; traffic control measures and
traffic regulation enforcement; inherent sustainment requirements; explosive ordnance disposal support; route improvement and clearing, marking, or signing; and chemical, biological, radiological, and nuclear support. Environmental considerations are applied as appropriate. (FM 3-81) (USAMSCOE)

ART 1.6.2.1 CONSTRUCT COMBAT ROADS AND TRAILS

1-72. Units prepare and maintain routes for equipment and personnel. ART 1.6.2.1 includes delineating routes, conducting reconnaissance, clearing ground cover, performing earthwork, providing drainage, stabilizing soil, and preparing the road surface for transit by Army combat and tactical vehicles. (ATTP 3-90.4) (USAMSCOE)

ART 1.6.2.2 CONSTRUCT FORWARD AIRFIELDS AND LANDING ZONES

1-73. Units prepare and maintain landing zones and landing strips to support Army and joint aviation ground facility requirements. (ATTP 3-90.4) (USAMSCOE)
ART 1.6.2.3 CONDUCT AIRFIELD MANAGEMENT

1-74. Airfield management enhances operational maneuver by synchronizing airfield construction and repair efforts, identifying and marking unexploded ordinance, coordinating for explosive ordnance disposal support, mitigating aviation risk and ensuring the airfield environment is safe to operate from, directing airfield support operations, processing notices to airmen, implementing airfield operational procedures, and enabling the creation and protection of airspace for aviation forces to operate within. Airfield management enhances the speed, safety, sustainability, and survivability of aircraft and aircrews, and ensures successful mission completion. Army airfield management forces must seamlessly integrate joint, multinational, and
host-nation policies and procedures to ensure the safe and expeditious operation of aircraft within an operational environment. AR 95-2 discusses airfield management in depth. (FM 3-04.300) (USAACE)

ART 1.6.2.5 DEVELOP TRAFFIC CONTROL PLAN

1-76. Units support movement control measures with a traffic control plan that addresses military police support in controlling the use of main and alternate supply routes (names, direction of travel, size, and weight restrictions), checkpoints, rest and refuel areas, traffic control points, highway regulation points, and mobile patrols. The traffic control plan identifies major routes to bear most of the traffic load. It also reflects any route restrictions such as direction of travel, size and weight restrictions, and critical points. Critical points are facilities, terminals, ports, railheads, and cargo transfer points that, if congested, will limit the efficiency and effectiveness of the entire transportation network. ART 1.6.2.5 includes efforts to address high-volume traffic conditions and mitigate or prevent excessive traffic on highways, high-volume primary routes, and urban streets including secondary routes and residential streets. The traffic control plan includes traffic enforcement measures that support movement control and highway traffic regulations and addresses speed control, and safety inspection checkpoints that assist in protecting the force and ensure that only authorized traffic uses controlled routes. (FM 3-39) (USAMPS)

Note: This task supports ART 4.1.2.1 (Provide Movement Control).

ART 1.6.2.6 CONDUCT ENFORCEMENT OF HIGHWAY (MAIN AND ALTERNATE SUPPLY ROUTES) REGULATIONS

1-77. Conduct enforcement of highway regulations involves actions taken by military police to support movement control and enable freedom of movement throughout the area of operations. Military police units conduct highway regulation enforcement consistent with the traffic control plan (see ART 1.6.2.5 [Develop Traffic Control Plan]). A traffic control plan is developed by military police to complement the movement control and highway regulation plan. The traffic control plan contains specific measures to ensure the smooth and efficient use of the road network to include route designations, restrictions, priority of movement, direction of travel, highway regulation points, and preplanned military police traffic control points. (FM 3-39) (USAMPS)

ART 1.6.3 NEGOTIATE A TACTICAL AREA OF OPERATIONS

1-78. Units overcome the challenges presented by the trafficability or configuration of the ground, air, or sea environment through the inherent characteristics of personnel or their equipment. This task involves overcoming aspects of the physical environment—such as high winds and rain—and the presence of chemical, biological, radiological, and nuclear agents. It includes crossing or bypassing contaminated areas. (FM 3-11) (USACBRNS)

Note: ART 1.6.3 differs from ART 1.3.2 (Conduct Tactical Road March) and ART 1.3.3 (Conduct Tactical Convoy) by the environment in which it takes place. ARTs 1.3.2 and 1.3.3 involve only the act of moving units. ART 1.2.2.2 (Employ Traveling Overwatch Movement Technique) includes crossing and bypassing contaminated areas.

### SECTION VII – ART 1.7: CONDUCT COUNTERMOBILITY OPERATIONS

1-81. Countermobility operations involve constructing reinforcing obstacles integrated with fires to inhibit the maneuver of an enemy force, increase time for target acquisition, and increase weapon effectiveness. Commanders integrate obstacle planning into the military decisionmaking process (see ADP 5-0); integrate obstacles into the concept of operations (primarily through proper siting); and maintain integration through obstacle turnover, protection, and tracking. The force constructs, emplaces, or detonates tactical and protective obstacles to reinforce existing obstacles. Tactical obstacles are designed and integrated with fires to achieve a tactical effect—disrupt, fix, turn, or block. The three types of tactical obstacles are directed obstacles, situational obstacles, and reserve obstacles. They are distinguished by the differences in execution criteria. Protective obstacles are a key component of survivability operations. (See ART 6.6 [Conduct Survivability Operations].) The force may employ any type of individual obstacle as a tactical obstacle. (ATP 3-90.8) (USAMSCOE)
Note: The term “countermobility systems” used in this section is generic in nature and includes both manual and mechanical means, such as sapper units, cratering demolition kits, and mine dispensing systems.

ART 1.7.3 MARK, REPORT, AND RECORD OBSTACLES

1-84. Units mark all obstacles to aid in fratricide prevention. ART 1.7.3 includes report the intention to emplace obstacles (if required), initiation of construction and emplacement, and completion and execution of obstacles. As a minimum, units record the obstacle location, type, and (if applicable) number and types of mines, placement of mines, use of antihandling devices, location of lanes and gaps, and description of marking. (ATP 3-90.8) (USAMSCOE)

ART 1.7.4 MAINTAIN OBSTACLE INTEGRATION

1-85. Units ensure emplaced obstacles remain integrated into the concept of operations. ART 1.7.4 includes turnover and transfer, protection, repair, and tracking of obstacles. Obstacle protection focuses on two tasks: counterreconnaissance to prevent the enemy from gathering obstacle intelligence and enemy mobility asset destruction to ensure maximum effectiveness of obstacles. Obstacle tracking includes supervising achievement of key milestones as part of the unit’s timeline (Class IV and V forward, initiate engagement area development, siting complete), collation, dissemination of obstacle information, and maintenance of records. (ATP 3-90.8) (USAMSCOE)

### SECTION VIII – ART 1.8: CONDUCT RECONNAISSANCE

1-86. **Reconnaissance** is a mission undertaken to obtain, by visual observation or other detection methods, information about the activities and resources of an enemy or adversary, or to secure data concerning the meteorological, hydrographic, or geographic characteristics of a particular area (JP 2-0). Commanders orient their reconnaissance assets by identifying a reconnaissance objective within the area of operations. The reconnaissance objective is a terrain feature, geographic area, enemy force, adversary, or other mission or operational variable, such as specific civil considerations, about which the commander wants to obtain additional information. (ADRP 3-90) (USACAC)

ART 1.8.7 CONDUCT AN ENGINEER RECONNAISSANCE

1-93. Engineer reconnaissance is a focused application of special or unique capabilities supporting reconnaissance operations and is applicable over and pertinent to all four forms of reconnaissance. Engineer
reconnaissance generated from and organized by the engineer functions provides a range of technical reconnaissance capabilities. Each of the functions provides varying degrees of technical expertise and effort within the assigned mission and tasks. The tasks and levels of expertise provide overlap from function to function. This task includes performing chemical, biological, radiological, and nuclear reconnaissance as well as engineer reconnaissance (to include infrastructure reconnaissance and environmental reconnaissance). </tbody>
</table>

SECTION X – ART 1.10: CONDUCT MANEUVER SUPPORT OPERATIONS

1-95. Maneuver support operations integrate the complementary and reinforcing capabilities of key protection, movement and maneuver, and sustainment functions, tasks, and systems to enhance freedom of action. The integrated and synchronized maneuver support related tasks shape the environment to protect
the force, enhance survivability, and support mobility and countermobility. Maneuver support operations also provide selected sustainment support and generally expand the freedom of action of the supported units while denying options and freedom of actions to the enemy. This allows combat power to be applied at the decisive point and time, facilitates simultaneous actions at the operational level, and facilitates rapid transitions at the tactical level. This page intentionally left blank.
The *intelligence warfighting function* is the related tasks and systems that facilitate understanding the enemy, terrain, and civil considerations. This warfighting function includes understanding threats, adversaries, and weather. It synchronizes information collection with the primary tactical tasks of reconnaissance, surveillance, security, and intelligence operations. Intelligence is driven by commanders and is more than just collection. Developing intelligence is a continuous process that involves analyzing information from all sources and conducting operations to develop the situation. (ADRP 3-0) (USACAC)
2-1. Provide intelligence support to force generation is the task of providing intelligence readiness, establishing intelligence architecture, providing intelligence overwatch, generating intelligence knowledge, and tailoring the intelligence force. It includes establishing intelligence communication and knowledge management architectures. These architectures enable collaboration among strategic, operational, and tactical intelligence organizations in intelligence reach, collaborative analysis, data storage, processing and analysis, and intelligence support to force generation. (FM 2-0) (USAICOE)

**ART 2.1.1 PROVIDE INTELLIGENCE READINESS**

2-2. Intelligence readiness operations develop baseline knowledge of multiple potential threats and operational environments. These operations support ongoing operations, contingency planning, and operational preparation. These operations and related intelligence training activities enable the intelligence warfighting function to support the commander’s intelligence requirements effectively. (FM 2-0) (USAICOE)

ART 2.1.1.3 CONDUCT FOUNDRY-ENABLED TRAINING

2-5. The Foundry Intelligence Training Program is the Army’s premier intelligence training and readiness program supporting mission command. The program and its catalog of intelligence training electives and education are designed to sustain critical intelligence capabilities and perishable intelligence skills of tactical-level units. It enhances the technical and target readiness and regional depth of intelligence core competencies. Foundry training provides the tactical force with ways and means for all components—Active Army, Army National Guard, and the Army Reserve—to structure rigorous training plans. It ensures realistic training environments that enable advanced skills training, regional focus and immersion, technical training and certification. Foundry training provides a single hub for the Army’s military intelligence (MI) force to sustain critical intelligence core competencies through home-station training platforms, mobile training teams, live-environment training opportunities, and collective training events. ART 2.1.2.1 CONDUCT INTELLIGENCE REACH

2-7. Intelligence reach is a process by which intelligence organizations proactively and rapidly access information from, receive support from, and conduct direct collaboration and information sharing with other units and agencies, both within and outside the area of operations, unconstrained by geographic proximity, echelon, or command. Intelligence obtained through intelligence reach helps the staff plan and prepare for operations and answer commander’s critical information requirements without the need for the information to pass through a formal hierarchy. (FM 2-0) (USAICOE)

ART 2.1.2.2 DEVELOP AND MAINTAIN AUTOMATED INTELLIGENCE NETWORKS

2-8. This task entails providing information systems that connect unique assets, units, echelons, agencies, and multinational partners for intelligence, collaborative analysis and production, dissemination, and intelligence reach. It uses existing automated information systems, such as the distributed common ground system-Army (known as DCGS-A), and, when necessary, creates operationally specific networks. In either case, these networks allow access to unclassified and classified means and interoperability across the area of operations. This task includes identifying deficiencies in systems or networks, service procedures, system administration procedures, security procedures, an alternate power plan, a redundancy capability, system backups, and update procedures. (FM 2-0) (USAICOE)
ART 2.1.2.3 ESTABLISH AND MAINTAIN ACCESS

2-9. This task entails establishing and providing access to classified and unclassified programs, databases, networks, systems, and other Web-based collaborative environments for Army and multinational organizations to facilitate intelligence reporting, production, dissemination, sustainment, and intelligence reach. This task also includes establishing access with joint forces and national agencies to facilitate a multilevel collaborative information environment. Its purpose is to facilitate intelligence reporting, production, dissemination, and sustainment; intelligence reach; and a multilevel collaborative information environment. (FM 2-0) (USAICOE)

ART 2.1.2.4 CREATE INTELLIGENCE DATABASES

2-10. This task entails creating and maintaining unclassified and classified databases. Its purpose is to establish interoperable and collaborative environments for Army forces, joint forces, national agencies, and multinational organizations. This task facilitates intelligence analysis, reporting, production, dissemination, sustainment, and intelligence reach. It also includes the requirements for formatting and standardization, indexing and correlation, normalization, storage, security protocols, and associated applications. The following must be addressed in database development, management, and maintenance: data sources; information redundancy; import and export standards; data management and standards; update and backup procedures; and data mining, query, and search protocols. (FM 2-0) (USAICOE)

<table>

</tbody>
</table>
ART 2.1.3 PROVIDE INTELLIGENCE OVERWATCH

2-11. Intelligence overwatch is creating standing, fixed analytical intelligence capabilities that provide dedicated intelligence support to committed maneuver units. The overwatch cell is connected directly to supported units via a shared intelligence network that can extract information from multiple sources and provide succinct answers (vice megabytes of information) when time is critical. (FM 2-0) (USAICOE)

Note: This task branch supports ART 6.6 (Conduct Survivability Operations).

ART 2.1.4 GENERATE INTELLIGENCE KNOWLEDGE

2-12. Generate intelligence knowledge is a continuous, user-defined task driven by the commander. It begins before mission receipt and provides the relevant knowledge required regarding an operational environment for the conduct of operations. As soon as the intelligence officer and other staff sections begin to collect data on an operational environment, they should organize the data into databases that meet the commander’s visualization requirements. The execution of this task must follow all applicable policies and regulations on information collection and operations security. The information and intelligence obtained are refined into knowledge for use in mission analysis through functional analysis. Information is obtained through intelligence reach; research; data mining; database access; academic studies, products, or materials; intelligence archives; open-source intelligence; and other information sources. Generate intelligence knowledge is the foundation for performing intelligence preparation of the battlefield and mission analysis. The primary product of the generate intelligence knowledge task is the initial data files and intelligence survey. (FM 2-0) (USAICOE)

ART 2.1.4.1 DEVELOP THE FOUNDATION TO DEFINE THREAT CHARACTERISTICS

2-13. Units obtain detailed information and intelligence concerning threat characteristics affecting the conduct of operations. Units obtain this information from sources that include intelligence reach; research; data mining; database access; academic studies, products, or materials; intelligence archives; and open-source intelligence. This task develops specific, detailed information for each threat characteristic. The information, intelligence, products, and materials obtained are refined for use in mission analysis, intelligence preparation of the battlefield (known as IPB), and other planning tasks. This refinement occurs through functional analysis and other analytic techniques. (FM 2-0) (USAICOE)

ART 2.1.4.3 OBTAIN DETAILED WEATHER AND WEATHER EFFECTS INFORMATION AND INTELLIGENCE

2-15. Units obtain detailed information and intelligence regarding recent and historical weather trends, seasonal patterns, aspects of weather, and weather zones. Units obtain information on how the weather affects friendly and enemy forces and operations in the area of interest. Sources of information include intelligence reach; research; data mining; database access via the digital topographic support system; academic studies, products, or materials; intelligence archives; and open-source intelligence. This task requires specific and detailed information for each weather factor. The information, intelligence products, and materials obtained are refined for use in mission analysis, intelligence preparation of the battlefield (IPB), and other planning tasks through functional analysis. ART 2.1.4.4 OBTAIN DETAILED CIVIL CONSIDERATIONS INFORMATION AND INTELLIGENCE

2-16. Analysis of the broad aspects of an operational environment in terms of the operational variables provides relevant information that senior commanders use to understand, visualize, and describe an operational environment. The operational variables are political, military, economic, social, information, infrastructure, physical environment, and time. Upon receipt of a warning order or mission, Army leaders filter relevant information and narrow their focus to six mission variables. The mission variables are mission, enemy, terrain and weather, troops and support available, time available, and civil considerations. These variables are used during intelligence analysis and facilitate situational understanding. Units obtain detailed information and intelligence concerning the civil considerations—areas, structures, capabilities, organizations, people, and events (ASCOPE)—within or affecting an expected operational environment through reach; research; data mining; database access; academic studies, products, or materials; intelligence archives; open-source intelligence; or other information sources to support operations, planning, execution, and commander’s decisions. The data, information, intelligence products, and materials obtained are refined
for use in mission analysis, intelligence preparation of the battlefield and planning through functional analysis. This task requires specific and detailed information for each ASCOPE factor. This task entails obtaining detailed information and intelligence concerning the civil considerations within or affecting the expected area of interest. (FM 2-0) (USAICOE)

**Note:** This task is supported by ART 5.3.4 (Conduct Geospatial Engineering Activities), ART 2.2.5 (Conduct Police Intelligence Operations), ART 1.8 (Conduct Reconnaissance), and ART 7.5.30 (Conduct Surveillance).

**ART 2.1.4.5 COMPLETE STUDIES**

2-17. To assist in achieving goals and objectives, this task entails providing the requesting command or organization with detailed information, assessments, and conclusions about the area of operations and area of interest. A study can be a systems or functional analysis product. It should be as detailed and in-depth as time allows. Studies provide knowledge that supports understanding of the local populations; cultures and caste system; societal systems or organizations; political systems and structures; religions practiced and their impacts; moral beliefs and their impacts; civil authority considerations; military organizations, structure, and equipment; and attitudes toward United States, multinational, or host-nation forces. Studies can also include the views and attitudes of multinational and host-nation forces towards these factors. (FM 2-0) (USAICOE)

**Note:** This task can be conducted in support of ART 2.2 (Provide Support to Situational Understanding).

**ART 2.1.5 TAILOR THE INTELLIGENCE FORCE**

2-20. The generating force uses mission analysis to focus the allocation of intelligence resources for use by a joint task force or combatant commander as well as to support strategic objectives, the Army’s mission, and operations at each echelon. Based on their own mission analysis, the staffs at each echelon allocate intelligence resources obtained through the generating force to support the commander’s intent, guidance, and mission objectives. (FM 2-0) (USAICOE)

*Note:* This task supports ART 2.3.1 (Plan Requirements and Assess Collection).

- **ART 2.2.2** Perform Situation Development
- **ART 2.2.3** Provide Intelligence Support to Protection
- **ART 2.2.4** Provide Tactical Intelligence Overwatch

- **ART 2.2.5** Conduct Police Intelligence Operations
  - **ART 2.2.5.1** Collect Police Information
  - **ART 2.2.5.2** Conduct Police Information Analysis
  - **ART 2.2.5.3** Produce Police Intelligence Products
  - **ART 2.2.5.4** Disseminate Police Information and Criminal Intelligence

- **ART 2.2.6** Provide Intelligence Support to Civil Affairs Operations
2-21. Provide support to situational understanding is the task of providing information and intelligence to commanders so commanders can clearly understand the force’s current state with relation to the threat and other aspects of the area of operations. It supports the commander’s ability to make sound decisions. (FM 2-0) (USAICOE)

**ART 2.2.1 PERFORM INTELLIGENCE PREPARATION OF THE BATTLEFIELD**

2-22. The G-2 (S-2) leads the staff effort and begins preparing the intelligence preparation of the battlefield (IPB) during the generate intelligence knowledge process associated with force generation and is incorporated into the Army design methodology. During this task, the intelligence staff creates data files on specific operational environments based on an evaluation of the information and intelligence related to the operational variables—political, military, economic, social, information, infrastructure, physical environment, and time—identified. IPB is a systematic process of analyzing and visualizing the operational variables in relation to the threat, terrain, weather, and civil considerations of the mission variables in an area of interest to determine their effect on operations. By applying IPB, commanders gain the information necessary to selectively apply and maximize operational effectiveness at critical points in time and space. IPB is a continuous staff planning activity undertaken by the entire staff. The staff aims to understand an operational environment and the options it presents to friendly and threat forces. ### ART 2.2.1.1 DEFINE AN OPERATIONAL ENVIRONMENT

2-23. This task results in identifying significant characteristics of an operational environment that can affect friendly and enemy operations. Utilizing the operational variables—political, military, economic, social, information, infrastructure, physical environment, and time—assists the commander in defining relative aspects of an operational environment in time and space. The intelligence staff must identify those significant characteristics related to the mission variables of enemy, terrain, weather, and civil considerations that are relevant to the mission and justify that analysis to the commander. Understanding friendly and enemy forces is not enough; other factors, such as culture, languages, tribal affiliations, and operational and mission variables are equally important. Defining the significant characteristics of each operational variable is essential in identifying the additional information needed to complete intelligence preparation of the battlefield (IPB). (ATP 2-01.3) (USAICOE)

**Note:** The term “operational” in the title of this task does not refer to the operational level of war.

ART 2.2.2 PERFORM SITUATION DEVELOPMENT

2-27. Situation development is a process for analyzing information and producing current intelligence concerning the portions of the mission variables—mission, enemy, terrain and weather, troops and support available, time available, and civil considerations—within the area of operations before and during operations. The process helps the intelligence officer recognize and interpret indicators of threat intentions, and objectives. Situation development confirms or denies threat courses of actions (COAs), provides threat
locations, explains what the threat is doing in relation to the friendly force commander’s intent, and provides an estimate of threat combat effectiveness. The locations and actions of noncombatant elements and nongovernmental organizations in the area of operations that may impact operations should also be considered. Through situation development, the intelligence officer quickly identifies information gaps, explains threat activities in relation to the unit’s operations, and assists the commander in gaining and maintaining situational understanding. Situation development helps the commander make decisions, including when to execute branches and sequels. (FM 2-0) (USAICOE)

**ART 2.2.3 PROVIDE INTELLIGENCE SUPPORT TO PROTECTION**

2-28. This task includes providing intelligence that supports control measures the command takes to remain viable and functional by protecting itself from the effects of threat activities. It also provides intelligence that supports recovery from threat actions. This task supports the protection warfighting function and is linked to antiterrorism and homeland security. (FM 2-0) (USAICOE)

*Note:* This task branch supports ART 6.6 (Conduct Survivability Operations), ART 6.5 (Apply Antiterrorism Measures), and ART 6.5.1 (Identify Potential Terrorist Threats and Other Threat Activities).

<table>

<td>Tactical intelligence forces provided a foundation of regional and subject matter expertise.</td>
</tr>
</tbody>
</table>

ART 2.2.5 CONDUCT POLICE INTELLIGENCE OPERATIONS

2-30. Police intelligence operations (PIO) is a military police function, integrated within all military police operations, which supports the operations process and protection activities. PIO collects information using police activities for analysis, production, and dissemination to enhance situational understanding, protection, civil control, and law enforcement. Upon analysis, this information may contribute to commander’s critical information requirements, intelligence-led operations, time-sensitive operations, or policing strategies necessary to forecast, anticipate, and preempt crime or related disruptive activities to maintain order. Police intelligence results from the application of systems, technologies, and processes that analyze applicable data and information necessary for situational understanding and focusing policing activities to maintain law and order. (ATP 3-39.20) (USAMPS)

Note: PIO is not an intelligence discipline; it is a law enforcement function. However, it is within the critical intelligence task, “support situational understanding” that this function best supports the Army operations process and informs the intelligence process. PIO is essential to this task, particularly where irregular threats (criminal, terrorist, and insurgent) threaten the security of United States (U.S.) forces and military operations. This function supports and enhances the commander’s situational awareness and common operational picture through collection, analysis, and appropriate dissemination of relevant criminal information, police information, and police intelligence. PIO consists of vital tools of law enforcement and criminal investigators that distribute and focus military police and criminal investigations assets. U.S. Codes, executive orders, Department of Defense (DOD) directives, and Army regulations contain specific guidance regarding the prohibition of intelligence personnel from collecting intelligence on U.S. citizens, U.S. corporations, and resident aliens. Any access by the intelligence community to information or products due to PIO directed against U.S. citizens should undergo competent legal review.

<table>

</tbody>
</table>
ART 2.2.5.1 COLLECT POLICE INFORMATION

2-31. Collection of police information is a continuous activity. Military police identify gaps in existing police information and develop intelligence requirements. This collection can be completed through several means: military police patrols, police engagement, criminal investigations, collected evidence, database queries, and the use of reachback centers. Collection efforts also assist in enhancing protection operations and antiterrorism through identifying potential criminal threats and other threat activities. (ATP 3-39.20) (USAMPS)
ART 2.2.5.2 CONDUCT POLICE INFORMATION ANALYSIS

2-32. Conducting police information analysis is the process that organizes, analyzes, and interprets police information to police intelligence. Police information and intelligence contributes to all-source analysis and the Army operations process. It also assesses police and criminal information to identify trends and patterns of criminal activity. (ATP 3-39.20) (USAMPS)

Chapter 2

ART 2.2.5.3 PRODUCE POLICE INTELLIGENCE PRODUCTS

2-33. Police intelligence operations use the intelligence process to produce police intelligence products used by military police leaders. These products focus on police operations and contribute to the Army operations process. These products include standardized police information formatted for rapid dissemination, criminal threat assessments based on police information analysis, and assessment and analysis of police capability and capacity. (ATP 3-39.20) (USAMPS)

<table>

</tbody>
</table>

ART 2.2.5.4 DISSEMINATE POLICE INFORMATION AND CRIMINAL INTELLIGENCE

2-34. Police information and criminal intelligence is disseminated for use by law enforcement to focus policing activities. Police intelligence products are disseminated and integrated within the operations process enhancing situational understanding, mission planning, and execution at every echelon. These products may be disseminated in support of host-nation law enforcement in combating crime and neutralizing criminal threats to military operations based on trend and pattern analysis and shared with other
law enforcement agencies. When legally allowable, these products are provided to the military intelligence community for fusion and incorporation to the all-source intelligence effort, contributing to a more complete intelligence picture. (FM 3-39) (USAMPS)

Note: The dissemination of police information and criminal intelligence is included in ART 6.12 (Conduct Detention Operations), ART 6.13 (Conduct Police Operations), ART 6.13.1 (Perform Law Enforcement), ART 6.13.2 (Conduct Criminal Investigations), ART 6.13.6 (Provide Customs Support), and ART 7.3.2.3 (Perform Host-Nation Police Training and Support). Joint, interagency, and multinational coordination is included in ART 5.2.2.1 (Prepare the Command Post for Displacement). (FM 3-39 and ATP 3-39.20) (USAMPS)

2-36. Information collection is an activity that synchronizes and integrates the planning and employment of sensors and assets as well as the processing, exploitation, and dissemination systems in direct support of current and future operations. This is an integrated intelligence and operations function. For Army forces, this combined arms operation focuses on priority intelligence requirements while answering the commander’s critical information requirements (CCIRs). Through information collection, commanders and staffs continuously plan, task, and employ collection assets and forces. These forces collect, process, and disseminate timely and accurate information, combat in formation, and intelligence to satisfy CCIRs and other intelligence requirements. When necessary, information collection assets focus on special requirements, such as personnel recovery. (FM 3-55) (USACAC)

</tbody>
</table>
ART 2.3.1 PLAN REQUIREMENTS AND ASSESS COLLECTION

2-37. Plan requirements and assess collection is the task of analyzing requirements, evaluating available assets (internal and external), recommending to the operations staff taskings for information collection assets, submitting requests for information for adjacent and higher collection support, and assessing the effectiveness of the information collection plan. It is driven by the commander, coordinated by staff effort, and led by the G-2 and S-2. The continuous functions of planning requirements, identifying intelligence gaps, and assessing collection identify the best way to satisfy the requirements of the supported commander and staff. These functions are not necessarily sequential. (FM 3-55) (USACAC)

ART 2.3.1.1 DEVELOP REQUIREMENTS

2-38. The intelligence staff develops a prioritized list focusing on what information it needs to collect to produce intelligence. Additionally, the intelligence staff dynamically updates and adjusts the requirements in response to mission adjustments and changes. Each requirement is assigned a latest time information is of value to meet operational requirements. (FM 2-0) (USAICOE)

ART 2.3.1.2 DEVELOP PLANNING REQUIREMENTS TOOLS

2-39. The planning requirements tools are developed by the intelligence staff. These tools begin the process of synchronizing the information collection plan with the concept of operations and are updated as the concept of operations changes. The tools are used by the operations staff (in close collaboration with the intelligence staff) to develop the information collection plan. Developing requirements tools includes evaluating resources, developing a collection strategy, and developing supporting tools. (FM 2-0) (USAICOE)

Note: This task supports ART 2.3.2.1 (Develop the Information Collection Plan).

</tr>
</tbody>
</table>
ART 2.3.2 DIRECT INFORMATION COLLECTION

2-40. The operations staff integrates collection assets through a deliberate and coordinated effort across all warfighting functions. Tasking and directing information collection is vital to control limited collection assets. During tasking and directing information collection, the staff recommends redundancy, mixing, and cueing as appropriate. Staffs accomplish tasking information collection by issuing warning orders, fragmentary orders, and operation orders. They accomplish directing information collection assets by continuously monitoring the operation. Staffs conduct retasking to refine, update, or create new requirements. (FM 3-55) (USACAC)
ART 2.3.2.1 DEVELOP THE INFORMATION COLLECTION PLAN

2-41. The operations officer develops the information collection plan. The entire unit staff analyzes each requirement to determine how best it is to be satisfied. The staff receives information collection tasks and requests for information from subordinate and adjacent units and higher headquarters. The information collection plan includes all assets that the operations officer can task or request and coordinating mechanisms to ensure adequate coverage of the area of interest. (FM 3-55) (USACAC)

</tbody>
</table>

ART 2.3.2.2 EXECUTE, EVALUATE, AND UPDATE THE INFORMATION COLLECTION PLAN

2-42. Evaluation of reporting, production, and dissemination identifies updates for the information collection plan. As the current tactical situation changes, staffs adjust the overall information collection plan to synchronize collection tasks. This optimizes collection and exploitation capabilities. The staff constantly updates requirements to ensure that information gathering efforts synchronize with current operations and support future operations planning. As collected information answers requirements, the staff updates the information collection plan. (FM 3-55) (USACAC)
ART 2.3.3 EXECUTE COLLECTION

2-43. Executing collection focuses on requirements tied to the execution of tactical missions, such as reconnaissance, surveillance, security, and intelligence operations, based on the commander’s critical information requirements. Collection activities acquire information about the adversary and the area of operations and provide that information to intelligence processing and exploitation elements. Collection activities begin soon after receipt of mission and continue throughout preparation and execution of the operation. These activities do not cease at the end of the mission but continue as required. This allows the commander to focus combat power, execute current operations, and prepare for future operations simultaneously. (FM 3-55) (USACAC)

ART 2.3.4 CONDUCT INTELLIGENCE-RELATED MISSIONS AND OPERATIONS

2-44. The associated intelligence tasks (mission and debriefing program, intelligence coordination, technical authority, and intelligence support to personnel recovery) facilitate the conduct of reconnaissance and surveillance. These tasks also include specialized missions (such as exploitation of a sensitive site) that provide intelligence and information outside the traditional information collection construct. (FM 2-0) (USAICOE)

ART 2.3.4.1 ESTABLISH A MISSION INTELLIGENCE BRIEFING AND DEBRIEFING PROGRAM

2-45. Commanders establish, support, and allocate appropriate resources for a mission briefing and debriefing program. Conducting battle updates and after action reviews are separate tasks from the mission briefing and debriefing program. The intelligence officer develops a mission intelligence briefing plan and complementary debriefing plan to support the commander’s program. Soldiers receive a mission intelligence briefing before executing an engagement or similar operation. The briefing sensitizes Soldiers to specific information and reporting requirements, information gaps, and unique mission requirements. The mission intelligence briefings and debriefings generally follow the format of a mission briefing: review the route traveled, collection objectives of the mission, and methods employed. The debriefing program
Chapter 2

captures the specific information requirements the mission was to collect and any additional information and observations the patrol made concerning an operational environment. It also collects any fliers, pamphlets, media, or pictures the patrol found or obtained. (FM 2-0) (USAICOE)

Note: This program includes mission briefings and debriefings of Soldiers conducting engagements with host-nation personnel or other personnel of interest. When information addresses higher echelon collection requirements, debriefers draft an intelligence information report for publication.

ART 2.3.4.1.1 Establish a Mission Intelligence Briefing Plan

2-46. The intelligence section develops a mission intelligence briefing plan. The mission intelligence briefing plan identifies information Soldiers executing patrols should be seeking. It ensures that all Soldiers conducting engagements, patrols, tactical movements, and nontactical movements are sensitized to specific information and reporting requirements, information gaps, and unique mission requirements. The intelligence mission briefing and debriefing generally follow the format of a mission briefing: review the route traveled, collection objectives of the patrol, and methods employed. ART 2.3.4.1.2 Establish a Debriefing Plan

2-47. The intelligence section develops a complementary debriefing plan. The debriefing plan captures information related to the specific information requirements the patrol was to collect any additional information and observations the patrol made concerning an operational environment. It also collects any fliers, pamphlets, media, or pictures the patrol found or obtained. The plan should involve all returning patrols, leaders who traveled to meetings, returning human intelligence collection teams, aircrews, and others who may have obtained information of intelligence value. The intelligence section debriefs personnel. Debriefers then write and submit a report or report information verbally, as appropriate. The requirement for a debriefing by the intelligence section following each mission should be a part of the intelligence mission briefing. Leaders should not consider the mission complete and release the personnel until leaders complete the reporting and debriefings. (FM 2-0) (USAICOE)

ART 2.3.4.2 Conduct Intelligence Coordination

2-48. Conduct intelligence coordination is the task carried out by the intelligence section to facilitate active collaboration, laterally and vertically. It includes establishing and maintaining technical channels to refine and focus the intelligence disciplines in information collection tasks. It also properly coordinates the discipline assets when operating in another unit’s area of operations. (FM 2-0) (USAICOE)

<table>

</tbody>
</table>
ART 2.3.4.2.1 Establish and Maintain Technical Authority and Channels

2-49. Intelligence commanders and intelligence staffs maintain control of each intelligence discipline during operations through technical channels to ensure adherence to applicable laws and policies, ensure proper use of doctrinal techniques, and provide technical support and guidance. Applicable laws and policies include all relevant United States laws, the law of war, international laws, Department of Defense directives, Department of Defense instructions, and orders. Commanders direct operations but often rely on the intelligence section’s technical expertise to conduct portions of the unit’s collection effort. Technical channels also involve translating information collection tasks into the specific parameters used to focus highly technical or legally sensitive aspects of the information collection effort. Technical channels include—but are not limited to—defining, managing, or guiding the use of specific information collection assets; identifying critical technical collection criteria such as technical indicators; recommending collection techniques, procedures, or assets; coordinating operations; and directing specialized training for specific military intelligence personnel or units. (FM 2-0) (USAICOE)

Note: In specific cases, regulatory authority is granted to specific national and Department of Defense intelligence collection organizations for specific intelligence discipline collection and is passed through technical channels.

ART 2.3.4.2.2 Conduct Deconfliction and Coordination

2-50. Conduct deconfliction and coordination consists of a series of related activities that facilitate operations in another unit’s area of operations (AO). These activities facilitate successful information collection, support of the operation, and fratricide avoidance. Military intelligence organizations may be used in general support for coverage of an AO or in direct support to a specific unit. Military intelligence organizations operating in general support should coordinate with unit commanders when operating in that unit’s AO. At a minimum, the military intelligence organizations announce their presence and request information on any conditions or ongoing situations that may affect how they conduct their mission—organizations should conduct thorough face-to-face coordination. A military intelligence organization operating in direct support of a specific unit coordinates with the unit for augmentation to conduct operations in accordance with force protection requirements. The military intelligence organization’s leader also coordinates with the supported unit’s intelligence section for debriefings of returning members, convoy leaders, and others. (FM 2-0) (USAICOE)

**ART 2.3.4.5.2 Conduct Support to Personnel Recovery Planning and Execution**

2-58. To accomplish the mission, the commander and staff ensure resources are available to collect, analyze, and produce intelligence for the planning and execution of personnel recovery operations. The personnel recovery (PR) intelligence support team immediately identifies the appropriate assets to best satisfy the commander’s critical information requirements for PR from the available resources. To accomplish this, the team is familiar with every sensor’s capabilities and limitations so they can adjust sensor taskings to ensure the optimal resource usage in real time. Information collection support starts with receiving and analyzing information from the unit reporting the isolated, missing, detained, or captured (IMDC) personnel. Then the effort focuses on receiving, processing, fusing, and analyzing information originating from organic collectors and theater, joint, and national agencies and organizations. It is critical that coordination with higher headquarters is established to assist in PR operations. (FM 3-50) (USACAC)

SECTION IV – ART 2.4: PROVIDE INTELLIGENCE SUPPORT TO TARGETING AND INFORMATION-RELATED CAPABILITIES

2-59. Provide intelligence support to targeting and information-related capabilities is the task of providing the commander information and intelligence support for targeting through lethal and nonlethal actions. It includes intelligence support to the planning, preparation, execution, and assessment of direct and indirect fires, information operations, cyber electromagnetic activities, cybersecurity, operations security, and military deception, as well as assessing the effects of those operations. (FM 2-0) (USAICOE)

Note: This task branch supports both direct (ART 1.4 [Conduct Direct Fires]) and indirect (ART 3.3 [Integrate Air-Ground Operations]) delivery of fires. This task is also linked with ART 5.1.4.3 (Provide Combat Assessment), ART 5.12 (Synchronize Information-Related Capabilities), and ART 5.12.1 (Integrate Information-Related Capabilities).
ART 2.4.1 PROVIDE INTELLIGENCE SUPPORT TO TARGETING

2-60. The intelligence officer (supported by the entire staff) provides the fire support coordinator, information operations officer, and electronic warfare officer, and other staff officers with information and intelligence for targeting the threat’s forces and systems with direct and indirect fires to create lethal and nonlethal effects. The information and intelligence includes identification of threat capabilities and limitations. The targeting process uses the decide, detect, deliver, and assess methodology. The intelligence officer supports targeting by providing accurate, current intelligence and information to the staff and ensuring the information collection plan supports the finalized targeting plan. (FM 2-0) (USAICOE)

**Note:** This task branch supports ART 3.1.3 (Detect Surface Targets) and is a byproduct of decide, detect, deliver, and assess.

</table>

ART 2.4.1.2 PROVIDE INTELLIGENCE SUPPORT TO TARGET DETECTION

2-62. The intelligence officer establishes procedures for dissemination of targeting information. The targeting team develops the sensor and attack guidance matrix to determine the sensors required to detect and locate targets. The intelligence officer places these requirements into the information collection synchronization tools for later incorporation into the information collection plan. (FM 2-0) (USAICOE)

ART 2.4.2 PROVIDE INTELLIGENCE SUPPORT TO INFORMATION-RELATED CAPABILITIES

2-63. Intelligence support to information-related capabilities includes intelligence support to the planning, preparation, and execution of information operations, cybersecurity, operations security, and military deception, as well as assessing the effects of those operations. Key activities reflected in this task include communications, planning, synchronization, and integration of intelligence into plans and orders. (FM 2-0) (USAICOE)

Note: This task branch only addresses those intelligence tasks that support the conduct of Army information tasks. The actual conduct of information operations, cyber electromagnetic activities, cybersecurity, and other information-related activities are tasks addressed elsewhere:

- ART 5.9 (Conduct Cyber Electromagnetic Activities) is the other activity related to Army information tasks.
- ART 5.10.2 (Perform Department of Defense Information Network Operations) addresses the conduct of passive measures that protect information and systems.
- This task supports ART 5.12.2.3 (Conduct Information Operations Intelligence Support).

### ART 2.4.2.2 Provide Intelligence Support to Military Information Support Operations

2-65. Military information support operations (MISO) requires information and intelligence to support analysis of foreign target audiences and their environment to include the following factors: political, military, economic, social, information, infrastructure, physical environment, and time. Continuous and timely intelligence is required to assess target audience behavioral trends. Information and intelligence focus on target audience motivation and behavior; indicators of success or lack of success (measure of effectiveness); and the target audience’s reaction to friendly, hostile, and neutral forces actions. (FM 2-0) (USAICOE)

<table>

### ART 2.4.2.3 Provide Intelligence Support to Cyber Electromagnetic Activities

2-66. Military intelligence organizations provide information to identify threat decision making and command and control nodes, processes, and means in order of criticality. Intelligence also helps identify threat systems, activities, and procedures that may be vulnerable. Intelligence support to cyber electromagnetic activities increases its capability and leverage to seize, retain, and exploit an advantage over adversaries and enemies in both cyberspace and the electromagnetic spectrum. (FM 2-0) (USAICOE)
## Chapter 2

### ART 2.4.2.4 Provide Intelligence Support to Cybersecurity

2-67. Military intelligence organizations provide information to identify threat capabilities, activities, and tactics, techniques, and procedures. Intelligence provides information relating to cybersecurity, physical security, operations security, counterdeception, and counterpropaganda. (FM 2-0) (USAICOE)

ART 2.4.3 PROVIDE INTELLIGENCE SUPPORT TO COMBAT ASSESSMENT

2-70. Intelligence supports the assessment activity of the operations process and targeting processes. The commander uses combat assessment to determine if targeting actions have met the attack guidance and if reattack is necessary to perform essential fires tasks and achieve the commander’s intent for fires. The staff determines how combat assessment relates to specific targets by completing battle damage, physical damage, functional damage, and target system assessments. (FM 2-0) (USAICOE)

*Note:* This task branch supports ART 5.1.4 (Assess Tactical Situations and Operations), ART 5.1.4.3 (Provide Combat Assessment), and ART 5.1.4.3.1 (Perform Battle Damage Assessment). It is also associated with decide, detect, deliver, and assess.

ART 2.4.3.2 CONDUCT FUNCTIONAL DAMAGE ASSESSMENT

2-72. The staff conducts the functional damage assessment for the threat’s remaining functional or operational capabilities. The assessment focuses on measurable effects. It estimates the threat’s ability to reorganize or find alternative means to continue operations. The targeting working group and staff integrate analysis with external sources to determine if the commander’s intent for fires has been met. (FM 2-0) (USAICOE)

Chapter 3

ART 3.0: The Fires Warfighting Function

The fires warfighting function is the related tasks and systems that provide collective and coordinated use of Army indirect fires, air and missile defense, and joint fires through the targeting process (ADRP 3-0). It includes planning for targeting; providing fire support; countering air, ballistic missile, cruise missile, rocket, artillery, mortars, and unmanned aircraft systems threats; and integrating joint and multinational fires. Fires organizations require deliberate and dynamic targeting to achieve lethal and nonlethal effects against ground and aerial targets. (ADP 3-09) (USAFCOE)

Note: ART 5.1.1.6 (Conduct Fires Planning) addresses planning for fires conducted during the operations process. ART 5.1.4.3 (Provide Combat Assessment) addresses combat assessment (battle damage assessments, munitions effectiveness assessments, and reattack recommendations).

SECTION I – ART 3.1: INTEGRATE FIRES

3-1. Commanders integrate fires and maneuver through the operations process. Fire support personnel from platoon through theater army assist the commander by integrating and synchronizing related tasks and systems. These tasks and systems provide collective and coordinated use of Army indirect fires and joint fires with the effects of other warfighting functions. These are integrated into the concept of operations during planning and adjusted based on the targeting guidance. (FM 3-09) (USAFCOE)

Note: ART 5.1.1.6 (Conduct Fires Planning) addresses planning for fires conducted during the operations process.
ART 3.1.1 CONDUCT TARGETING

3-2. Units conduct targeting through the targeting working group in locating, identifying, classifying, tracking, and attacking targets and assessing battle damage. They apply the parameters set at the operational level, directed limitations, rules of engagement, rules for the use of force, the law of war, and other guidance given by the commander to the targeting process to attain the commander’s objectives. Units synchronize the development of target matrices, target selection, and target list. ART 3.1.1 includes coordinating the delivery and assessment of the fires order in support of the commander’s intent. (FM 3-09) (USAFCOE)

</tr>
</tbody>
</table>

ART 3.1.2 DECIDE SURFACE TARGETS

3-3. Units determine the targets that, if successfully attacked, will contribute to the success of the mission based on the commander’s concept of operations and targeting guidance. Units recommend how each target should be engaged in terms of the degree and duration based on commander’s intent. They construct a high-payoff target list of prioritized targets and determine target selection standards. Units prepare the attack guidance matrix for the commander’s approval. They prepare a targeting synchronization matrix that includes prioritized high-payoff targets; information collection assets; target acquisition assets tasked to acquire them; attack resources tasked to attack them; desired effects, associated measures of performance, and associated measures of effectiveness for assessment; and assets tasked to conduct assessment. Units brief the targeting process products to the commander and translate the commander’s decisions into the operation order with annexes. (ATP 3-60) (USAFCOE)

</table>
ART 3.0: The Fires Warfighting Function

ART 3.1.3 DETECT SURFACE TARGETS

3-4. Units detect high-payoff targets identified in the “Decide” function of the targeting process. Detect includes determining (by direction, reference point, or grid) where a potential target is located. Planned targets engaged with precision munitions (coordinate seeking) create better effects when employed using coordinates through a refined or a mensurated grid. (FM 3-09) (USAFCOE)

Note: Contributions made by the intelligence warfighting function toward this task can be found in ART 2.4.1 (Provide Intelligence Support to Targeting).

ART 3.0.1.3 CONDUCT SUPPRESSION OF ENEMY AIR DEFENSES

3-14. Units neutralize, destroy, or temporarily degrade surface-based adversary tactical air defenses by destructive and disruptive means to increase aircraft survivability. Suppression of enemy air defenses (SEAD) seeks the destruction, neutralization, or degradation of surface-based enemy tactical air defenses, such as target systems or operating personnel, by destructive and/or disruptive means. Examples of destructive SEAD capabilities are bombs, air- and surface-to-surface missiles, air-scatterable mines, and field artillery. Nondestructive SEAD seeks to temporarily deny, degrade, deceive, delay, or neutralize
surface-based enemy tactical air defense systems by disruptive means to increase aircraft survivability. (FM 3-09) (USAFCOE)

\textbf{Note:} Disruptive means include activities discussed in ART 5.9.2.1 (Conduct Electronic Attack).

ART 3.2.1.5 PROVIDE ILLUMINATION

3-16. Units provide illumination fires (visible or infrared) to expose an adversary or enemy at night. Illumination fires may give friendly forces an asymmetric advantage by reducing the enemy forces’ ability to operate at night without being targeted and attacked with minimal collateral damage. Infrared illumination enhances the Soldier’s use of some night vision devices to more easily locate targets and enable surprise fires on enemy forces not equipped with night vision devices. (FM 3-09) (USAFCOE)

SECTION III – ART 3.3: INTEGRATE AIR-GROUND OPERATIONS

3-21. Integrating air-ground operations requires continuous coordination between the air and land commanders. It requires interfacing with the appropriate joint air operations center or combined air operations center to exchange current intelligence and operational data, support requirements, and coordinate Army forces’ requirements for airspace coordinating measures, fire support coordination measures, and theater airlift. (ATP 3-09.13) (USAFCOE)

ART 3.4.2.4 EMPLOY COMBINED ARMS FOR AIR DEFENSE

3-35. Units use weapon systems other than dedicated ground-based air defense systems—such as small arms, tank cannons, and antiarmor missiles—to destroy aerial targets. (FM 3-01) (USAADASCH)
ART 3.4.2.5 EMPLOY AIR-TO-AIR WEAPONS

3-36. Units use weapon systems carried on aircraft to destroy aerial targets. Army aircraft normally employ air-to-air weapons in self-defense. (FM 3-04.126) (USAAWC)
ART 3.4.3 DENY ENEMY USE OF AIRSPACE

3-37. Units take passive air defense measures to prevent aircraft from effectively engaging the unit. Passive air defense measures, when the unit is not in the path or target of the enemy aircraft, include moving to cover and concealment and preparing to engage the attacking or any follow-on aircraft. (FM 3-01) (USAADASCH)

Note: ART 3.4.2.4 (Employ Combined Arms for Air Defense) addresses active self-defense measures taken against aerial attack by combined arms units.

ART 3.4.6 CONDUCT ROCKET, ARTILLERY, AND MORTAR DEFENSE

3-40. Units defend an assigned asset, friendly forces, and infrastructure against rocket, artillery, and mortar (RAM) attack. Units conduct RAM defense to negate RAM attacks. RAM defenses are designed to destroy attacking enemy RAM or to nullify or reduce the effectiveness of such attack. Units destroy hostile RAM targets per rules of engagement. Units minimize collateral damage and reduce probability of casualties within adjacent populated areas. This task includes detection, discrimination, and tracking of inflight RAM to support cueing and handoff of targets for engagements. Units provide RAM attack warning support to the Soldier using available sensors. (ATP 3-01.60) (USAADASCH)

ART 4.0: The Sustainment Warfighting Function

The sustainment warfighting function is the related tasks and systems that provide support and services to ensure freedom of action, extend operational reach, and prolong endurance. The endurance of Army forces is primarily a function of their sustainment. Sustainment determines the depth and duration of Army operations. It is essential to retaining and exploiting the initiative. Sustainment is the provision of the logistics, personnel services, and health service support necessary to maintain operations until mission accomplishment. (ADRP 3-0) (USACAC)

Note: This task and many of its subordinate tasks encompass environmental considerations.
4.1. Logistics is the science of planning, preparing, executing, and assessing the movement and maintenance of forces. In its broadest sense, logistics includes the design, development, acquisition, fielding, and maintenance of equipment and systems. Logistics integrates strategic, operational, and tactical support efforts within the joint operations area and schedules the mobilization and deployment of forces and materiel. (ADP 4-0) (CASCOM)
ART 4.0: The Sustainment Warfighting Function

ART 4.1.1 PROVIDE FIELD MAINTENANCE SUPPORT

4-2. Maintenance support is provided to generate and regenerate combat power and to preserve the capital investment of weapons systems and equipment to enable mission accomplishment. It is designed to be fast, agile, and responsive to the needs of the warfighter as far forward as possible. It focuses on the expeditious return of nonmission capable equipment through performance observation equipment services as well as fault diagnosis and repair to a single repair standard. (ATP 4-33) (CASCOM)

ART 4.1.1.1 PERFORM PREVENTIVE MAINTENANCE CHECKS AND SERVICES

4-3. ART 4.1.1.1 is the foundation of the Army Maintenance Program and where the maintenance process begins. Operators and crews assigned to a specific system perform this task. They train to accurately follow the steps in the preventive maintenance checks and services (PMCS) table from the appropriate operator technical manual for that designated system or piece of equipment. The associated tasks normally consist of inspecting, adjusting, servicing, lubricating, and replacing minor components and assemblies as authorized in the maintenance allocation chart. (ATP 4-33) (CASCOM)

ART 4.1.1.2 PERFORM SCHEDULED EQUIPMENT SERVICES

4-4. Units perform specified maintenance actions according to a schedule where they routinely check, adjust, change, analyze, and lubricate equipment, components, and systems in accordance with design specifications. Maintenance personnel should use services to replace faulty items or avoid projected component failures based on reliability analysis and engineering documentation and maintenance histories. A qualified maintainer generally performs this task with the assistance of the system operator. (ATP 4-33) (CASCOM)

ART 4.1.1.3 CONDUCT RECOVERY OPERATIONS

4-5. Recovery is actions taken to extricate damaged or disabled equipment for return to friendly control or repair at another location. Recovery prevents enemy capture of friendly equipment and allows for the use of enemy equipment for friendly forces. Units use self-recovery as the first recovery method attempted when a vehicle has become stuck or immobilized. This can be accomplished by performing battle damage assessment and repair (known as BDAR) or using self-recovery aids such as a vehicle winch or self-recovery guide located in most system technical manuals. Like-vehicle recovery uses a similar or larger vehicle to free a stuck or immobile vehicle with the aid of an authorized vehicle tow bar, cable, strap, sling sets. Helicopter units use like-vehicle recovery with a sling or internal load with other airframes. Dedicated recovery operations occur when self- or like-vehicle recovery has failed or when systems have been catastrophically damaged. This process is performed by recovery operators using dedicated recovery vehicles and assets. Dedicated recovery should be a last resort. (ATP 4-33) (CASCOM)

ART 4.1.1.3.1 Perform Battle Damage Assessment and Repair

4-6. Battle damage assessment and repair (BDAR) is the procedure used to rapidly return disabled equipment to operations using field expedient repair methods. Its use is intended to restore the minimum essential combat capabilities necessary to support a specific combat mission or to enable self-recovery of a system. Units perform BDAR using the BDAR kit to bypass components or safety devices, fabricate temporary repair parts, or implement a temporary repair using substitute fluids, materials, or components. ART 4.1.1.5 Substitute Parts (Controlled Exchange)

4-9. This task involves the removal of serviceable components from unserviceable but economically repairable equipment for immediate reuse in restoring another like item of equipment to combat serviceable condition. Units used the unserviceable component to replace the serviceable component or retained the unserviceable component with the end item that provided the serviceable component. (ATP 4-33) (CASCOM)
ART 4.1.1.6 REPAIR EQUIPMENT (UNSCHEDULED MAINTENANCE)

4-10. To repair equipment involves operators and maintenance personnel restoring equipment to full capability as originally designed or engineered by the manufacturer. A single repair standard is applied to all end items, secondary items, and components repaired and returned to supply. This process ensures high quality and establishes a predictable service life by repairing items to a specific technical standard. (ATP 4-33) (CASCOM)

ART 4.1.1.7 CONDUCT REPAIR PARTS SUPPLY OPERATIONS

4-11. Repair parts supply is a crucial part of all maintenance operations. Maintenance organizations require repair parts as well as tools and test equipment to accomplish field maintenance missions. Without the proper parts, an item can remain nonmission capable for an extended period. AR 710-2 provides Army policy governing supply operations. (ATP 4-33) (CASCOM)

ART 4.1.1.8 PROVIDE MAINTENANCE MANAGEMENT

4-12. The modern battlefield demands maintenance systems to be responsive and able to return systems to operational status quickly and as near as possible to the point of failure or damage. This requires maintenance managers to closely coordinate and collaborate at all levels. Effective maintenance managers quickly identify requirements and available resources. The many aspects of effective maintenance management include forecasting, scheduling, controlling production, providing quality assurance, providing technical assistance, resourcing repair parts, work-loading, cross-leveling workloads, and developing processes to meet the commander’s requirements. Effective maintenance management delicately balances between the overall maintenance mission that supports battlefield operations and the workflow process that returns systems to users in the least amount of time possible while maintaining a single standard or quality. ART 4.1.2 PROVIDE TRANSPORTATION SUPPORT

4-13. Units move material or personnel by towing, self-propulsion, or any carrier means including railways, ground supply routes, waterways, joint logistics over-the-shore, and air. ART 4.1.2 includes technical operations and moving, evacuating, and transferring cargo, personnel, and equipment between transportation modes. This task includes environmental, security, and storage considerations embedded due to issues surrounding shipment of petroleum, oils, controlled pharmaceuticals, temperature sensitive medical products, and lubricants as well as potentially hazardous materials or other items to be transported. ART 4.1.2.1.3 Conduct Support to Movement

4-17. Units control movement with a distribution network design that addresses the use of main supply routes (names, direction of travel, size, and weight restrictions), checkpoints, rest and refuel areas, traffic control points, highway regulation points, and mobile patrols. A distribution network design reflects any critical points and restrictive route features, such as direction of travel or size and weight restrictions. ART 4.1.2.1.3 includes providing route signs and installing radio frequency interrogators at critical points to capture radio frequency tag data and report the data to in-transit visibility servers. **ART 4.1.2.3.3 Move by Water**

4-26. Units provide for the movement of unit personnel, equipment, and sustinment cargo through and between Army water terminals. Water transport operations are conducted at established ocean and river ports, beach sites, and inland waterways. They are an integral part of inland waterway and shore-to-shore operations. Tasks include offshore ship discharge, inland waterway, and shore-to-shore operations for logistic purposes including logistics over-the-shore. (ATP 4-16) (CASCOM)

*Note:* Amphibious operations as a task are addressed in ART 1.2.1.1.3 (Conduct an Amphibious Assault).

**ART 4.1.2.4 INTEGRATE HOST-NATION RAIL**

4-27. Units plan, advise, and conduct capability assessments of host-nation (HN) rail capability. Units serve as the liaison among the host nation and theater commanders, corps commanders, and the theater sustainment command or expeditionary sustainment command. Units advise HN railway personnel on required improvements and repairs to their rail infrastructure. This includes advising on the inspection of railway bridges, tunnels, and rail yards. Units perform contracting officer representative functions associated with contracted rail assets, as required. (ATP 4-14) (CASCOM)

**ART 4.1.4.3 PROVIDE BASE CAMP SUSTAINMENT**

4-64. Units provide base camp sustainment facilities and services to Soldiers and other authorized personnel. Provision of this support to authorized individuals and units occurs regardless of their physical location within or external to a base, facility, installation, camp, or station. ART 4.1.4.3 includes the provision of clothing and textile repair support, hygiene services (shower, laundry, and latrine support), nutrition support, and general purpose shelters and systems. Environmental considerations for a base camp are significant and similar to those for an installation. (FM 4-40) (CASCOM)

**Notes:**
- ART 4.1.3.11.1 (Purify Water) addresses water purification support.
- ART 4.1.7 (Provide General Engineering Support) addresses construction, repairing, maintenance, and operations of permanent and semipermanent water facilities, such as the drilling of water wells.
- ART 4.1.7.1.2 (Provide Facilities Engineer Support) addresses waste management; the acquisition, management, and disposal of real estate; firefighting support; and the construction, management, and maintenance of bases and installations.

05  | Percent | Of planned base camp sustainment capacity reached in AO.                |
06  | Percent | Of operations degraded, delayed, or modified due to lack of adequate base camp sustainment. |
07  | Percent | Of base camp sustainment requirements that can be performed by the host nation, a third nation, or contractors. |
08  | Number  | And types of base camp sustainment facilities available in AO.          |

**ART 4.1.4.3.1 Provide Clothing and Textile Repair Support**

4-65. Units provide clean, serviceable clothing; restore clothing or light textiles; and provide clothing exchange. ART 4.1.4.3.1 includes collecting repairable clothing and textiles. (TM 4-42.21) (CASCOM)

No. | Scale | Measure                                                                 |
---|-------|-------------------------------------------------------------------------|
01  | Yes/No| Procedures to provide clothing and textile repair services did not negatively affect supported unit’s ability to accomplish its missions. |
02  | Time  | To refine field services program for the area of operations (AO) after receipt of warning order. |
03  | Time  | To coordinate clothing and textile repair operations in AO.              |
04  | Time  | To repair clothing and textiles in AO, on average.                      |
05  | Percent| Of difference between projected and actual sustainment field service requirements in AO. |
06  | Percent| Of planned capacity of field service clothing and textile repair performed in AO. |
07  | Percent| Of required production rate of clothing and textile repair reached in AO. |
08  | Percent| Of required production rate of clothing and textile repair that can be provided by host-nation or contract sources. |
09  | Number| Of clothing and textile repair units in AO.                             |
10  | Number| Of items per month of clothing and textile repaired in AO facilities.   |
11  | Number| Of tons per month of clothing and textiles out of service for renovation or repair. |
12  | Number| Of items by type identified as nonrepairable due to exceeding authorized repair times. |
13  | Number| Of tons per month of clothing and textiles out of service for renovation or repair. |

**ART 4.1.4.3.2 Provide Hygiene Support**

4-66. Units provide hygiene services—showers, laundries, and latrines. ART 4.1.4.3.2 includes obtaining the fresh water and cleaning materials necessary to provide these services. It includes preparing the shelters and drainage necessary to perform these services in addition to operating shower and delousing units, laundering clothing, and re-impregnating clothing. This task includes environmental considerations involving force health protection service and engineering support. (ATP 4-42) (CASCOM)

**Notes:** ART 4.1.3.1 (Provide Subsistence [Class I]) addresses the provision of health and comfort packages. ART 4.1.3.6 (Provide Personal Demand Items [Class VI]) also addresses the provision of health and comfort packages containing personnel care items, such as disposable razors and sanitary napkins, necessary for personal hygiene when Army and Air Force Exchange Service tactical field exchanges are not operational.

- ART 4.1.3.11.1 (Purify Water) addresses water purification support.
- ART 4.1.7 (Provide General Engineering Support) addresses construction, repairing, maintenance, and operations of permanent and semipermanent water facilities, such as the drilling of water wells.
- ART 4.1.7.1.3 (Provide Waste Management) addresses waste management, to include wastewater collection and treatment and refuse collection and disposal.

ART 4.1.4.3.3 Provide Nutritional Support

4-67. Units provide nutritional support to Soldiers at all echelons. ART 4.1.4.3.3 includes obtaining, preparing, and serving prepared rations; performing in-field kitchen sanitation; operating field kitchens, installation dining facilities, and hospital dining facilities; and preparing products for shipment. This task also includes providing bakery products and nutritional care. (ATTP 4-41) (CASCOM)

ART 4.1.5 PROVIDE OPERATIONAL CONTRACT SUPPORT

4-70. Units provide operational contract support to obtain supplies, services, and minor construction in support of military operations. Operational contract support provides an additional, responsive support force capability to accomplish a mission and support operations. (ATTP 4-10) (CASCOM)

ART 4.1.5.1 REQUEST CONTRACTED SUPPORT

4-71. Units plan and synchronize the provision of operational contract support to Army forces in a designated operational area. This requiring activity task does not include actual contracting operations or authority. (ATTP 4-10) (CASCOM)

<table>

</tbody>
</table>

ART 4.1.5.2 PROVIDE CONTRACTING SUPPORT

4-72. Providing contracting support is an acquisition function to legally obtain goods, services, and minor construction from commercial sources in support of military operations. This task encompasses all activities from operational contract planning assistance through contract or task order closeout. This task does not include the nonacquisition functions of requirements development, prioritization, and budgeting processes. (ATTP 4-10) (CASCOM)

<table>

</table>
ART 4.1.6 PROVIDE DISTRIBUTION

4-73. Distribution is the operational process of synchronizing all elements of the logistic system to deliver the “right things” to the “right place” at the “right time” to support the geographic combatant commander. (JP 4-0) (JS)

ART 4.1.6.1 CONDUCT DISTRIBUTION MANAGEMENT

4-74. Distribution management is the function of synchronizing and coordinating a complex of networks (physical, communications, information, and resources), sustainment functions (logistics, personnel services, and health service support), and functional components to achieve responsive support to operation requirements. (ATP 4-0.1) (CASCOM)
## ART 4.0: The Sustainment Warfighting Function

### ART 4.1.6.2 PROVIDE IN-TRANSIT VISIBILITY OR ASSET VISIBILITY

4-75. Units provide in-transit visibility by continuously updating the location of units, equipment, personnel, and supplies as they travel throughout the transportation and distribution system. Units provide commanders with critical information and allow for shipment diversion based on changing battlefield priorities. (FM 4-01) (CASCOM)

ART 4.1.7 PROVIDE GENERAL ENGINEERING SUPPORT

4-82. General engineering is those engineering capabilities and activities, other than combat engineering, that modify, maintain, or protect the physical environment (JP 3-34). Tasks most frequently performed under general engineering conditions include the construction, repair, maintenance, and operation of infrastructure, facilities, lines of communications, and bases; protection of natural and cultural resources; modification and repair of terrain; selected explosive hazards activities; and environmental activities. (FM 3-34) (USAES)

ART 4.1.7.1 DEVELOP INFRASTRUCTURE

4-83. The improvement of civil conditions is vital to stability and defense support of civil authorities operations. ART 4.1.7.1 consists primarily of building, repairing, and maintaining various infrastructure facilities, providing essential services, and improving host-nation capabilities to perform such tasks. This ART primarily supports the commander in improving conditions of the host-nation population and influencing the host-nation population to support military objectives. This ART influences the host-nation population to sustain support to United States forces. Included in infrastructure development is the engineer’s role in the host-nation population (see FM 3-07). Tasks to improve host-nation infrastructure requires coordination with local or national-level government agencies or ministries that maintain or control infrastructure. (FM 3-34) (USAES)
## ART 4.0: The Sustainment Warfighting Function

### ART 4.1.7.1.1 Restore Damaged Areas

This ART covers how units inspect and repair surface and underwater facilities or restore terrain damaged by combat (such as clear rubble and restore electrical power), natural disaster, environmental accidents, or other causes. (FM 3-34) (USAES)

ART 4.1.7.2.1 Construct Roads and Highways

4-89. This ART covers how units determine road network requirements, such as classifying roads in the area of operations (AO) per location, trafficability, and degree of permanence, traffic-bearing capabilities, and improvements needed. Units maintain and repair existing roads (such as inspect and supervise, stockpile materials, keep road surfaces in usable and safe condition, prompt repair, correct basic cause of surface failure, and perform maintenance inspections) and construct new roads (such as route reconnaissance, site selection, surveys, drainage, construction, paving, and soil stabilization). (ATP 3-34.40) (USAES)

Note: For construction of combat roads and trails to support maneuver of tactical forces, see ART 1.6.2.1 (Construct Combat Roads and Trails).

ART 4.1.7.2.2 Construct Over-the-Shore Facilities

4-90. This ART covers how units provide construction, repair, and maintenance support to logistics over-the-shore operations. Units construct piers and causeways as well as access and egress routes. Units prepare and stabilize beaches. They provide access to marshaling and storage areas and adjoining logistics over-the-shore sites, which may also need constructing. Units provide road and rail links to existing lines of communications. They construct utility systems and petroleum, oils, and lubricants storage and distribution systems. (ATP 3-34.40) (USAES)

ART 4.1.7.3 PROVIDE TECHNICAL ENGINEERING SUPPORT

4-97. This ART covers how units provide technical support to engineering services in the area of operations (AO). ART 4.1.7.3 includes quality assurance and control inspections, materials testing, and geodetic and construction surveying. Technical engineering provides oversight to the regulatory construction, safety, and environmental standards. Quality control for construction projects and facilities upgrades includes planning, designing, and monitoring the construction process to achieve a desired end state. This ART also includes acquiring, maintaining, and disposing of real property. (TM 3-34.42) (USAES)

### ART 4.1.7.3.2 Perform Quality Assurance and Surveillance Operations

4-99. The government performs quality assurance and surveillance operations to determine that engineer-related contract requirements and specifications are met. Quality assurance and surveillance operations ensure products meet quality and safety standards before acceptance from contractors, during transfer between government agencies, or when issued to users. Quality assurance and surveillance operations ensure that materials meet the critical construction tolerances and standards. (TM 3-34.42) (USAES)
Note: Quality assurance and surveillance operations include planning, designing, and monitoring the construction process to achieve a desired end state.

ART 4.2.2.4 PROVIDE ACCOUNTING SUPPORT AND COST MANAGEMENT

4-127. The Army relies on the financial management community to ensure fiscal stewardship of the public funds entrusted to accomplish its missions. Financial managers provide expert fiscal analysis based on accurate financial data. Accounting is the act of receiving, controlling, validating, recording, classifying, and summarizing transactions in terms of money; analyzing and interpreting those transactions; and reporting the operating results and related resource management information to higher headquarters. The cost management process is the accurate measurement and thorough understanding of the full cost of an activity’s processes, products, and services that support leaders’ decision making and fiscal stewardship thereby maximizing the effectiveness and efficiency of the activity’s operations. ART 4.2.4 PROVIDE RELIGIOUS SUPPORT

4-139. Religious support undergirds and fortifies the Warrior Ethos, especially in operations overseas. Religious support provides for the religious, ethical, and moral needs of the Soldiers, family members, and authorized civilians (to include contractors deploying with the force) at all levels. Religious support includes advising the commander on the impact of religion within the unit (internal) and the impact of religion on the unit’s mission throughout its area of operations (external). (FM 1-05) (USACHCS)
### Art. 4.2.4.1 Provide Religious Services

4-140. Units provide or perform collective and denominational religious worship services and religious coverage. Units provide religious support for memorial ceremonies, memorial services, and funerals. Units provide for sacraments, rites, and ordinances per the tenets of the denomination or faith group. Chaplains support the commander’s responsibility to provide for the free exercise of religion. (FM 1-05) (USACHCS)

### Art. 4.2.4.2 Provide Religious Care and Counseling

4-141. Unit ministry teams (UMTs) or chaplain sections provide religious care and counseling to Soldiers, family members, and authorized Department of the Army Civilians (to include contractors deploying with the force) with religious comfort, moral support, crisis intervention, and encouragement. The UMT or chaplain section assists the command through prevention, intervention, mitigation, and normalization of crisis events. It integrates all crisis-helping agencies to support the needs of the commander. UMT or chaplain section responds to crises operating across the range of military operations from homeland security to humanitarian and civic assistance. (FM 1-05) (USACHCS)

ART 4.2.4.4 Plan Religious Support

4-143. The unit ministry team or chaplain section plans religious support by actively participating in the operations process to effectively deliver religious support to Soldiers, families, and authorized civilians. The chaplain is responsible for planning religious support operations within the command that support the operational mission and coordinating the support necessary for mission success across the range of military operations. (FM 1-05) (USACHCS)
### ART 4.2.4.5 PROVIDE RELIGIOUS EDUCATION

4-144. The unit ministry team or chaplain section provides, performs, and integrates religious education and faith sustaining activities to meet the military religious support needs of Soldiers. The unit ministry team or chaplain section enables religious education and religious formation through classes, studies, groups, meetings, and discussion groups and by providing religious educational material and curriculum. (FM 1-05) (USACHCS)

    Provide Medical Equipment Maintenance and Repair
  - ART 4.3.4.2
    Provide Optical Fabrication
  - ART 4.3.4.3
    Supply Blood and Blood Products

---

4-147. The Army Health System is a component of the Military Health System responsible for operational management of the health service support and force health protection missions. The Army Health System includes all mission support services performed, provided, and arranged by the Army Medical Department to support health service support and force health protection mission requirements for the Army. The health service support mission promotes, improves, conserves, or restores the mental and physical wellbeing of Soldiers and, as directed, other personnel and consists of three elements: casualty care, medical evacuation, and medical logistics. Casualty care encompasses the treatment aspects of organic and area medical support; hospitalization (to include treatment of chemical, biological, radiological, and nuclear patients); dental treatment; behavioral health and neuropsychiatric treatment; clinical laboratory services; medical evacuation (to include en route care and medical regulating); and medical logistics (to include blood and blood products). (FM 4-02) (USAMEDDC&S)
Note: Health service support relates closely to force health protection. The health service support mission is part of the sustainment warfighting function while force health protection is addressed as part of the protection warfighting function under ART 6.7 (Provide Force Health Protection).

ART 4.3.1 PROVIDE COMBAT CASUALTY CARE

4-148. Casualty care encompasses a number of Army Medical Department functions. It groups organic and area medical support, hospitalization, the treatment aspects of dental care, clinical laboratory services, and behavioral health and neuropsychiatry, and the treatment of chemical, biological, radiological, and nuclear patients. (FM 4-02) (USAMEDDC&S)

Note: The preventive aspects of dentistry and combat and operational stress control are addressed under ART 6.7 (Provide Force Health Protection).

ART 4.3.1.1 PROVIDE MEDICAL TREATMENT (ORGANIC AND AREA MEDICAL SUPPORT)

4-149. Units provide medical treatment (organic and area medical support) for all units in the area of operations (AO). Units examine and stabilize patients. They evaluate wounded and disease and nonbattle injuries. Units examine the general medical status to determine treatment and medical evacuation precedence. Units document patient encounters either digitally (preferred method) or on paper (when digital means are not available). (FM 4-02) (USAMEDDC&S)

</tbody>
</table>
ART 4.3.1.2 PROVIDE HOSPITALIZATION

4-150. Hospitalization resources are medical treatment facilities capable of providing inpatient care and services. Hospitalization continues the medical care provided at Roles 1 and 2 of the Army Health System. It also provides a far forward surgical capability that provides essential care in theater, outpatient services, patient administration services (to include electronic documentation of patient encounters), and ancillary support (pharmacy, clinical laboratory, radiology services, and nutritional care). Within theater, the hospitalization capability includes returning those patients to duty within the limits of the theater evacuation policy. This conserves the fighting strength by returning trained manpower to the tactical commander. It also provides stabilizing care to facilitate the evacuation of those patients who will not recover from their injuries or illnesses within the stated theater evacuation policy to facilities capable of providing required care. Theater hospitals may be augmented with hospital augmentation teams to provide specific specialty care. (ATP 4-02.5) (USAMEDDC&S)

ART 4.3.2 PROVIDE MEDICAL EVACUATION (AIR AND GROUND)

4-154. Units provide direct and area air and ground medical evacuation support to as well as evacuate sick, injured, or wounded personnel (United States, joint, interagency, intergovernmental, and multinational forces; enemy prisoners of war; detained or retained personnel; and when authorized civilian personnel). Units evacuate from the point of injury or wounding, casualty collection points, battalion aid stations, ambulance exchange points, or any other designated points where casualties have been located to be evacuated to a higher role medical treatment facility (MTF) in the area of operations (AO). Units provide medical care en route (including critical care) while transporting patients to, between, and from treatment facilities in the AO and document care provided en route. Units provide transport of patients from MTF to ports of debarkation for evacuation out of theater. Units support personnel recovery operations. Units provide emergency pickup, transport, and delivery of medical equipment, medications, blood products, Class VIII supplies, medical personnel, and search and rescue or injured military working dogs to, between, and from MTFs in the AO as required. (ATP 4-02.2) (USAMEDDC&S)

Note: Units must conduct all pickup, transport, and delivery support missions promptly and efficiently to conserve the fighting force and prevent the loss, damage, or spoilage of medical equipment, medications, blood products, and Class VIII supplies.

</table>
**Mission command** is the exercise of authority and direction by the commander using mission orders to enable disciplined initiative within the commander’s intent to empower agile and adaptive leaders in the conduct of unified land operations. Mission command helps commanders capitalize on the human ability to take action to develop the situation and integrate military operations to achieve the commander’s intent and desired end state. (ADP 6-0) (USACAC)

The **mission command warfighting function** is the related tasks and systems that develop and integrate those activities enabling a commander to balance the art of command and the science of control in order to integrate the other warfighting functions (ADRP 3-0). The four primary staff tasks are:

- Conduct the operations process: plan, prepare, execute, and assess.
- Conduct knowledge management and information management.
- Synchronize information-related capabilities.
- Conduct cyber electromagnetic activities.
ART 5.1
Conduct the Operations Process

ART 5.1.1
Plan Operations
- ART 5.1.1.1 Conduct Army Design Methodology
- ART 5.1.1.2 Conduct the Military Decision-Making Process
- ART 5.1.1.3 Conduct Troop Leading Procedures
- ART 5.1.1.4 Integrate Requirements and Capabilities
- ART 5.1.1.5 Develop Commander’s Critical Information Requirements
- ART 5.1.1.6 Conduct Fires Planning
- ART 5.1.1.7 Integrate Space Capabilities
- ART 5.1.1.8 Coordinate Air-Ground Operations
- ART 5.1.1.9 Conduct Special Technical Operations

ART 5.1.2
Prepare for Tactical Operations
- ART 5.1.2.1 Establish Coordination and Liaison
- ART 5.1.2.2 Perform Rehearsals
- ART 5.1.2.3 Task-Organize for Operations
- ART 5.1.2.4 Revise the Plan
- ART 5.1.2.5 Conduct Preoperations Checks and Inspections
- ART 5.1.2.6 Integrate New Units and Soldiers into the Force

ART 5.1.3
Execute Tactical Operations
- ART 5.1.3.1 Perform Ongoing Functions
- ART 5.1.3.2 Perform Planned Actions, Sequels, and Branches
- ART 5.1.3.3 Adjust Resources, Concept of Operations, or Mission
- ART 5.1.3.4 Synchronize Actions to Produce Maximum Effective Application of Military Power
- ART 5.1.3.5 Conduct Transitions
- ART 5.1.3.6 Reconstitute Tactical Forces

ART 5.1.4
Assess Tactical Situations and Operations
- ART 5.1.4.1 Monitor Situation or Progress of Operations
- ART 5.1.4.2 Evaluate Situation or Operation
- ART 5.1.4.3 Provide Combat Assessment
- ART 5.1.4.4 Provide Visual Information Support

5-1. The Army’s framework for exercising mission command is the operations process. The operations process is the major mission command activities performed during operations: planning, preparing, executing, and continuously assessing the operation. The commander drives the operations process through understanding, visualizing, describing, directing, leading, and assessing operations. Commanders, supported by their staffs, use the operations process to drive the conceptual and detailed planning necessary to understand, visualize, and describe their operational environment; make and articulate decisions; and direct, lead, and assess military operations. (ADP 5-0) (USACAC)

ART 5.1.1 PLAN OPERATIONS

5-2. Planning is the art and science of understanding a situation, envisioning a desired future, and laying out effective ways of bringing that future about. Planning helps commanders create and communicate a common vision between commanders, their staffs, subordinate commanders, and unified action partners.
Planning results in a plan and orders that synchronize the action of forces in time, space, and purpose to achieve objectives and accomplish missions. (ADP 5-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>

</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>Tactical planning produced a commander’s decision, communicated an effective methodology, and facilitated mission accomplishment.</td>
</tr>
<tr>
<td>02</td>
<td>Yes/No</td>
<td>Subordinate unit staffs were able to understand the order produced by the military decisionmaking process.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>Time was available for plan rehearsal and refinement.</td>
</tr>
</tbody>
</table>

**ART 5.1.1.1 CONDUCT ARMY DESIGN METHODOLOGY**

5-3. *Army design methodology* is a methodology for applying critical and creative thinking to understand, visualize, and describe unfamiliar problems and approaches to solving them. The Army design methodology is particularly useful as an aid to conceptual planning but must be integrated with the detailed planning typically associated with the military decisionmaking process to produce executable plans. (ADP 5-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>The staff framed an operational environment, framed a problem, and developed an operational approach to solve the problem.</td>
</tr>
<tr>
<td>02</td>
<td>Yes/No</td>
<td>The staff developed an improved understanding of an operational environment, a problem statement, an initial commander’s intent, and an operational approach that served as the links between conceptual and detailed planning.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>The understanding developed through Army design methodology continued through preparation and execution in the form of continuous assessment.</td>
</tr>
</tbody>
</table>

**ART 5.1.1.1.1 Frame an Operational Environment**

5-4. The staff describes the problem and develops the context for an operational approach by framing an operational environment. (ADRP 5-0) (USACAC)

*Note:* This framing facilitates hypothesizing, or modeling, that focuses on the part of an operational environment under consideration. Framing provides a perspective from which commanders can understand and act on a problem.

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>The staff established context for describing the problem and developing an operational approach by framing an operational environment.</td>
</tr>
<tr>
<td>02</td>
<td>Yes/No</td>
<td>Framing an operational environment facilitated hypothesizing, or modeling, that focused on the part of an operational environment under consideration.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>The staff focused on defining, analyzing, and synthesizing the characteristics of the operational and mission variables.</td>
</tr>
<tr>
<td>04</td>
<td>Yes/No</td>
<td>An operational environmental frame consisted of two parts—the current state of an operational environment and the desired end state of an operational environment.</td>
</tr>
</tbody>
</table>

**ART 5.1.1.1.2 Frame the Problem**

5-5. The problem is an issue or obstacle that makes it difficult to achieve a desired goal or objective. A problem exists when there is a significant difference between what actually is and what is desired. An operational problem is the issue or set of issues which impedes the achievement of the desired end state. (ADRP 5-0) (USACAC)
Chapter 5

ART 5.1.1.1.3 Develop an Operational Approach

5-6. The planning team uses the elements of operational art to help think through an operational environment and then visualizes and describes the operational approach. As the planning team considers various approaches, it evaluates the types of defeat or stability mechanisms that may lead to conditions that define the desired end state. Thus, the operational approach enables commanders to begin visualizing and describing possible combinations of actions to reach the desired end state, given the tensions identified in an operational environment and problem frames. The staff uses operational approaches to develop courses of action during detailed planning. (ADRP 5-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>

</tr>
<tr>
<td>02</td>
<td>Yes/No</td>
<td>The staff examined the symptoms, the underlying tensions, and root causes of conflict.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>The staff identified the fundamental problem with greater clarity and considered more accurately how to solve it.</td>
</tr>
<tr>
<td>04</td>
<td>Yes/No</td>
<td>The staff developed a problem statement—a concise statement of the issue or issues requiring resolution.</td>
</tr>
</tbody>
</table>

ART 5.1.1.1.4 Document Results

5-7. Commanders and staffs document results of the Army design methodology to inform more detailed planning. Key outputs of the Army design methodology conveyed in text and graphics include the problem statement, initial commander’s intent, and planning guidance, to include an operational approach. (ADRP 5-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>The problem statement generated during problem framing communicated the commander’s understanding of the problem or problem set upon which the organization will act.</td>
</tr>
<tr>
<td>02</td>
<td>Yes/No</td>
<td>The operational approach organized combinations of potential actions in time, space, and purpose to guide the force to the desired end state.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>Planning guidance oriented the focus of operations, linking desired conditions to potential combinations of actions the force may employ to achieve the desired end state.</td>
</tr>
<tr>
<td>04</td>
<td>Yes/No</td>
<td>The initial commander’s intent described the purpose of the operation, initial key tasks, and the desired end state.</td>
</tr>
</tbody>
</table>

ART 5.1.1.1.5 Reframe the Problem

5-8. Reframing is the activity of revisiting earlier design hypotheses, conclusions, and decisions that underpin the current operational approach. In essence, reframing reviews what the commander and staff believe they understand about an operational environment, the problem, and the desired end state. (ADRP 5-0) (USACAC)

<table>

<td>Reframing provided the freedom to operate beyond the limits of any single perspective.</td>
</tr>
</tbody>
</table>
ART 5.0: Conduct Mission Command

ART 5.1.1.2 CONDUCT THE MILITARY DECISIONMAKING PROCESS

5-9. Units employ the logic and techniques of an iterative planning methodology—the military decisionmaking process (MDMP)—to understand the situation, determine the restated mission, and develop courses of action (COAs) to accomplish the mission. Units recommend the most effective COA. Units prepare orders and plans to communicate the selected COA, commander’s intent, and decisions to subordinates and coalition forces, focusing on the expected results. (ADP 5-0) (USACAC)

*Note:* See ADRP 5-0 for a complete discussion of the MDMP.

ART 5.1.1.2.1 Receive the Mission

5-10. This ART covers how units are given a mission by higher headquarters or deduce a need for a change in the current mission. This task involves preparing for mission analysis, to include collecting materials for analysis, receiving the commander’s preliminary guidance, determining requirements and time available, and sending warning orders to subordinates. (FM 6-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>

ART 5.1.1.2.5 Compare Courses of Action

5-14. This ART covers how units evaluate courses of action (COAs) independently, against a set evaluation criteria, and against each other to determine the most ethical and effective one for mission accomplishment. Units recommend COAs for selection. This comparison also considers risk, positioning for future operations, flexibility, and subordinate exercise of initiative. (FM 6-0) (USACAC)

</tr>
</tbody>
</table>

ART 5.1.1.2.6 Approve Course of Action

5-15. This ART covers how commanders decide and approve a course of action (COA) that is most advantageous to mission accomplishment and is within the higher commander’s intent. Units refine commander’s intent and commander’s critical information requirement to support selected COAs. Units issue any additional guidance to subordinate commanders and staff. Units prepare and issue warning order. (FM 6-0) (USACAC)
<table>

**ART 5.1.1.2.7 Produce Plan or Order**

5-16. This ART covers how units prepare a plan or order to implement the selected course of action per the commander’s decision by turning it into a clear, concise concept of operations and required support. The plan includes annexes and overlays as necessary to implement the plan. The plan or order accurately conveys information that governs actions to be taken and is completed in the correct format. This includes the establishment of graphic control measures, including fire support coordination measures. (FM 6-0) (USACAC)

<tr>
<td>02</td>
<td>Yes/No</td>
<td>After the commander and subordinate leaders received new missions and assessed the time available for planning, preparing, and executing the mission, they immediately issued warning orders to their subordinates.</td>
</tr>
</tbody>
</table>
The commander and subordinate leaders developed a tentative plan using the eight steps of troop leading procedures: receive the mission, issue a warning order, make a tentative plan, initiate movement, conduct reconnaissance, complete the plan, issue the order, and supervise and refine.

The commander and subordinate leaders initiated movement necessary to continue mission preparation or to posture the unit for the start of the mission. (Movement can include movement to an assembly area, battle position, or new area of operations, or the movement of guides or quartering parties.)

The commander and subordinate leaders weighed the advantages of reconnoitering personally against the combat multiplier in the form of supplied information from the battalion's information systems to exploit the principles of speed and surprise.

The commander and subordinate leaders expanded their selected (or refined) courses of action into complete operation orders (OPORDs) that included prepared overlays, refined indirect fire lists, completed sustainment requirements, and communications requirements based on the latest reconnaissance or information.

The commander and subordinate leaders issued an OPORD that precisely and concisely explained both the commander's intent and concept of how the commander envisioned the unit accomplishing the mission.

After issuing the OPORD, the commander and subordinate leaders ensured that the required activities and tasks were completed in a timely manner prior to mission accomplishment.

### ART 5.1.1.4 INTEGRATE REQUIREMENTS AND CAPABILITIES

5-18. This ART covers how units combine and coordinate capabilities of forces and warfighting functions in effective combinations to meet requirements for mission accomplishment established by planning. (FM 6-0) (USACAC)

<table>

ART 5.1.1.6 CONDUCT FIRES PLANNING

5-20. This ART covers how units plan, coordinate, and integrate fires capabilities and products to support the military decisionmaking process and conduct of operations. Units coordinate across all staff elements to identify required fire support. Units determine essential, specified, and implied fires tasks. Units develop fire support input to intelligence preparation of the battlefield and other running estimates. Units provide fire support options, products that support the concept of operations development, and fire support products that support course of action analysis and statements in course of action development. Units develop the fires running estimate. Units coordinate for additional fire support assets to support mission requirements. Units provide fire support input to event templates, synchronization matrix, decision support template, and communications and sustainment estimates. (ADRP 3-09) (USAFCOE)

ART 5.1.1.7 INTEGRATE SPACE CAPABILITIES

5-21. This ART covers how units plan, coordinate, and integrate space-based capabilities and products (national, military, and commercial) to support tactical planning and execution (the military decisionmaking process and conduct of operations) to effectively meet requirements established for mission accomplishment. Units coordinate across all staff elements to identify space-based asset support. Units determine essential, specified, and implied tasks from a space perspective in mission analysis. Units develop space input to intelligence preparation of the battlefield and other running estimates. Units provide space-based support options, space-based products that support concept of operations development, and space-based products that support course of action analysis and statements in course of action development. Units develop a space running estimate. Units coordinate additional operational space capabilities to support mission requirements for space-based input to event templates, a synchronization matrix, a decision support template, and communications and sustainment estimates. (FM 3-14) (USASMDC)

ART 5.1.1.8 COORDINATE AIR-GROUND OPERATIONS

5-22. Air-ground operations are the simultaneous or synchronized employment of ground forces with manned and unmanned, rotary- and fixed-wing aviation and fires to seize, retain, and exploit the initiative. Effective air-ground operations are built upon relationships, mutual trust, and a common understanding of an operational environment, operation, and mission. They require detailed planning, coordination, and synchronized employment of ground and air maneuver and fire to achieve the commander’s objectives and ensure freedom of movement and action. (FM 3-04.300) (USAACE)

02 October 2015 ADRP 1-03 5-11
ART 5.1.1.9 CONDUCT SPECIAL TECHNICAL OPERATIONS

5-23. Special technical operations involves the planning, tasking, and employing of special access program protected systems and capabilities to achieve effects on enemy capabilities. Within special technical operations, there exists a collection of specific capabilities, security architecture, an information network, and review and approval process. (JP 3-13) (JS)

ART 5.1.2 PREPARE FOR TACTICAL OPERATIONS

5-27. Preparation consists of those activities performed by units and Soldiers to improve their ability to execute an operation. Preparation includes, but is not limited to, plan refinement, rehearsals, information collection, coordination, inspections, and movement. Preparation creates conditions that improve friendly forces’ opportunities for success. It facilitates and sustains transitions, including those to branches and sequels. (ADP 5-0) (USACAC)

Chapter 5

ART 5.1.2.6 INTEGRATE NEW UNITS AND SOLDIERS INTO THE FORCE

5-33. Units assimilate new units and Soldiers into the force in a posture that allows them to contribute effectively to mission accomplishment during an operation. This includes receiving and introducing them to the force and an operational environment; orienting them on their place and role in the force and the operation; establishing command relationships, sustainment, and communications within the force; and training them in the unit standard operating procedures and mission-essential task list for the operation. (ADRP 5-0) (USACAC)

</tbody>
</table>

ART 5.1.3.1.2 Adjust Commander’s Critical Information Requirements and Essential Elements of Friendly Information

5-37. Units continuously update commander’s critical information requirements (CCIRs) and essential elements of friendly information (EEFI) during operations with routine review by the commander and staff. Units analyze information requirements against changing operational circumstances and designate information requirements that affect decision making and the success of the mission and decisive operation. (ADRP 5-0) (USACAC)

<table>
<thead>
<tr>

<td>Of graphic control measures not updated.</td>
</tr>
<tr>
<td>05</td>
<td>Number</td>
<td>Of significant movement of forces compared to the number and timeliness of graphic changes.</td>
</tr>
</tbody>
</table>

ART 5.1.3.1.4 Manage Sustainment Force Positioning

5-39. Units move or cause sustainment forces to be moved and positioned where they can contribute the maximum support to the operation. Units determine where the sustainment forces are and where they must be to continuously provide effective support. Units allow adequate planning and execution time to support mission requirements. (ADRP 5-0) (USACAC)
### ART 5.1.3.1.5 Manage Use and Assignment of Terrain

5-40. *Terrain management* is the process of allocating terrain by establishing areas of operation, designating assembly areas, and specifying locations for units and activities to deconflict activities that might interfere with each other. Units ensure that adequate space, including the use of routes, is available at the right time to support critical activities, especially the decisive operation in the area of operations. (ADRP 5-0) (USACAC)

<table>

<td>Of assigned and supporting forces coordinated to synchronize operation in right place at right time.</td>
</tr>
<tr>
<td>05</td>
<td>Number</td>
<td>Of friendly actions to produce maximum relative military power.</td>
</tr>
<tr>
<td>06</td>
<td>Number</td>
<td>Of uncoordinated element or activity actions causing disruption or delay of United States or multinational plans and objectives.</td>
</tr>
</tbody>
</table>

ART 5.1.3.4.1 Coordinate Actions Within a Staff Section

5-46. Units exchange information and arrange actions to inform, integrate, and deconflict actions within a staff section during operations to reduce duplication, confusion, and problems. (FM 6-0) (USACAC)
### ART 5.1.3.4.2 Synchronize Actions Among Staff Sections

5-47. Units coordinate actions among staff sections (coordinating, special, and personal) in arranging military actions in time, space, and purpose by warfighting functions to produce the maximum relative military power at a decisive place and time. This includes informing of, integrating, and deconflicting actions undertaken by or directed by staff sections during operations to reduce duplication, confusion, and problems among the staff sections. (FM 6-0) (USACAC)

*Note:* ART 5.1.3.4.2 includes the targeting process outlined in JP 3-60 and ATP 3-60.

#### Measures

<tr>
<td>05</td>
<td>Number</td>
<td>Of actions uncoordinated within staff section affecting others’ actions.</td>
</tr>
</tbody>
</table>

### ART 5.1.3.4.3 Review Orders of Subordinate Organizations

5-48. Units ensure that all relevant information and factors issued in subordinate orders contribute to vertical warfighting function synchronization. ART 5.1.3.4.3 informs the staff with whom they will have to coordinate. It reveals potential conflicts and problems among subordinate forces, higher headquarters, adjacent, and other units that might affect or be affected by the subordinate plan and the headquarters’ plan. It resolves conflicts and problems among forces before they affect preparations or operations, or resolves the damage. (FM 6-0) (USACAC)

</tr>
</tbody>
</table>
ART 5.1.3.4.5 Advise the Command

5-50. Staffs contribute to achieving the commander’s intent by fulfilling their functional responsibilities within the authority the commander delegates to them. Effective staffs and staff members provide commanders with timely relevant information and well-analyzed recommendations. Staff members inform and advise the commander and other staff members concerning matters pertaining to their respective and related functional responsibilities and assigned duties. (FM 6-0) (USACAC)

<table>
<thead>
<tr>

<td>Staff coordinated with supporting units and higher headquarters for operational needs beyond unit capability.</td>
</tr>
<tr>
<td>09</td>
<td>Time</td>
<td>To evaluate, update, and disseminate new information with higher, lower, adjacent, supported, and supporting organizations.</td>
</tr>
</tbody>
</table>

ART 5.1.3.5 CONDUCT TRANSITIONS

5-51. Transitions mark intervals between the ongoing operation and full execution of branches and sequels. Transitions often mark the change from one dominant type of operation, such as offense, to another, such as stability. Commanders at all levels must possess the mental agility to rapidly transition from one type of operation to another. For example, at lower echelons, transitions occur when one formation passes through another, or when units must breach an obstacle belt. Links between phases and the requirement to transition between phases are critically important. Commanders establish clear conditions for how and when these transitions occur during planning. Although phases are distinguishable to friendly forces, the operational design conceals these distinctions from opponents through concurrent and complementary joint and Army actions. (ADRP 3-0) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>Unit conducted transition from one phase to another and maintained seamless continuity of operations.</td>

<td>Yes/No</td>
<td>Commander determined possible branches or sequels for likely next phase.</td>
</tr>
</tbody>
</table>

ART 5.1.3.6 RECONSTITUTE TACTICAL FORCES

5-52. Reconstitution is the extraordinary action taken by commanders to restore units to a desired level of combat effectiveness, commensurate with mission requirements and available resources. The major
elements of reconstitution are reorganization, assessment, and regeneration. Reconstitution requires a
decision by the commander having control of the required resources. (ATP 4-33) (CASCOM)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>

</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>Commander adopted new task organization, if required.</td>
</tr>
</tbody>
</table>

**ART 5.1.3.6.1 Reorganize Units as Part of a Reconstitution Effort**

5-53. Reorganization is action to shift resources within a degraded unit to increase its combat effectiveness. Commanders of all types of units at each echelon conduct reorganization. They reorganize before considering regeneration. Reorganization may be immediate or deliberate. (FM 3-90-1) (USACAC)

<table>
<thead>
<tr>
<th>No.</th>
<th>Scale</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Yes/No</td>
<td>Unit reorganized and maintained seamless continuity of operations.</td>

<tr>
<td>03</td>
<td>Yes/No</td>
<td>Commander adopted new task organization, if required.</td>
</tr>
</tbody>
</table>

**ART 5.1.4 ASSESS TACTICAL SITUATIONS AND OPERATIONS**

5-55. Assessment is the determination of the progress toward accomplishing a task, creating a condition, or achieving an objective (JP 3-0). Assessment precedes and guides every activity in the operations process and concludes each operation or phase of an operation. It involves a comparison of forecasted outcomes to actual events. (ADP 5-0) (USACAC)

*Note:* Broadly, assessment consists of, but is not limited to, the following activities:

- Monitoring the current situation to collect relevant information.
- Evaluating progress toward attaining end state conditions, achieving objectives, and performing tasks.
- Recommending or directing action for improvement.

<table>

</tbody>
</table>

ART 5.1.4.2 EVALUATE SITUATION OR OPERATION

5-57. Units analyze and compare the actual situation or progress of the operation against measures of effectiveness and performance. Units highlight variances between the planned situation at that time in the operation and the current situation, and then forecast the degree of mission accomplishment. (ADRP 5-0) (USACAC)

ART 5.1.4.2.1 Develop Running Estimates

5-58. A running estimate is the continuous assessment of the current situation used to determine if the current operation is proceeding according to the commander’s intent and if planned future operations are supportable. Units use the running estimate procedure—consisting of significant facts, events, and conclusions based on analysis—as the staff element’s means of assessing within their functional field. Running estimates consider both quantifiable and intangible aspects of military operations. They are as thorough as time permits and updated regularly as part of an ongoing process. They support assessing throughout the operations process. Running estimates also support the commander’s visualization of the operation. (ADP 5-0) (USACAC)

Note: The intelligence running estimate is the product of intelligence preparation of the battlefield. See ART 2.2.1 (Perform Intelligence Preparation of the Battlefield).
Running estimates were accurate and supported the commander’s visualization of the operation.

Into future that planning branches had been developed.

From receipt of information to complete or update running estimate.

Of decision points that had branches.

Of enemy actions or operations that affected course of battle, but not forecast.

Of forecast branches that appeared at execution.

Mission command systems effectively concluded when the force met the commander’s intent or needed to adjust its course of action.

For commander or staff to forecast degree of mission accomplishment based on variance.

From receipt of information to completed evaluation of progress.

Of accurate evaluation of variances.

Of accurate forecast of progress and meaning of forecast.

The commander determined the overall damage inflicted on the enemy by those direct and indirect fires employed during the conduct of operations.

To commence subsequent operations or restrike while awaiting combat assessment.

To provide full assessment of attacks to force commander.

To provide initial combat assessment of attacks to force commander.

To perform the combat assessment functions of battle damage assessment and munitions effectiveness assessment based on commander’s guidance or objectives.

Of high-payoff targets assessed as killed later assessed as being mission capable.

Difference between higher-level and force assessment of effectiveness.

Of targets with combat assessment data available.

Of targets unnecessarily reattacked.
enemy. This assessment helps commanders determine when or if their targeting effort is meeting their objectives. This task also includes determining if the application of military force results in the release of hazardous materials. (JP 3-0) (JS)

**Note:** This task is supported by the ART 2.4.3 (Provide Intelligence Support to Combat Assessment). It is also associated with the decide, detect, deliver, and assess process.

**ART 5.1.4.3.2 Perform Munitions Effectiveness Assessment**

5-62. Units assess the military force applied in terms of the lethal and nonlethal weapon systems and munitions effectiveness to determine and recommend any required changes to the methodology, tactics, weapon systems, munitions, fusing, and/or weapon delivery parameters to increase force effectiveness. Munitions effectiveness assessment takes place concurrently and interactively with battle damage assessment. This assessment is primarily the responsibility of operations and fire support personnel with input from the intelligence warfighting function. (JP 2-01) (JS)

**ART 5.1.4.3.3 Provide Reattack Recommendation**

5-63. Units make recommendations to the commander, considering the level to which operational objectives have been met regarding reattack and other recommendations that address operational objectives relative to target, target critical elements, target systems, and enemy combat strengths. (JP 3-60) (JS)
### ART 5.1.4.4 PROVIDE VISUAL INFORMATION SUPPORT

5-64. A unit that provides visual information support creates a record of unit activities. These still and motion video recordings show friendly forces, equipment, and positions before, during, and after engagements; terrain features in current or projected operational areas; battle damage to friendly, enemy, or host-nation property; and any essential elements of friendly information that assist a commander in conducting (planning, preparing, executing, and assessing) operations. (ATP 6-02.40) (USACCOE)
5-65. Units man, equip, and organize command posts to control operations for extended periods. Effective command post personnel use information systems and equipment to support 24-hour operations while they continuously communicate with all subordinate units and higher and adjacent units. The command post performs the mission command warfighting functions discussed in succeeding subtasks. (FM 6-0) (USACAC)

Note: ART 6.4.3 (Establish Local Security) and ART 6.10.1 (Conduct Operations Security) address tasks inherently associated with conduct of command post operations. The measures of performance for those tasks are not included with the measures of performance of any of the tasks in this chapter since they are separate tasks.

</tbody>
</table>

ART 5.2.2.2 SELECT, RECONNOITER, AND EVALUATE THE NEW COMMAND POST LOCATION

5-72. Units decide and confirm the suitability of the location to which the command post should displace, including the time of and movement. (ATP 3-09.60) (USAFCOE)

*Note: ART 1.3 (Conduct Tactical Troop Movements) covers movement of command posts.*
Selection, reconnaissance, and evaluation of the new command post location resulted in a new location that effectively supported the exercise of mission command.

To form reconnaissance party.

For reconnaissance party to decide and confirm suitability of new location.

For reconnaissance party to communicate findings to command post.

Of decisions of reconnaissance party valid for command post functions.

Occupation of the new command post location allowed the command post to support the commander effectively in the exercise of mission command and within the time the unit standard operating procedures or operation order specified.

Location of new command post met security requirements.

To account for 100 percent of personnel and equipment after last arrival at final destination.

To unpack equipment from transport.

To set up facilities and information systems and networks for operation.

To reestablish communications links after arrival.

Of mission command functions performed effectively after arrival.

Transfer of command post functions allowed the unit mission command systems to maintain command post functions without disruption.

To transfer command control to alternate command post.

Of effectiveness of alternate command post.

Of communications with subordinate headquarters during displacement.

Of effectiveness of command post functions during displacement.

Of command post functions not performed during displacement.

Unit prepared sleep plan.

Unit sleep plan provided adequate rest for effective performance over time.

Unit complied with sleep plan during operations.

5-73. Units execute activities following a tactical or administrative movement to establish and conduct command post operations. (ATP 3-09.60) (USAFCOE)

5-74. Units reassign command post functions from the old location to the new location. Maintaining continuity during displacement or catastrophic loss requires designating alternative command posts and procedures for passing control between them. Standard operating procedures address providing continuity when units lose communications with the commander, subordinates, or a particular command post. (FM 6-0) (USACAC)

5-75. Units identify, counter, and minimize the degrading effects of night operations and sleep loss on units as they execute continuous operations. (FM 6-22.5) (USAMEDDC&S)
ART 5.2.4 MANAGE STRESS

5-76. Units identify, counter, and minimize the degrading effects of stress on units as they execute continuous operations. (FM 6-22.5) (USAMEDDC&S)

ART 5.3
Conduct Knowledge Management and Information Management

ART 5.3.1
Conduct Knowledge Management

ART 5.3.2
Conduct Information Management

ART 5.3.3
Manage Information and Data

ART 5.3.4
Conduct Geospatial Engineering Operations

5-80. Staffs apply the science of control to support the commander’s tasks by conducting knowledge management and information management. Knowledge management is the process of enabling knowledge flow to enhance shared understanding, learning, and decisionmaking. Information management is the science of using procedures and information systems to collect, process, store, display, disseminate, and protect data, information, and knowledge products. (ADRP 6-0) (USACAC)

Note: Knowledge management supports improving organizational learning, innovation, and performance. Information management disseminates timely information to and protects relevant information for commanders and staffs. Information management helps commanders develop situational understanding.
ART 5.3.1 CONDUCT KNOWLEDGE MANAGEMENT

5-81. Units facilitate situational understanding through knowledge management. Units conduct knowledge management to enhance shared understanding through the alignment of people, processes, and tools within the organizational structure and culture to increase collaboration and interaction between leaders and subordinates. This results in better decisions and enables improved flexibility, adaptability, integration, and synchronization to achieve a position of relative advantage. (ADRP 6-0) (USACAC)

</tbody>
</table>

ART 5.3.2 CONDUCT INFORMATION MANAGEMENT

5-82. The staff uses information management to assist the commander in building and maintaining understanding. The staff studies an operational environment, identifies information gaps, and helps the commander develop and answer information requirements. Collected data are then organized and processed into information for development into and use as knowledge. Information becomes knowledge, and that knowledge becomes a source of information. (ADRP 6-0) (USACAC)

ART 5.3.2.1 COLLECT FRIENDLY FORCE INFORMATION REQUIREMENTS

5-83. Units collect data about friendly forces from the information environment for processing, displaying, storing, and disseminating to support command functions. (ADRP 5-0) (USACAC)

<table>

ART 5.3.2.4 PROCESS RELEVANT INFORMATION

5-86. Units that perform this task add meaning to relevant information by formatting, plotting, translating, correlating, aggregating, organizing, categorizing, analyzing, and evaluating it to create the common operational picture. (ADRP 6-0) (USACAC)

*Note:* The common operational picture is an operational picture tailored to the user’s requirements based on common data and information shared by more than one command. The common operational picture facilitates collaborative planning and helps all echelons to achieve situational understanding.

ART 5.3.2.7 COMMUNICATE WITH NON-ENGLISH SPEAKING FORCES AND AGENCIES

5-89. Units that perform this task communicate verbally, nonverbally, in writing, or electronically in the appropriate language of multinational, host-nation, and nongovernmental forces and agencies to meet all communication requirements. This task requires United States personnel to establish and maintain effective rapport with the leaders and staff of multinational or host-nation forces. They achieve information exchange with multinational forces by establishing a multinational information sharing enterprise called a coalition and multinational wide area network (WAN). (JP 6-0) (JS)

*Note:* Classified and sensitive information is not passed to multinational partners in violation of policy guidance.

ART 5.3.4 CONDUCT GEOSPATIAL ENGINEERING ACTIVITIES

5-91. Geospatial engineering activities include functions of terrain analysis, data collection, data generation, database management, data manipulation and exploitation, cartographic production and reproductions, and geodetic survey. Geospatial engineering operations focus on data generation, data management, terrain analysis, and the presentation of their results to the commander. The functions are all interdependent so to prepare a geospatially accurate and timely enabled common operational picture for the commander. (ATP 3-34.80) (USAES)

Note: The inclusion of this task does not change the steps of the intelligence preparation of the battlefield process described in ATP 2-01.3.
The availability of accurate geospatial products allowed the commander to deploy and employ the weapon systems effectively.

The availability of accurate geospatial products allowed supported commanders and staffs to visualize their areas of operations, interest, and influence.

The availability of accurate geospatial products allowed supported commanders and staffs to target enemy systems effectively.

The availability of accurate geospatial products allowed supported commanders and staffs to plan air and ground missions efficiently.

The availability of accurate geospatial products allowed supported commanders and staffs to counter enemy weapons and intelligence collection capabilities.

The availability of accurate geospatial products supported the commander and staff’s plans to avoid areas.

To complete terrain analysis of an area of operations and prepare products supporting intelligence preparation of the battlefield.

To complete geodetic survey in the area of operations.

To produce and reproduce geospatial information in sufficient quantities to meet supported unit demand.

And types of engineer topographic elements available to support unit operations.

SECTION IV – ART 5.4: CONTROL TACTICAL AIRSPACE

5-92. This ART covers how units maximize the combat effectiveness of all tactical airspace users to include manned and unmanned aircraft systems, munitions, and directed energy systems in support of the operation. Units prevent fratricide, enable responsive offensive and defensive fires, and permit greater flexibility of tactical operations. Units plan, prepare, and execute the unit airspace plan. This ART covers how units continuously assess airspace use and adjust the plan as required to resolve conflicts while supporting commanders’ priorities and risk guidance. (FM 3-52) (USACAC)

The unit determined integrated airspace user requirements.

The unit developed airspace usage priorities.

The unit coordinated air traffic service, sensor emplacement, and data links.

The unit determined combat identification authority and procedures for airspace users.

The unit developed rules of engagement and early warning procedures for air defense operations in the area of operations (AO).

The unit determined reporting requirements and monitoring methods for manual reporting.

The unit integrated airspace use within the AO.

The unit developed airspace coordinating measures to support planned operations.

The unit developed Appendix 10 (Airspace Control) to Annex C (Operations) to the operation order.

The unit processed airspace orders and directives.

The unit managed airspace control information displays.

The unit determined track identification for airspace users.

The unit monitored assigned airspace and airspace users within assigned AO.

The unit resolved real-time conflicts for airspace users within the AO.
ART 5.0: Conduct Mission Command

SECTION V – ART 5.5: EXECUTE COMMAND PROGRAMS

ART 5.5
Execute Command Programs

ART 5.5.1 Support Commander’s Leadership Responsibilities for Morale, Welfare, and Discipline

ART 5.5.2 Preserve Historical Documentation and Artifacts

ART 5.5.3 Conduct Official Ceremonial, Musical, Public, and Special Events

ART 5.5.4 Develop a Command Environmental Program

ART 5.5.5 Develop a Command Lessons Learned Program

ART 5.5.6 Establish and Maintain Discipline

5-93. Command programs are programs required by the United States Code (known as USC) and Army regulations. In some cases, doctrine also addresses aspects of these programs. Command programs include the following tasks: support commander’s leadership responsibilities for morale, welfare, and discipline; preserve historical documentation and artifacts; conduct official ceremonial, musical, public, and special events; develop a command environmental program; and develop a command lessons learned program. (ADP 1) (USACAC)

ART 5.5.1 SUPPORT COMMANDER’S LEADERSHIP RESPONSIBILITIES FOR MORALE, WELFARE, AND DISCIPLINE

5-94. Units support the commander’s stewardship responsibilities for creating and maintaining a positive command climate, promoting professional development, and improving esprit de corps, morale, welfare, and discipline of Soldiers and Department of the Army Civilians. (ADP 1) (USACAC)

<table>
<thead>

</tbody>
</table>
ART 5.5.1.1 DETERMINE ÉSPRIT DE CORPS, MORALE, AND ETHICAL CLIMATE OF ORGANIZATION

5-95. Morale, the human dimension’s most important intangible element, is an emotional bond that impacts the quality of organizational cohesion in the accomplishment of missions. The unit’s ethical climate affects motivation and the trust Soldiers feel for their team and leaders. Soldiers draw strength and éspirt de corps from knowing they are part of long-standing tradition. (ADRP 6-22) (USACAC)

<table>

**ART 5.5.1.3 PROVIDE OPERATIONAL LAW SUPPORT**

5-97. Unit legal sections support military operations (the military decisionmaking process and conduct of operations) by performing mission analysis, preparing legal estimates, designing the operational legal support structure, and writing Tab C (Legal Support) to Appendix 2 (Personnel Services Support) to Annex F (Sustainment). Unit legal sections support military operations by assisting in the development and training of rules of engagement (ROE), reviewing all operation plans and orders, and maintaining situational understanding. Unit legal sections also support military operations by advising on the legal aspects of targeting, detainee operations and resettlement activities, stability or defense support of civil authorities tasks, and applying ROE and civil affairs operations. (FM 1-04) (TJAGLCS)
ART 5.5.1.4 TRAIN SUBORDINATES AND UNITS

5-98. Units instruct personnel to improve their capacity individually and collectively to perform specific military functions and tasks. Training prepares Soldiers, leaders, and units to conduct tactical operations and win. (ADRP 7-0) (USACAC)
ART 5.5.1.4.1 Develop Mission-Essential Task List

5-99. Units compile collective mission-essential tasks that must be performed successfully if an organization is to accomplish its operational missions. (ADRP 7-0) (USACAC)

*Note:* Headquarters, Department of the Army approved standardized mission-essential task lists (METLs) for selected brigade-sized units are available on the Army Training Network (ATN) METL viewer.

ART 5.5.2 PRESERVE HISTORICAL DOCUMENTATION AND ARTIFACTS

5-104. This ART covers how units collect and safeguard paper, photographic images, electronic documentation, and artifacts of key events, decisions, and observations of joint or multinational operations or campaigns to support lessons learned analysis, public affairs efforts, doctrine development, and historical retention and writing. This task includes attending key briefings and meetings and interviewing key personnel to gather first-hand observations, facts, and impressions. This task further includes keeping a daily journal of personal observations and key events and packaging and forwarding collected information to appropriate agencies. Historical teams prepare and submit contingency historical reports that include required data. (ATP 1-20) (Center of Military History)

### ART 5.0: Conduct Mission Command

#### ART 5.5.2.1 COLLECT HISTORICAL DOCUMENTS AND ARTIFACTS

5-105. Units collect documents, maps, photographs, video and audio recordings, artifacts, and other historical material that might not be preserved by retiring records. This task includes performing after-action interviews and special projects for subjects not treated in regular reports and documents. It also includes the collection of specific information for historical research projects being undertaken by higher historical offices when tasked to do so through command channels. (ATP 1-20) (Center of Military History)

ART 5.5.6 ESTABLISH AND MAINTAIN DISCIPLINE

5-113. Units establish and maintain discipline and military law enforcement by creating a positive and professional command climate and by establishing and enforcing Army and unit standards. They accomplish this with leadership teams that exhibit concern for the welfare of fellow Soldiers, who remain role models of strong moral-ethical character, who competently perform their duties, and who remain committed to the Army Values and the Army Ethic. Standards of acceptable behavior are set by law, regulation, policy, doctrine, and the customs and traditions of honorable service. Commanders and leaders at all levels ensure every member of the team meets standards. Discipline and adherence to standards are hallmarks of Army professionals. Discipline at the individual level is primarily self-discipline, living the Army Values—on and off duty. Military discipline is enforced and supported by all leaders; commander’s exercise of authority under the Uniform Code of Military Justice and confinement activities that regulate the force to comply with command policies and directives, ensure a lawful and orderly environment, and suppress criminal behavior. (ADRP 1) (USACAC)

ART 5.6.3 PROVIDE ARMY SPACE SUPPORT

5-124. Units provide payload and network control of satellite communications system constellations for Department of Defense and maintain a backup contingency control capability through Army-maintained satellite operations centers. This task includes conducting the day-to-day telemetry, tracking, and commanding needed for optimal performance and health of assets as well as planning and coordinating the resolution of satellite anomalies. (FM 3-14) (USASMDC)

ART 5.6.3.1 CONDUCT PAYLOAD CONTROL

5-125. Units provide payload control of satellite communications system constellations for Department of Defense and maintain a backup contingency control capability through Army-maintained satellite operations centers. Payload control consists of configuring and maintaining the satellite control equipment databases, configuring and maintaining the satellite payload, reacting to anomalous conditions, and reporting satellite payload and platform status at an assigned level. (FM 3-14) (USASMDC)

**Note:** Army units provide satellite payload control of the wideband satellite constellation that includes Defense Satellite Communications System and Wideband Global Satellite Communications satellites. (JP 3-14) (JS)

ART 5.6.4 PROVIDE SPACE SITUATIONAL AWARENESS

5-127. Space situational awareness includes space intelligence, space surveillance, space reconnaissance, space and terrestrial weather monitoring, and space common operational picture (COP). In support of the COP, units monitor, detect, and characterize authorized and unauthorized satellite access on key communications platforms, maintaining information superiority as an advantage to friendly maneuver operations. In space surveillance, units execute space tracking and space object identification in support of the space surveillance network. Units provide space situational awareness in the commander’s COP. (FM 3-14) (USASMDC)

ART 5.7.1 PROVIDE ADVICE AND COUNSEL TO THE COMMANDER

5-130. The commander is the most visible and credible spokesperson for the command and plays a critical role in guiding successful public affairs operations. As the commander’s senior advisor on public affairs activities, the public affairs officer is a member of the commander’s personal staff who maintains direct and timely access to the commander and other senior-level staff on a continuous basis. (FM 3-61) (OCPA)

</tbody>
</table>

ART 5.7.2 CONDUCT PUBLIC AFFAIRS PLANNING

5-131. Public affairs planning requires staff collaboration and understanding of the interdependence of all functional areas and information aspects of the environment and area of operations. Developing a public affairs plan is vital in meeting the commander’s public information requirements. Public affairs planning helps commanders and staffs consider the implications of each course of action on key publics, friendly and adversarial. Public perceptions, levels of support, enemy opposition, and countermeasures often change throughout an operation. Therefore, leaders consider effects of public affairs and communication strategies throughout the operations process. Planning does not cease with a plan or order. It continues throughout the operation while orders are refined after feedback from continuous assessment. Public affairs coordinates with other information capabilities and functional areas to provide commanders an overarching, complementary communication plan. These activities from military information support operations, civil affairs, combat camera, and other government agencies communicate United States strategic objectives to foreign audiences. (FM 3-61) (OCPA)
ART 5.7.3 CONDUCT PUBLIC AFFAIRS TRAINING

5-132. Public affairs training prepares the members of the public affairs team to interact effectively with media and publics. This training teaches the legitimacy of independent reporting. It provides insight into the focus, accuracy, and balance of news coverage as influenced by a reporter’s experience, cultural bias, and political bias. Accurate reporting significantly enhances the Army’s credibility and American public support. Training includes advice on the responsibilities and rights as an Army spokesperson or representative. (FM 3-61) (OCPA)

</tbody>
</table>

ART 5.7.4 CONDUCT MEDIA FACILITATION

5-133. Public affairs professionals and their commanders must facilitate international, national, and local media access to operational units, including those engaged in combat. Media coverage influences public perceptions of the area of operations, United States national policy, and military objectives. It also influences perceptions of international, United States, and local publics in the area of operations. These perceptions affect public support, durability of coalitions, and the duration of Army involvement. (FM 3-61) (OCPA)

ART 5.7.5 CONDUCT PUBLIC COMMUNICATION

5-134. Public communication is the communication between the Army and international, national, and local publics through coordinated programs, plans, themes, and messages. It involves the receipt and exchange of ideas and opinions that contribute to shaping public understanding of and discourse with the Army. Public communication includes the release of official information through news releases, public service announcements, media engagements, town halls, senior Soldier and leader engagements, and social networks. It also supports the commander’s responsibility to keep the American people and the Army informed. (FM 3-61) (OCPA)

</tr>
</tbody>
</table>

SECTION VIII – ART 5.8: DEVELOP TEAMS

5-135. Commanders initiate team building, both inside and outside their organizations, as early as possible and maintain it throughout operations. Team building requires hard work, patience, time, and interpersonal skill from all leaders and team members. Commanders must trust and earn the trust of their unified action partners and key leaders within the operational area. Building trust with unified action partners and key leaders requires significant effort by commanders and staffs to overcome differences in cultures, mandates, and organizational capabilities. (ADRP 6-0) (USACAC)
ART 5.8.1 FORM TEAMS

5-136. Teams work best when new members quickly feel a part of the team. The two critical steps of the formation stage—reception and orientation—dramatically differ in peace and war. In combat, a good sponsorship process can literally make the difference between life and death for new arrivals and to the entire team. (ADRP 6-0) (USACAC)

<table>
<thead>

<td>Yes/No</td>
<td>Unit was able to effectively receive and orient new personnel to the team’s purpose, tasks, standards, and organization and the new members’ role.</td>
</tr>
</tbody>
</table>

ART 5.8.2 ENRICH TEAMS

5-137. New teams and new team members gradually move from questioning everything to trusting themselves, their peers, and their leaders. Leaders learn to trust by listening, following up on what they hear, establishing clear lines of authority, and setting standards. By far the most important thing a leader does to strengthen the team is to provide training. Training takes a group of individuals and molds them into a team while preparing them to accomplish their missions. Training occurs during all three stages of team building but is particularly important during enrichment. It is at this point that the team is building collective proficiency. (ADRP 6-0) (USACAC)

<table>

</tbody>
</table>

ART 5.8.3 SUSTAIN TEAMS

5-138. During the sustainment stage, members identify with their team. They own it, have pride in it, and want the team to succeed. At this stage, team members will do what is necessary without being told. Every new mission gives the leader a chance to strengthen the bonds and challenge the team to reach for new heights of accomplishment. Leaders develop subordinates because they know subordinates will be tomorrow’s team leaders. The team should continuously train so it maintains proficiency in the collective and individual tasks it must perform to accomplish its missions. (ADRP 6-0) (USACAC)

**SECTION IX – ART 5.9: CONDUCT CYBER ELECTROMAGNETIC ACTIVITIES**

5-139. Cyber electromagnetic activities are activities leveraged to seize, retain, and exploit an advantage over adversaries and enemies in both cyberspace and the electromagnetic spectrum, while simultaneously denying and degrading adversary and enemy use of the same and protecting the mission command system. Cyber electromagnetic activities consist of cyberspace operations, electronic warfare, and electromagnetic spectrum operations. (ADRP 3-0) (USACAC)

03 | Yes/No | Unit planned, coordinated, integrated, and conducted (as applicable) cyberspace operations to affect personnel, facilities, physical and logical networks, equipment, and organizations.                                                                                                        |
04 | Yes/No | Unit conducted electronic warfare to include electronic attack using electromagnetic energy, directed energy, or antiradiation capabilities to affect personnel, facilities, or equipment.                                                                                                                    |
05 | Yes/No | Unit efficiently used the electromagnetic spectrum while in a joint environment that enabled operational planning and execution.                                                                                                                                                          |
06 | Yes/No | Unit integrated and synchronized across all command echelons and warfighting functions as part of the operations process.                                                                                                                                                       |
07 | Yes/No | Unit coordinated electronic warfare and cyberspace operations that ensured synergistic application and maximum effectiveness.                                                                                                                                              |

ART 5.9.1.1 INTEGRATE OFFENSIVE CYBERSPACE OPERATIONS

5-141. Units plan, coordinate and integrate, offensive cyberspace operations to create and achieve desired effects in support of the commander’s objectives. (FM 3-38) (USACOE)

No. | Scale  | Measure                                                                                                                                                                                                                                                                                                                                 |
---|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
01 | Yes/No | Unit performed planning and targeting processes and identified, selected, and developed targets for engagement by offensive cyberspace operations means.                                                                                                                                 |
02 | Yes/No | Unit reviewed selected targets for compliance with rules of engagement and authorities specific to cyberspace operations.                                                                                                                                                       |
03 | Yes/No | Unit developed and submitted cyber effects request formats for selected targets.                                                                                                                                                                                                                                                       |
04 | Yes/No | Unit coordinated and conducted information collection in support of offensive cyberspace operations to gain and maintain access to physical and logical networks and to prepare for follow-on offensive cyberspace operations.                                                                        |
05 | Yes/No | Unit planned, coordinated, integrated, and conducted (as applicable) cyberspace attacks and achieved simultaneous and complementary effects in support of the scheme of maneuver.                                                                                              |
06 | Yes/No | Unit obtained and applied combat and battle damage assessments for targets engaged by cyberspace attack means.                                                                                                                                                                  |
ART 5.9.1.2 CONDUCT DEFENSIVE CYBERSPACE OPERATIONS

5-142. Units conduct passive and active defensive cyberspace operations to preserve the ability to utilize friendly cyberspace capabilities and protect data, networks, net-centric capabilities, and other designated systems. (FM 3-38) (USACCOE)

<table>

ART 5.9.1.5 DEVELOP CYBERSPACE SITUATIONAL AWARENESS

5-145. Units develop and provide cyberspace situational awareness to gather, process, and communicate relevant information to enable cyberspace operations. (FM 3-38) (USACCOE)
ART 5.9.2 CONDUCT ELECTRONIC WARFARE

5-146. Electronic warfare is military action involving the use of electromagnetic and directed energy to control the electromagnetic spectrum or to attack the enemy. Electronic warfare consists of three divisions: electronic attack, electronic protection, and electronic warfare support. (JP 3-13.1) (JS)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

ART 5.9.2.1 CONDUCT ELECTRONIC ATTACK

5-147. Electronic attack is division of electronic warfare involving the use of electromagnetic energy, directed energy, or antiradiation weapons to attack personnel, facilities, or equipment with the intent of degrading, neutralizing, or destroying enemy combat capability and is considered a form of fires. (JP 3-13.1) (JS)

Note: Electronic attack has both offensive and defensive capabilities. Electronic attack includes actions taken to prevent or reduce an enemy’s effective use of the electromagnetic spectrum, such as jamming and electromagnetic deception; employment of weapons that use either electromagnetic or directed energy as their primary destructive mechanism (lasers, radio frequency weapons, particle beams); and offensive and defensive activities including countermeasures.

ART 5.0: Conduct Mission Command

ART 5.9.2.2 PERFORM ELECTRONIC PROTECTION ACTIONS

5-148. *Electronic protection* is division of electronic warfare involving actions taken to protect personnel, facilities, and equipment from any effects of friendly or enemy use of the electromagnetic spectrum that degrade, neutralize, or destroy friendly combat capability. Electronic protection includes the hardening of equipment and facilities from the effects of electronic warfare (EW); emission control procedures and measures as outlined in ART 5.9.2.4 (Maintain Emission Control); and the efficient management of the electromagnetic spectrum as outlined in ART 5.9.3 (Conduct Electromagnetic Spectrum Operations). (JP 3-13.1) (JS)

ART 5.9.2.3 PROVIDE ELECTRONIC WARFARE SUPPORT

5-149. *Electronic warfare support* is division of electronic warfare involving actions tasked by, or under direct control of, an operational commander to search for, intercept, identify, and locate or localize sources
of intentional and unintentional radiated electromagnetic energy for the purpose of immediate threat
recognition, targeting, planning and conduct of future operations. (JP 3-13.1) (JS)

**ART 5.9.3 CONDUCT ELECTROMAGNETIC SPECTRUM OPERATIONS**

5-151. Electromagnetic spectrum operations are the conduct of spectrum management, frequency assignments, policy implementation, and host-nation coordination that enables the commander’s effective use of the electromagnetic spectrum. (FM 6-02.70) (USACCOE)
ART 5.0: Conduct Mission Command

02 October 2015 ADRP 1-03 5-67

No. | Scale | Measure
---|---|---
01 | Yes/No | Unit provided appropriate guidance and necessary coordination to deconflict interference with other friendly uses of the electromagnetic spectrum.
02 | Yes/No | Unit obtained clearance (or approval) from host nation for the use of the electromagnetic spectrum (through existing coordination procedures).
03 | Yes/No | Unit ensured assigned military forces were authorized sufficient use of the electromagnetic spectrum to accomplish their designated missions.
04 | Yes/No | Unit developed and distributed plans for appropriately using electromagnetic spectrum that included frequency reuse and sharing schemes for specific frequency bands.
05 | Yes/No | Unit maintained the necessary database that contained information on all friendly, available, adversary, and selected neutral or civil spectrum emitters or receivers.
06 | Yes/No | Unit established and maintained a close working relationship with the frequency management personnel.

ART 5.9.3.1 PERFORM SPECTRUM MANAGEMENT

5-152. The electromagnetic spectrum manager at all echelons enables units to use information from an electromagnetic environment for planning and execution of operations. This information helps units determine the impact an electromagnetic environment will have on the maneuver force, incorporate electromagnetic environment information into the commander’s common operational picture, prioritize spectrum use, nominate and deconflict spectrum resources, use Army and joint reprogramming data for electronic warfare systems, and include satellite spectrum information into spectrum databases. (FM 6-02.70) (USACCOE)

| No. | Scale | Measure
---|---|---
01 | Yes/No | Unit managed electromagnetic spectrum to satisfy mission requirements and met commander’s intent.
02 | Yes/No | All systems operated with no interference.
03 | Yes/No | Unit maintained databases.
04 | Time | To convert raw data to a useable format.
05 | Time | To deconflict electromagnetic spectrum assignments.
06 | Time | To evaluate environmental effects.
07 | Time | To resolve frequency interference.
08 | Time | To coordinate electronic warfare issues.
09 | Time | To process interference report.
10 | Time | To coordinate, develop, and publish a joint restricted frequency list.
11 | Time | To coordinate with network managers.
12 | Number | Of frequency assignments managed.
13 | Number | Of systems requiring electromagnetic spectrum.

ART 5.9.3.2 PERFORM FREQUENCY ASSIGNMENT

5-153. The electromagnetic spectrum manager at all echelons provides explicit interference analysis and automated frequency assignment to the operator for all spectrum-dependent devices in the area of operations. (FM 6-02.70) (USACCOE)

| No. | Scale | Measure
---|---|---
01 | Yes/No | Unit requested sufficient frequencies to meet mission requirements.
02 | Yes/No | Sufficient frequencies were available to meet mission requirements.
03 | Yes/No | Unit utilized frequency re-use plans to efficiently use the electromagnetic spectrum.
04 | Time | To generate radio load sets and frequency plans.
05 | Time | To build communications-electronics operating instructions.
ART 5.9.3.3 PERFORM HOST-NATION ELECTROMAGNETIC COORDINATION

5-154. Each nation has sovereignty over its electromagnetic spectrum. The use of the electromagnetic spectrum must be negotiated on a case-by-case basis. Approval to transmit within a country is based on the sovereignty of that country and their regulatory processes that evaluate the Department of Defense request for use of spectrum perceived potential for electromagnetic interference to local receivers. Use of military or commercial electromagnetic spectrum systems in host nations requires coordination and negotiation that result in formal approvals and certifications. (JP 6-0.1) (JS)

<td>Time</td>
<td>To design the frequency plan for area networks.</td>
</tr>
</tbody>
</table>

ART 5.9.3.4 MONITOR SPECTRUM MANAGEMENT POLICY ADHERENCE

5-155. International use of the electromagnetic spectrum is coordinated globally through the International Telecommunications Union. The Military Communications-Electronics Board is the main coordinating body for signal matters among Department of Defense (DOD) components. The main enforcement mechanism for DOD systems is the Spectrum Certification process (the frequency allocation to equipment process utilizing the DD Form 1494 *Application for Equipment Frequency Allocation*), which must be completed for all systems and equipment that emit or receive radio frequencies. (JP 6-0.1) (JS)

Commanders rely on technical networks to communicate information and control forces. Technical networks facilitate information flow by connecting information users and information producers and enable effective and efficient information flow. Technical networks help shape and influence operations by getting information to decision makers, with adequate context, enabling them to make better decisions. They also assist commanders in projecting their decisions across the force. (ADRP 6-0) (USACAC)

ART 5.10.1 PROVIDE NETWORK TRANSPORT AND INFORMATION SERVICES

5-157. Network transport and information services are the combined physical assets and activities to ensure that data reliably transverses the network and is available as information to the user. Network transport is a system of systems including the people, equipment, and facilities that provide end-to-end communications connectivity for network components. Information services enable the planning, controlling, and manipulating of information throughout its lifecycle. They include, but are not limited to, Web services, e-mail, common directories, search services, and data services. Information services allow forces to access, store, and share information among unified action partners and civilian organizations, as well as dynamically tailor and prioritize information requirements to support the mission and affect an operational environment. The resources to connect the clients may belong to United States Services, non-United States Services, host-nation assets, or commercial assets. (FM 6-02) (USACCOE)

ART 5.10.2.1 CONDUCT ENTERPRISE SYSTEMS MANAGEMENT AND NETWORK MANAGEMENT

5-159. Units that perform this task engineer, install, operate, manage, maintain, and restore LandWarNet communication and computer networks, systems, and applications to achieve information advantage in support of operations. Network management provides networked system services with the desired level of quality and guaranteed availability. Systems management comprises all measures necessary to ensure effective and efficient operation of information systems, elements of systems, and services. (FM 6-02.71) (USACCOE)

ART 5.0: Conduct Mission Command

5-160. Units that perform this task provide the Army’s portion of the Department of Defense information networks (LandWarNet) warfighting intelligence and business domains at all levels (strategic, operational, and tactical) with awareness of relevant, accurate information; automated access to newly discovered or recurring information; and timely, efficient, and assured delivery of information in a usable format. (FM 6-02.71) (USACCOE)

ART 5.10.2.2 CONDUCT INFORMATION DISSEMINATION MANAGEMENT AND CONTENT STAGING

5-160. Units that perform this task provide the Army’s portion of the Department of Defense information networks (LandWarNet) warfighting intelligence and business domains at all levels (strategic, operational, and tactical) with awareness of relevant, accurate information; automated access to newly discovered or recurring information; and timely, efficient, and assured delivery of information in a usable format. (FM 6-02.71) (USACCOE)

ART 5.10.2.3 CONDUCT CYBERSECURITY

5-161. Cybersecurity prevents damage to, protection of, and restoration of computers, electronic communications systems, electronic communications services, wire communication, and electronic communication, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and nonrepudiation. Cybersecurity functions consist of identify, protect, detect, respond, and recover. Cybersecurity aids an organization in expressing its management of cybersecurity risk by organizing information, enabling risk management decisions, addressing threats, and improving by learning from previous activities. (FM 6-02.71) (USACCOE)

SECTION XI – ART 5.11: CONDUCT MILITARY DECEPTION

5-168. *Military deception* are actions executed to deliberately mislead adversary military, paramilitary, or violent extremist organization decision makers, thereby causing the adversary to take specific actions (or inactions) that will contribute to the accomplishment of the friendly mission (JP 3-13.4). Military deception targets adversary decision makers causing those decision makers to take an action or inaction that can be exploited by friendly forces. (ADRP 6-0) (USACAC)

<td>Percent</td>
<td>Of friendly military deception operations that resulted in the enemy reallocating its resources.</td>
</tr>
</tbody>
</table>
ART 5.11.1 PLAN MILITARY DECEPTION

5-169. Plan military deception is the planning of actions to mislead enemy or adversary military decision makers deliberately as to friendly military capabilities, intentions, and operations. Military deception attempts to cause the enemy or adversary to take specific actions (or inactions) that contribute to accomplishing the friendly mission. Military deception includes but is not limited to simulative deception, simulative electronic deception, imitative electronic deception, and manipulative electronic deception. (ADRP 6-0) (USACAC)

ART 5.11.2 PERFORM COUNTERDECEPTION

5-170. Counterdeception is the effort to negate, neutralize, diminish the effects of, or gain advantage from foreign deception operations. Counterdeception contributes to situational understanding by protecting friendly human and automated decision making from adversary deception. Counterdeception strives to make Army commanders aware of adversary deception activities so they can formulate informed and coordinated responses. (JP 3-13.4) (JS)

SECTION XII – ART 5.12: SYNCHRONIZE INFORMATION-RELATED CAPABILITIES

5-171. The Army conducts information operations to achieve an operational advantage in the information environment by synchronizing information-related capabilities to affect threat decision making, while protecting our own; align words, deeds and images; and engage relevant foreign audiences. Information-related capabilities are capabilities that affect the people, organizations, and systems that compose the information environment, such as military information support operations, combat camera, electronic warfare, cyberspace operations, and public affairs. Additionally, the Army supports information operations with specialized information operations units that plan, synchronize, and assess employment of information-related capabilities and expeditionary cyberspace operations. These organizations provide an array of deployable support teams, reach-back and analysis, and specialized information-related capabilities training. (FM 3-13) (USACAC)

</tr>
</tbody>
</table>
### ART 5.12.1 INTEGRATE INFORMATION-RELATED CAPABILITIES

5-172. Units integrate information-related capabilities to achieve operational advantage in the information environment. Operational advantage is achieved through the creation of effects that achieve one or more of the following: influence, disrupt, corrupt, or usurp threat decision making; protect friendly networks and their systems and information; align narratives, themes, messages, and actions with the commander’s intent, concept of operations, and desired end state; and engage relevant foreign audiences to influence behavior in concert with the commander’s intent and desired end state. ART 5.12.2 SUPPORT INFORMATION OPERATIONS

5-173. The Army supports information operations (IO) by providing specialized IO capabilities to land operations. IO support aims to protect and defend friendly use of information, information systems, and human and automated decision making. IO support aims to attack, degrade, deny, and disrupt enemy, adversary, or other’s use of information, information systems, and human and automated decision making. IO specialized support units and activities at echelons above corps plan, coordinate, synchronize, and assess employment of capabilities to support IO for the Army and other land forces. Army units use dedicated activities of deployable support teams, reachback planning and analysis, and specialized training to enable and sustain military freedom of action in the information environment while denying the same to the adversaries. (FM 3-13) (USACAC)

ART 5.12.2.1 SYNCHRONIZE INFORMATION OPERATIONS

5-174. The synchronization of information operations includes all information-related capabilities in concert with other lines of operation used to affect the decision-making cycle of adversaries. Information operations integration is characterized by the planning, coordination, and synchronization of policies and procedures, operations, personnel, and technology. This integration aims to protect and defend friendly use of information, information systems, and human and automated decision making, and to affect enemy, adversary and other’s use of information, information systems, and human and automated decision making. ART 5.12.2.2 CONDUCT INFORMATION OPERATIONS SUPPORT TO TARGETING AND ASSESSMENT

5-175. Units perform this task to systematically analyze the information environment, the entities operating within it, associated observable and quantifiable information activities, and information (flow and content) transiting through or residing in the environment. These units determine (subjectively or empirically) the affect this analysis has on current operations or could conceivably have on planned operations. Units identify potential information environment effects on targets, infrastructure, systems, and system components to be engaged by the unit. Then units subsequently determine the extent of damage or disruption inflicted upon enemy and adversary information and information systems, infrastructure, facilities, personnel, or activities. Lastly, units extrapolate the impact this analysis will have on friendly operations. (FM 3-13) (USACAC)

ART 5.12.2.3 CONDUCT INFORMATION OPERATIONS INTELLIGENCE SUPPORT

5-176. Units perform this task to collect, process, analyze, and provide information to identify critical enemy or adversary command and control nodes, information and information systems, personnel, infrastructure, facilities, resources, processes, and activities. They also collect, process, analyze, and provide information to identify and quantify data and information transiting or residing within that portion of the information environment most relevant to the current or planned operation. Lastly, these units identify enemy or adversary courses of actions and targets of opportunity within the information environment and assess the effectiveness of friendly actions taken to deny, disrupt, or degrade enemy or adversary activities within the information environment. SECTION XIII – ART 5.13: CONDUCT SOLDIER AND LEADER ENGAGEMENT

5-177. **Soldier and leader engagement** is interpersonal interactions by Soldiers and leaders with audiences in an area of operations. It can occur as an opportunity, face-to-face encounter on the street, or as a scheduled meeting. This interaction can also occur via telephone calls, video teleconferences, or other audiovisual mediums. Soldiers and leaders conduct this engagement to provide information or to influence attitudes, perceptions, and behavior. It provides a venue for building relationships, resolving conflict, conveying information, calming fears, and refuting rumors, lies, or incorrect information. Effectively integrating Soldier and leader engagement into operations increases the potential for commanders to mitigate unintended consequences, counter adversary information activities, and increase local support for friendly forces and their collective mission. (FM 3-13) (USACAC)

**Note:** This task is supported by ART 2.4.2 (Provide Intelligence Support to Information-Related Capabilities).

ART 5.13.1 PLAN FOR SOLDIER AND LEADER ENGAGEMENT

5-178. Deliberate Soldier and leader engagement planning involves developing the commander’s intent, commander’s themes, mission narrative, mission statement, intelligence preparation of the battlefield, rules of engagement, and assessment of the area of operations. Commanders determine who to engage, when to engage, and where to engage during their intelligence preparation of the battlefield (IPB) planning efforts. When deciding who is involved, commanders identify the key informal and formal leaders, key communicators, actors, and other influential personalities within the area of operations. Soldier and leader engagements are deliberately planned using the analysis conducted during IPB. Critical to this process is the social and link analysis to determine the scope of influence that each engagement may have. Properly identifying leader engagement maximizes the second- and third-order effects of the delivered messages. Leader engagement targets with a broader scope of influence can potentially create a larger cascading effect across the area of operations. The commander recommends engagements to the next higher commander for approval as a part of unit battle rhythm and targeting cycle decision briefs. (FM 3-13) (USACAC)

ART 5.0: Conduct Mission Command

ART 5.14.2 EXECUTE MILITARY INFORMATION SUPPORT OPERATIONS

MISOS forces conduct MISO by influencing foreign audiences through planned, coordinated, and targeted delivery of culturally attuned messages and psychological actions. MISOS forces advise the commander on the psychological effects of military activities, conduct analysis to determine most appropriate targets within the area of operations, and determine the dissemination methods and platforms most likely to achieve the commander’s objectives. Commanders derive their authorities to execute MISO from both the MISO program approved by the Under Secretary of Defense for Policy and from a Chairman of the Joint Chiefs of Staff execution order, state department, or chief of mission. This guidance collectively shapes how MISO assets write, synchronize, and deliver messages and actions. (FM 3-53) (USAJFKSWCS)

**ART 5.15.1 CONDUCT CIVIL INFORMATION MANAGEMENT**

5-189. Civil information is information developed from data with relation to the civil areas, structures, capabilities, organizations, people, and events, within the civil component of a commander’s operational environment that can be fused or processed to increase situational understanding. Civil information management is the ability to use automation devices to conduct civil reconnaissance separately from traditional military intelligence systems while maintaining the ability to geo-reference and interface pertinent civil and threat data. Soldiers use civil information management to develop civil inputs for the common operational picture of the operational area and to establish and maintain a situation map. (FM 3-57) (USAJKFSCWCS)

ART 5.15.4.1 PROVIDE RULE OF LAW SUPPORT

5-193. Rule of law pertains to the fair, competent, and efficient application of and fair and effective enforcement of civil and criminal laws of a society through impartial legal institutions and competent police and corrections systems. This functional area includes judge advocates trained in international and comparative law as well as civil affairs specialists in related subjects. (FM 3-57) (USAJFKSWCS)

*Note: FM 3-07 states “rule of law means that all persons, institutions, and entities, including the state itself, are accountable to laws that are publicly promulgated, equally enforced, independently adjudicated, and consistent with international human rights principles.”*

ART 5.15.7 CONDUCT CIVIL-MILITARY OPERATIONS

5-201. Civil-military operations (CMO) are the activities of a commander that establish, maintain, influence, or exploit relations between military forces, governmental and nongovernmental civilian organizations and authorities, and the civilian populace in a friendly, neutral, or hostile operational area to facilitate military operations while consolidating and achieving United States (U.S.) objectives. CMO may include performance by military forces of activities and functions normally the responsibility of national, regional, or local government. These activities may occur before, during, or after other military actions. They may also occur, if directed, in the absence of other military operations. CMO may be performed by designated civil affairs (CA) forces, by other military forces, or by a combination of CA and other forces. (FM 3-57) (USAJFKSWCS)

Chapter 6
ART 6.0: The Protection Warfighting Function

The protection warfighting function is the related tasks and systems that preserve the force so the commander can apply maximum combat power to accomplish the mission. Preserving the force includes protecting personnel (combatants and noncombatants), physical assets, and information of the United States and multinational military and civilian partners. The protection warfighting function facilitates the commander’s ability to maintain the force’s integrity and combat power. Protection determines the degree to which potential threats can disrupt operations and counters or mitigates those threats. Emphasis on protection increases during preparation and continues throughout execution. Protection is a continuing activity; it integrates all protection capabilities to safeguard bases, secure routes, and protect forces. (ADRP 3-0) (USACAC)

SECTION I – ART 6.1: COORDINATE AIR AND MISSILE DEFENSE

The air defense system protects the force from missile attack, air attack, and aerial surveillance by any of the following: interceptor missiles, ballistic missiles, cruise missiles, conventional fixed- and
rotary-wing aircraft, and unmanned aircraft systems. It prevents enemies from interdicting friendly forces, while freeing commanders to synchronize movement and firepower. All members of the combined arms team perform air defense tasks; however, ground-based air defense artillery units execute most Army air defense operations. ART 6.1 includes fires at aerial platforms by both dedicated air defense systems and nondedicated weapon systems. (FM 3-27) (USASMDC)

*Note:* The air and missile defense tasks located in the fires warfighting function contribute to the protection warfighting function by defeating aerial attack, missile attack, and surveillance and by detecting and destroying incoming enemy rockets, cruise missiles, and artillery and mortar projectiles while in flight.

### ART 6.1.1 PLAN BALLISTIC MISSILE DEFENSE

6-2. Units plan and coordinate protection of the homeland and operational forces from ballistic missile attack by direct defense and by destroying the enemy’s missile capacity. They determine essential requirements to accomplish the mission using ballistic missile defense weapons defensively to defend, detect, defeat, deter, and protect. Centralized planning for missile defense includes the protection of operational forces in the combatant commander’s area of responsibility and destroying ballistic missile platforms in flight. Missile defense operations include all forces and activities that support active defense, passive defense, and attack operations. (FM 3-27) (USASMDC)

</table>

### ART 6.1.2 CONDUCT BALLISTIC MISSILE DEFENSE

6-3. Units defend an assigned area of interest, friendly forces, and infrastructure from ballistic missile attack. They conduct active ballistic missile defense operations to negate significant enemy missile attack. Missile defense activities are designed to destroy enemy exo- or endo-atmospheric missiles, or to nullify or reduce the effectiveness of such attack. Units destroy hostile missiles per rules of engagement. They provide ballistic missile warning support to the Soldier using contributing sensors. (FM 3-27) (USASMDC)

</tbody>
</table>

**ART 6.1.3 MANAGE SYSTEM CONFIGURATION**

6-4. Units maintain optimal system configuration to support ballistic missile defense operations necessary to respond operationally and tactically. They identify and minimize degrading effects on readiness and maintain directed readiness condition. Effective units are familiar with a system element’s (to include supporting sensors) capabilities and limitations, so units can adjust the system configuration to ensure the optimal defense. Units assess preplanned maintenance, test, and exercise requests to modify system configuration. Units determine the impact on the ballistic missile defense mission. Units approve or disapprove requested modification. They ensure approved preplanned configuration changes are executed on time. Units assess real-time (unplanned) system element outage impact on the ballistic missile defense mission. They decide or direct relevant information to the right person, at the right time, in a usable format, to facilitate situational understanding and decision making. (FM 3-27) (USASMDC)

<table>

ART 6.1.4 PERFORM ASSET MANAGEMENT

6-5. Units manage assets that support the ballistic missile defense system. Soldiers monitor and manage changes to assets to support ballistic missile defense operations necessary to respond operationally and tactically. Soldiers identify to the commander and minimize any degrading effects of changes on readiness and maintain directed readiness condition. Soldiers are familiar with the system element’s (to include supporting sensors) capabilities and limitations so they can adjust the system configuration to ensure the optimal defense. They assess preplanned maintenance, test, and exercise requests to modify the system configuration. Unit commanders recommend approval or disapproval of requested modification through proper channels for combatant commander. Soldiers assess real-time (unplanned) system element outage impact on the ballistic missile defense mission. Units make appropriate changes to the ballistic missile defense system health and status or operational capability as required. They advise the combatant commander in determining the ballistic missile defense system capability. Units decide or direct relevant information to the right person, at the right time, and in a usable format to facilitate situational understanding and making decisions. (FM 3-27) (USASMDC)

ART 6.1.5 PROVIDE GLOBAL MISSILE DEFENSE CAPABILITIES

6-6. Units prepare global force management procedures, provide global missile defense (GMD) forces, support force protection and its capabilities, and develop missile defense crisis action planning courses of action. GMD plans and operations include active and passive ballistic missile defense operations and attack operations to defeat ballistic missile attacks in all phases of flight. GMD capabilities are designed to neutralize, destroy, or reduce the effectiveness of enemy ballistic missile attacks, whether within or across any geographical combatant commander’s boundaries. </table>

SECTION II – ART 6.2: CONDUCT PERSONNEL RECOVERY OPERATIONS

6-7. Personnel recovery (PR) operations are conducted to recover and return personnel—whether military or Army civilian—or selected Department of Defense contractors who are isolated in an operational environment. Isolated personnel are beyond the positive or procedural control of their unit, in an operational environment requiring them to survive, evade, resist, or escape. It is every unit’s task to have procedures in
place to be ready to recover personnel, contractor, or others as designated by the President or Secretary of Defense. (FM 3-50) (USACAC)

</table>

**ART 6.2.1 PLAN PERSONNEL RECOVERY OPERATIONS**

6-8. Units develop personnel recovery (PR) readiness plans during the operational planning phase. This ART includes integrating PR into all efforts during peacetime to organize, train, and equip to accomplish missions. Led by the PR section, PR planning actions include participation of commanders and their staffs, units, and individuals. PR planning consists of reviewing and developing PR guidance, acquiring PR equipment, ensuring PR administrative requirements are met, and conducting PR-focused education and training. Vertical and horizontal coordination of the PR plan is the primary responsibility of the PR section. (FM 3-50) (USACAC)

ART 6.2.1.2 PLAN PERSONNEL RECOVERY COORDINATION CELL AND PERSONNEL RECOVERY OFFICERS CAPABILITY

6-10. While the staff members collect personnel recovery (PR)-related information in their functional areas, a central point for gathering the information from all the staff members is required to establish a usable common operational picture. The personnel recovery coordination cells (PRCCs) at the division level and PR officers at brigade and below are the fusion points for the staffs’ collaborative efforts to gather PR-related information for their respective units. PRCCs and officers coordinate with the individual staff members to collect, process, store, display, and disseminate this information. PRCCs and officers are collectively referred to as PR sections. (FM 3-50) (USACAC)

</tbody>
</table>

ART 6.2.2 PREPARE FOR PERSONNEL RECOVERY OPERATIONS

6-11. Units perform personnel recovery (PR)-related tasks in planning and preparing for deployment. Unit PR personnel update and obtain equipment and materials necessary to accomplish assigned mission. Commanders and staffs ensure adequate PR capability is programmed into personnel and equipment flow to ensure ability to support the force. PR personnel must be included in the preparation for the six phases of deployment: pre-mobilization, mobilization, deployment, employment, sustainment, and redeployment preparation. These activities include, but are not limited to, a force deployment list and equipment included in the updated deployment equipment list. PR organizations ensure that all unit personnel complete all necessary PR deployment requirements. (FM 3-50) (USACAC)

</tbody>
</table>

ART 6.2.2.1 CONDUCT PREDEPLOYMENT PERSONNEL RECOVERY ACTIVITIES

6-12. Units conduct personnel recovery (PR)-related mobilization activities by obtaining specific PR guidance from the supported combatant commander. Units focus previous training and tailor existing guidance to the specific requirements of the supported combatant command. Examples of combatant command guidance include theater PR regulations, appendix 5 to annex C of joint operation plans and orders, theater PR standard operating procedures, PR special instructions, and isolated Soldier guidance. (FM 3-50) (USACAC)

<td>Yes/No</td>
<td>Unit updated all PR standard operating procedures and other guidance to synchronize with theater PR guidance as necessary.</td>
</tr>
</tbody>
</table>

ART 6.2.2.2 DEPLOY PERSONNEL RECOVERY CAPABILITY AND BUILD COMBAT POWER

6-13. During deployment, commanders determine who will provide personnel recovery (PR) coverage for their arriving forces. Until commanders can build sufficient combat power to provide PR for their forces, other forces in theater must provide PR support. Units build combat power through reception, staging, onward movement, and integration (RSOI). Early and continuous connectivity with the theater PR architecture enables commanders to report isolated personnel incidents during deployment. This also allows commanders to report unit status when ready to assume responsibility for assigned PR missions. (FM 3-50) (USACAC)

</tbody>
</table>

ART 6.2.2.3 SUSTAIN PERSONNEL RECOVERY CAPABILITIES

6-14. Units sustain personnel recovery (PR) capabilities during the conduct of operations by having commander, staffs, units, and individuals refine their skills. Units conduct rehearsals to exercise battle drills to ensure proficiency. New and replacement personnel will require training and equipment. PR coordinating messages are prepared and disseminated per unit standard operating procedures. Commanders establish and maintain personnel accountability procedures. Communications architectures are established and maintained to ensure operational capabilities. (FM 3-50) (USACAC)

</tbody>
</table>

ART 6.2.2.4 REDEPLOY PERSONNEL RECOVERY CAPABILITIES

6-15. As units redeploy, either back to continental United States (CONUS) or to another area of operations (AO), actions accomplished for personnel recovery (PR) are similar to those undertaken during deployment. An important task is the transfer of PR responsibility, including the key task of transferring lessons learned gathered during after action reviews. When units redeploy to CONUS, PR responsibility for the AO transfers to incoming forces. If redeploying to another AO, units integrate into that AO’s established PR architecture or build one if it does not exist. (FM 3-50) (USACAC)

<td>Unit ensured counterintelligence debriefing of recovered personnel.</td>
</tr>
</tbody>
</table>
ART 6.2.3 COORDINATE PERSONNEL RECOVERY OPERATIONS

6-16. Personnel recovery (PR) coordination is a continuous process during all phases of PR operations. The staff assists the commander in coordinating recovery operations through the combination of positive and procedural control. The PR section continuously assists the commander in coordinating recovery operations by recommending required assets to support the recovery operation. The PR section also coordinates, directs, and makes requests to higher and adjacent headquarters as necessary to synchronize the recovery effort by providing execution information required to facilitate situational understanding to make timely decisions regarding the reporting, locating, supporting, recovering, and re-integrating isolated persons as appropriate. (FM 3-50) (USACAC)

<td>09</td>
<td>Yes/No</td>
<td>PR section coordinated deployment of reconnaissance and surveillance assets in support of PR operations.</td>
</tr>
</tbody>
</table>

ART 6.2.3.1 CONDUCT UNASSISTED PERSONNEL RECOVERY

6-17. Units conduct unassisted personnel recovery (PR) to achieve their own recovery without outside assistance. An unassisted recovery typically involves an evasion effort by isolated personnel to get back to friendly forces or to a point where they can be recovered via another method. While the code of conduct requires isolated personnel to make every effort to evade or escape, commanders strive to recover these personnel via one or a combination of the other methods. (FM 3-50) (USACAC)

<td>The system provided for accurate record keeping without degrading the PR effort.</td>
</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>The primary mission continued parallel to the recovery effort.</td>
</tr>
</tbody>
</table>

ART 6.2.3.2 CONDUCT IMMEDIATE PERSONNEL RECOVERY

6-18. Units conduct immediate personnel recovery (PR) operations to locate and recover isolated personnel by forces directly observing the isolating event or through the reporting process once it is determined that isolated personnel are close enough for forces to conduct a rapid recovery. Immediate recovery assumes that the tactical situation permits a recovery with the forces at hand without detailed planning or coordination. (FM 3-50) (USACAC)
ART 6.2.3.3 CONDUCT DELIBERATE PERSONNEL RECOVERY

6-19. Units conduct deliberate personnel recovery (PR) when an incident is reported and when immediate recovery is not feasible or was not successful. Weather; enemy actions; location of isolated, missing, detained, or captured personnel; and recovery force capabilities are examples of factors that may require the detailed planning and coordination of a deliberate recovery. (FM 3-50) (USACAC)

</tr>
<tr>
<td>03</td>
<td>Yes/No</td>
<td>The primary mission continued parallel to the recovery effort.</td>
</tr>
</tbody>
</table>

ART 6.2.3.4 CONDUCT EXTERNAL SUPPORTED PERSONNEL RECOVERY

6-20. Units conduct external supported personnel recovery (PR) when immediate or deliberate recovery is not feasible or was not successful. External supported personnel recovery is either the support provided by the Army to other joint task force components, interagency organizations, or multinational forces or the support provided by these entities to the Army. Close air support, information collection, and airborne command and control are examples of capabilities that may be required from different components to execute an external supported recovery. (FM 3-50) (USACAC)

ART 6.2.3.5 DEVELOP PERSONNEL RECOVERY GUIDANCE

6-21. The staff develops personnel recovery (PR) guidance by translating the commander’s visualization through the military decisionmaking process (MDMP) into specific courses of action to ensure the incorporation of PR into all operations and missions. The planning effort fosters mission command and results in developed and disseminated PR guidance to subordinates. The PR guidance results in the development and dissemination of isolated Soldier guidance at the appropriate level of command. (FM 3-50) (USACAC)

ART 6.4.1 CONDUCT AREA AND BASE SECURITY OPERATIONS

6-26. Area and base security operations are a specialized area security operation. These operations protect friendly forces, installations, and actions in the support area. They include measures taken by military units, activities, and installations to protect themselves from acts designed to impair their effectiveness. (ADRP 3-37) (USAMSCOE)
### ART 6.0: The Protection Warfighting Function

#### ART 6.4.2 CONDUCT CRITICAL INSTALLATIONS AND FACILITIES SECURITY

6-27. Units use protective measures to prevent or reduce the effects of enemy hostile acts (such as sabotage, insurgent actions, and terrorist attacks) against unit critical facilities and systems designated as a Level I

ART 6.4.3 ESTABLISH LOCAL SECURITY

6-28. Local security protection ranges from echelon headquarters to reserves and sustainment forces. Local security can be part of the sustaining base or part of the area infrastructure. Local security includes all measures to protect friendly forces from attack, surprise, observation, detection, interference, espionage, terrorism, and sabotage. ART 6.4.3 enhances the freedom of action of tactical units in an area of operations by identifying and reducing friendly vulnerability to hostile acts, influence, or surprise. (ADRP 3-37) (USAMSCOE)

ART 6.4.3.6 EMPLOY INTRUSION DETECTION DEVICES

6-34. Employment of intrusion detection devices includes conducting site surveys and installing and operating intrusion detection systems to protect Army installations, personnel, operations, and critical resources in both tactical and nontactical situations. (ATP 3-39.32) (USAMPS)
### ART 6.4.3.7 CONDUCT COMMAND POST SECURITY

6-35. Units prevent disruption due to enemy forces penetrating the perimeter around a command post or the rapid forced displacement of the command post due to the presence of enemy forces. Security of command posts at all levels is essential to the continuity and successful exercise mission command. Security is achieved by using security forces, air defense, camouflage, traffic control, electronic countermeasures, and frequent displacements. (ATP 3-39.32) (USAMPS)

ART 6.4.5 CONDUCT RESPONSE FORCE OPERATIONS

6-37. Response force operations include the planning for defeat of Levels I and II threats and the shaping of Level III threats until the designated tactical combat force arrives for decisive operations. Response force operations use a mobile force with appropriate fire support to deal with Level II threats in the area of operations. (ATP 3-91) (USACAC)

ART 6.4.5.1 CONDUCT BATTLE HANDOVER FROM BASE AND BASE CLUSTER SECURITY FORCES TO RESPONSE FORCES

6-38. Units transfer responsibility for fighting an enemy from the base or base cluster commander to the commander of the response force. (FM 3-90-1) (USACAC)

ART 6.0: The Protection Warfighting Function

ART 6.4.6 SECURE SUPPLY ROUTES AND CONVOYS

6-40. Security and protection of supply routes and convoys in the area of operations is critical to military operations since most traffic supporting military operations moves along these routes. Plans to provide main supply route security may include designating units for convoy security, providing guidance for units to provide their own security during convoys, or establishing protection and security requirements for convoys carrying critical assets. (ATP 4-01.45) (USACAC)

ART 6.4.6.1 CONDUCT CONVOY SECURITY OPERATIONS

6-41. Convoy security operations protect convoys. Units conduct convoy security operations any time there are not enough friendly forces to continuously secure lines of communications in an area of operations, and there is a danger of enemy ground action against the convoy. Convoy security operations are defensive in nature and orient on the protected force. (ATP 4-01.45) (USACAC)

<table>
<thead>
<tr>

</tbody>
</table>

Operations of the convoy security forces provided the protected convoy with sufficient reaction time and maneuver space to avoid contact with significant enemy forces.

Convoy crossed start point and release point at the times indicated in the operation order.

Fratricide did not occur.

The convoy escort oriented its operations on the movement of the protected convoy.

Collateral damage was minimized to protect and respect noncombatants and their property, consistent with the mission, law of land warfare, and rules of engagement.

Convoy screening elements provided early and accurate warning of enemy forces located along the route used by the convoy or moving toward the convoy’s route.

To conduct coordination with escorted unit and conduct troop leading procedures.

To obtain route information.

To designate reconnaissance, screen, escort, and reaction force elements, and move these elements into position.

To conduct convoy security operation.

For reaction force elements to respond.

Of convoy element casualties.

Of convoy escort casualties.

Of convoys provided convoy escorts.

Of available combat power in area used to provide convoy escorts including reaction forces.

Of decreased support capability of sustainment units due to the requirement to provide convoy escort forces from internal assets.

Of increased supply amounts transported along a line of communications or main supply route due to the presence of convoy escorts.

And types of forces used to provide convoy escorts.

And types of enemy forces operating in the echelon sustainment area.

Of convoy escort casualties during the operation.

Of obstacles encountered, bypassed, and breached during the conduct of convoy security operations.
ART 6.4.6.2 CONDUCT ROUTE SECURITY OPERATIONS

6-42. Route (including highway, pipeline, rail, and water) security operations protect lines of communications and friendly forces moving along them. Units conduct route security missions to prevent enemy ground forces from moving into direct fire range of the protected route. Route security operations are defensive in nature and terrain oriented. (ADRP 3-37) (USAMSCOE)

<table>

ART 6.4.6.3 CONDUCT IMPROVISED EXPLOSIVE DEVICES DEFEAT OPERATIONS

6-43. Units conduct improvised explosive device (IED) defeat operations to defeat asymmetric attacks against United States forces. (ATP 3-90.37) (USAMSCOE)
ART 6.0: The Protection Warfighting Function

ART 6.4.6.4 PLAN PROACTIVE ACTIONS AGAINST IMPROVISED EXPLOSIVE DEVICE

6-44. Planning elements are proactive actions taken by friendly forces to predict, detect, prevent, avoid, neutralize, and protect against improvised explosive device events. The process and the products of mission analysis help the commander and staffs develop and refine their situational understanding and develop effective plans. By thoroughly understanding the mission variables, the commander and staff are better equipped to develop effective plans to accomplish the mission. (ATP 3-90.37) (USAMSCOE)

</tbody>
</table>

ART 6.4.6.6 REACT TO IMPROVISED EXPLOSIVE DEVICE

6-46. Before departing on the dismounted patrol, team leaders remind the Soldiers what actions they should take if they find suspect explosive ordnance, improvised explosive devices (IEDs), and homemade explosives. Battle drills and rehearsals ensure that all personnel on the patrol know what to do when they encounter a threat. (ATP 4-32) (CASCOM)
ART 6.4.7 CONDUCT SUPPORT AREA OPERATIONS

6-47. Support area operations are conducted to prevent or minimize interference with mission command and support operations; provide unimpeded movement of friendly forces, protection, and area damage control. Support area operations find, fix, and destroy enemy forces or defeat threats. Key functions performed in the support area include terrain management, movement, protection (security and defense), and sustainment. (FM 3-81) (USAMSCOE)

SECTION V – ART 6.5: APPLY ANTITERRORISM MEASURES

6-48. Antiterrorism consists of defensive measures used to reduce the vulnerability of individuals and property to terrorist acts, to include limited response and containment by local military and civilian forces. It is an element of protection. Antiterrorism is a consideration for all forces during all military operations. (ATP 3-37.2) (USAMSCOE)

- **ART 6.5.1 Identify Potential Terrorist Threats and Other Threat Activities**
- **ART 6.5.2 Reduce Vulnerabilities to Terrorist Acts and Attacks**
- **ART 6.5.3 React to a Terrorist Incident**

*Note:* This task branch only addresses antiterrorism operations. ART 7.6.4.4 (Conduct Counterterrorism Operations) addresses counterterrorism measures.

SECTION VI – ART 6.6: CONDUCT SURVIVABILITY OPERATIONS

ART 6.6
Conduct Survivability Operations

ART 6.6.1
Protect Against Enemy Hazards in the Area of Operations

ART 6.6.1.1
Protect Individuals and Systems

ART 6.6.1.2
Prepare Fighting Positions

ART 6.6.1.3
Prepare Protective Positions

ART 6.6.1.4
Employ Protective Equipment

ART 6.6.1.5
React to Enemy Direct Fires

ART 6.6.1.6
React to Enemy Indirect Fires

ART 6.6.1.7
Provide Fire and Emergency Services

ART 6.6.2
Disperse Tactical Forces

ART 6.6.3
Conduct Security Operations

ART 6.6.3.1
Provide a Screen

ART 6.6.3.2
Conduct Guard Missions

ART 6.6.3.3
Provide Cover

ART 6.6.4
Conduct Actions to Control Pollution and Hazardous Materials

6-52. ART 6.6 is a concept that includes all aspects of protecting personnel, weapons, and supplies while simultaneously deceiving the enemy. Survivability tactics include building a good defense; employing frequent movement; using concealment, deception, and camouflage; and constructing fighting and protective positions for both individuals and equipment. Included are those assessments and surveys
completed as a part of focused engineer reconnaissance support that includes infrastructure reconnaissance. (See FM 3-34.170.) Survivability operations are the development and construction of protective positions, such as earth berms, dug-in positions, overhead protection, and countersurveillance means, to reduce the effectiveness of enemy weapon systems. (ATP 3-37.34) (USAES)

Note: This task branch is supported by ART 2.2.3 (Provide Intelligence Support to Protection).

**ART 6.6.1.1 PROTECT INDIVIDUALS AND SYSTEMS**

6-54. Units use protective positions (natural or artificial), measures, or equipment—such as armor, detection equipment, mission-oriented protective posture (MOPP) gear, and collective protective equipment—to reduce effects of enemy weapon systems. ART 6.6.1.1 includes construction of fighting and survivability positions, conduct of chemical, biological, radiological, and nuclear defense, and response to enemy fires. (ADRP 3-37) (USAMSCOE)
ART 6.6.1.2 PREPARE FIGHTING POSITIONS

6-55. Units prepare primary, alternate, and supplementary fighting positions that provide cover, concealment, and protection from the effects of enemy fires for occupants and systems, and allow for fields of fire and maneuver space for combat systems and units engaging the enemy. (ATP 3-37.34) (USAES)

ART 6.6.1.2.1 Construct Vehicle Fighting Positions

6-56. Units construct fighting positions that provide cover, concealment, and protection from direct and indirect fires for combat vehicles, yet allow direct or indirect engagement of enemy forces. (ATP 3-37.34) (USAES)
ART 6.0: The Protection Warfighting Function

**Note:** ART 6.6.1.3.2 (Construct Vehicle, Aircraft, Information Systems, Equipment, and Material Protective Positions) addresses vehicles that do not provide or conduct direct fire.

ART 6.6.1.7 PROVIDE FIRE AND EMERGENCY SERVICES

6-67. Units provide fire and emergency services (F&ES) in an area of operations (AO) including fire prevention and fire suppression of facilities, equipment, munitions and aviation fire-fighting and aircraft crash rescue services. Specific capabilities include provide fire prevention programs, inspections, tactical fire fighting, technical rescue and first aid capabilities. A fire protection program can protect logistic support sites, intermediate staging bases, forward operating bases, and major facilities. Facilities can include petroleum tank farms, petroleum distribution sites, open and closed warehouse facilities, general warehouses, detainee facilities, and civilian resettlement sites. ART 6.6.1.7 includes initial hazardous materials response, aviation fire fighting, extrication of personnel and equipment from crashed aircraft, rescuing sick or entrapped personnel from buildings, equipment, vehicles, water, ice, confined space, and high angles. This also includes fire-fighting protection against grass or brush fires within assigned area when augmented with combat or construction engineer Soldiers or units. (TM 3-34.30) (USAES)

ART 6.6.2 DISPERSE TACTICAL FORCES

6-70. Units relocate forces and spread or separate troops, materiel, or activities following concentration and maneuver to enhance survivability. The lethality of modern weaponry significantly increases the threat to concentrated formations. Attacking commanders manipulate their own and the enemy’s concentration of forces by a combination of dispersion, concentration, deception, and attack. Dispersion stretches the enemy’s defenses and denies lucrative targets to enemy long-range fires. (ADRP 3-90) (USACAC)

ART 6.6.3.2 CONDUCT GUARD MISSIONS

6-73. Guard is a security task to protect the main body by fighting to gain time while also observing and reporting information and preventing enemy ground observation of and direct fire against the main body. Units conducting a guard mission cannot operate independently because they rely upon fires and functional and multifunctional support assets of the main body. A guard differs from a screen in that a guard force contains sufficient combat power to defeat, repel, or fix the lead elements of an enemy ground force before it can engage the main body with direct fires. The guard force operates within the range of the main body’s fire support weapons, deploying over a narrower front than a comparable-sized screening force to permit concentrating combat power. (ADRP 3-90) (USACAC)

ART 6.6.3.3 PROVIDE COVER

6-74. Cover is a security task to protect the main body by fighting to gain time while also observing and reporting information and preventing enemy ground observation of and direct fire against the main body. A covering force operates outside supporting range of the main body. It promotes early situation development as it deceives the enemy about the location of the main battle area while disrupting and destroying enemy forces. Cover operations provide the main body with the maximum early warning and reaction time. (ADRP 3-90) (USACAC)

### ART 6.6.4 CONDUCT ACTIONS TO CONTROL POLLUTION AND HAZARDOUS MATERIALS

6-75. Units develop actions to prevent pollution generation and hazardous substance releases. These actions prevent exposing friendly personnel to human health hazards, disrupting operations, adversely affecting indigenous or dislocated civilian populations and local economies, and damaging the natural or cultural environment. Units conduct the environmental compliance program while appropriately considering the effect on the environment per applicable United States and host-nation agreements, environmental laws, policies, and regulations. Units promptly report and clean up hazardous substance releases while avoiding tactical interference and ensuring adequate protection of the environment. Units also manage hazardous wastes correctly prior to transporting them to a permitted treatment, storage, or disposal facility. (ATP 3-34.5) (USAES)

SECTION VII – ART 6.7: PROVIDE FORCE HEALTH PROTECTION

6-76. Force health protection encompasses measures to promote, improve, or conserve the mental and physical well-being of Soldiers. These measures enable a healthy and fit force, prevent injury and illness, and protect the force from health hazards and include the prevention aspects of a number of Army Medical Department functions such as preventive medicine, including medical surveillance and occupational and environmental health (OEH) surveillance; veterinary services, including the food inspection and animal care missions, and the prevention of zoonotic disease transmissible to man; combat and operational stress control (COSC); dental services (preventive dentistry); and laboratory services (area medical laboratory support). ART 6.8.1 SUPPORT WEAPONS OF MASS DESTRUCTION PROLIFERATION PREVENTION

6-85. Weapons of mass destruction (WMD) proliferation prevention employs tactical-level capabilities to support operational and strategic nonproliferation objectives for combating WMD. Proliferation prevention includes military engagements and security cooperation and deterrence. (FM 3-11) (USACBRNS)

ART 6.8.1.1 SUPPORT WEAPONS OF MASS DESTRUCTION SECURITY COOPERATION AND PARTNER ACTIVITIES

6-86. Weapons of mass destruction (WMD) security cooperation and partner (known as SC&P) activities improve or promote defense relationships and capacity of multinational and partner nations to execute or support the other military mission areas to combat WMD through military-to-military contact, burden sharing arrangements, combined military activities, and support to international activities. (FM 3-11) (USACBRNS)

Note: Activities include developing chemical, biological, radiological, and nuclear (CBRN) contacts and establishing programs for various senior official visits. These visits include foreign military CBRN sites visits, counterpart staff exchange visits, and sponsorship of or attendance at WMD-related conferences, military-to-military talks, and bilateral exercise programs that establish and develop military-to-military contacts with targeted nations.

</tbody>
</table>
ART 6.8.2.3.1 Isolate Weapons of Mass Destruction Sites

6-92. Units isolate suspected weapons of mass destruction (WMD) sites, material, equipment, and personnel. The objective is to ensure suspected sites and materials are secure to prevent possible proliferation, pilfering, or destruction of potential forensic evidence, to avoid detaining personnel, and to prevent dispersion, contamination, or collateral effects of the release of dangerous WMD materials or agents. These actions ensure the safety of United States forces, multinational forces, and the surrounding civilian population. Forces must establish and maintain the conditions for elimination operations by securing sensitive sites. (ATP 3-11.23) (USACBRNS)

Note: A sensitive site is a geographically limited area that contains, but is not limited to, adversary information systems, war crimes sites, critical government facilities, and areas suspected of containing high value targets. (JP 3-31) (JS)

ART 6.8.2.3.2 Exploit Weapons of Mass Destruction Sites

6-93. Exploitation at the tactical level includes actions to preserve, characterize, exploit, disable, neutralize, or render safe the adversary’s weapons of mass destruction (WMD) weapons, material, equipment, personnel, and infrastructure. A secondary purpose is to collect appropriate forensic evidence and information. Specialized teams conduct a technical assessment of a site to determine if it contains evidence of WMD activity. If the team finds evidence of WMD activity, then it conducts a more explicit and detailed exploitation of the site (documents, personnel, sampling, and such). Exploitation may include separate
Chapter 6

operations to render safe WMD devices, material or missiles that present an immediate threat to friendly forces. (ATP 3-11.23) (USACBRNS)

**ART 6.8.3.2.1.1 Conduct Chemical, Biological, Radiological, and Nuclear Reconnaissance**

6-100. Chemical, biological, radiological, and nuclear (CBRN) reconnaissance detects the presence of and identifies the type and extent of CBRN hazards in the area of operations (AO) that restrict unprotected maneuver. Reconnaissance assists commanders with decisions that aid in the preservation of combat power, enable continued combat operations, and enable control of CBRN material. (ATP 3-11.37) (USACBRNS)

**ART 6.8.3.2.1.2 Conduct Chemical, Biological, Radiological, and Nuclear Surveillance**

6-101. Chemical, biological, radiological, and nuclear (CBRN) surveillance is the systematic observation of aerospace, surface, or subsurface areas, places, persons or things, by visual, aural, electronic, photographic or other means. CBRN surveillance facilitates situational awareness and maintenance of an accurate, high fidelity, real-time picture of an operational environment as changes occur. CBRN surveillance involves standoff or point (including those remotely dispersed, unmanned and unattended) means to detect the presence or absence of hazards. (ATP 3-11.37) (USACBRNS)

#### ART 6.8.3.2.3 Perform Chemical, Biological, Radiological, and Nuclear Decontamination

6-104. Decontamination is the process of making any person, object, or area safe by absorbing, destroying, neutralizing, making harmless, or removing chemical or biological agents or by removing radioactive material clinging to or around it. (FM 3-11) (USACBRNS)
### ART 6.8.4 CONDUCT CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR CONSEQUENCE MANAGEMENT

6-105. Chemical, biological, radiological, and nuclear (CBRN) consequence management comprises those consequence management actions taken to plan, prepare for, respond to, and recover from CBRN incidents that require force and resource allocation beyond passive defense capabilities. (ATP 3-11.41)(USACBRNS)

ART 6.0: The Protection Warfighting Function

ART 6.0.4.1 RESPOND TO CHEMICAL, BIOLOGICAL, RADILOGICAL, AND NUCLEAR INCIDENTS

6-106. Chemical, biological, radiological, and nuclear (CBRN) response addresses the short-term, direct effects of a CBRN incident. The major functions performed by response units are safeguarding lives, preserving health and safety, securing and eliminating the hazard, protecting property, preventing further damage to the environment, and maintaining public confidence in the government’s ability to respond to a CBRN incident. (ATP 3-11.41) (USACBRNS)

ART 6.8.4.2.2 Conduct Mass Casualty Decontamination Operations

6-111. Mass casualty decontamination is required when a chemical, biological, radiological, and nuclear (CBRN) incident results in a large number of casualties that require support from external forces. Personnel processing through a mass casualty decontamination operation may not have personal protective equipment and will require a fast, efficient, and effective decontamination process. In addition to a rapid response, mass casualty decontamination operations require large numbers of response personnel, equipment, and supplies. (ATP 3-11.41) (USACBRNS)

ART 6.8.4.2.3 Process Contaminated Remains

6-112. Contaminated human remains of United States personnel must be effectively decontaminated. These procedures minimize the risk of personnel who come into contact with the human remains. This process begins when unit determines remains are contaminated. When working with the remains, unit pays special attention to safety and sanitation. (ATP 4-46) (CASCOM)

ART 6.8.5 PROVIDE TECHNICAL CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR EXPERTISE

6-113. Technical chemical, biological, radiological, and nuclear (CBRN) expertise allows commanders to make informed decisions regarding the use of weapons of mass destruction (WMD) counterforce, CBRN defense, and CBRN consequence management capabilities. These tasks include providing CBRN threat assessments, CBRN vulnerability assessments, CBRN hazard modeling, CBRN warning and reporting, WMD forensic evidence collection, as well as integration with medical and health surveillance, casualty management, mortuary affairs, laboratory analysis, and preventive medicine. ART 6.8.5.1 PROVIDE TECHNICAL CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR REACHBACK

6-114. Technical reachback is the ability to contact subject matter experts when a technical issue following a chemical, biological, radiological, nuclear (CBRN) incident exceeds command and staff
capability. During post-incident activities, commanders and staffs maintain technical links with appropriate joint, federal, and state CBRN asset, and research, development, and technical communities to assure CBRN response success. Reachback should be conducted using established unit protocols. (ATP 3-11.36) (USACBRNS)

SECTION IX – ART 6.9: EMPLOY SAFETY TECHNIQUES
6-116. Safety in the protection warfighting function identifies and assesses hazards to the force and makes recommendations on ways to mitigate those hazards. Responsibility for safety starts with the commander and continues through the chain of command to individuals. All staffs understand and factor into their analysis how their execution recommendations could adversely affect Soldiers. (ATP 5-19) (USACAC)

ART 6.9.1 CONDUCT RISK MANAGEMENT

6-117. Units identify and control hazards to protect the force and increase the chance of mission accomplishment. Units use risk management throughout the conduct (planning, preparing, executing, and assessing) of operations to recommend how to reduce tactical and accidental risk. ART 6.9.1 includes the requirement to establish, communicate, and enforce controls that reduce the risk of tactical and accident hazards. (ATP 5-19) (USACAC)

</tbody>
</table>

ART 6.9.5 PERFORM FRATRICIDE AVOIDANCE

6-121. Fratricide is the unintentional killing or wounding of friendly or neutral personnel by friendly firepower. Preventing fratricide is the responsibility of the commander, yet all Soldiers must avoid the reluctance to employ, integrate, and synchronize all the combat power at the critical time and place. (ADRP 3-37) (USAMCOE)

ART 6.9.5.1 DETECT AND ESTABLISH POSITIVE IDENTIFICATION OF FRIEND, FOE, AND NONCOMBATANTS

6-122. Units discretely and positively determine, by any means, the identity of tactical units, their equipment, and personnel, or of phenomena, such as communications-electronic patterns. Units distinguish these forces from hostile or unknown forces and means, one from the other. (ADRP 3-37) (USAMCOE)

ART 6.9.5.2 PERFORM TARGET DETECTION

6-123. Units characterize detected objects as friend, enemy, or neutral. In combat operations, units discriminate among recognizable objects as friendly, neutral, or enemy, or recognize the name that belongs to the object as a member of a class. Units identify a recognized object and the specific designation of that object to determine the extent that firing or other tactical decisions concerning it could be made. This aspect of combat identification is time sensitive and directly supports a combatant’s shoot or don’t-shoot decision for detected objects on the battlefield. (ATP 3-20.15) (USAMCOE)

ART 6.9.5.3 DECIDE TARGET ENGAGEMENT

6-124. Units determine the appropriate application of military options and weapons resources on identified objects. Units identify the process used to execute a course of action developed to engage a target determined by situational awareness and available weapons or resources. Units select a course of action as the one most favorable to accomplish the mission. The unit’s estimate of the situation contains a clear and concise statement of the line of action intended to be followed by the commander as the one most favorable to successfully accomplishing the mission. (ATP 3-20.15) (USAMCOE)

SECTION X – ART 6.10: IMPLEMENT OPERATIONS SECURITY

ART 6.10
Implement Operations Security

ART 6.10.1 Conduct Operations Security

ART 6.10.1.1 Identify Essential Elements of Friendly Information

ART 6.10.1.2 Apply Appropriate Operations Security Countermeasures

ART 6.10.1.3 Perform Emergency Destruction of Classified and Sensitive Materials

ART 6.10.2 Implement Physical Security Procedures

ART 6.10.2.1 Employ Camouflage, Concealment, and Decoy Techniques

ART 6.10.2.2 Employ Noise, Light, Thermal, and Physical Evidence Controls

ART 6.10.3 Counter the Threat

ART 6.10.3.1 Conduct Counterintelligence Operations

ART 6.10.3.2 Conduct Counterdeception Operations

ART 6.10.3.3 Perform Counterintelligence

ART 6.10.4 Perform Logistics Security Assessments

6-127. Operations security is a process of identifying essential elements of friendly information and subsequently analyzing friendly actions attendant to military operations and other activities to identify those actions that can be observed by adversary intelligence systems; determine indicators that hostile intelligence systems might obtain that could be interpreted or pieced together to derive critical information in time to be useful to adversaries; and select and execute measures that eliminate or reduce to an acceptable level the vulnerabilities of friendly actions to adversary exploitation. (ADRP 3-37) (USAMSCOE)

ART 6.10.1 CONDUCT OPERATIONS SECURITY

6-128. Units identify essential elements of friendly information (EEFI) and subsequently analyze friendly actions attendant to military operations and other activities. ART 6.10.1 identifies actions that can be observed by adversary intelligence systems and determines indicators adversary intelligence systems might
obtain that could be interpreted or pieced together to derive EEFI in time to be useful to adversaries. ART 6.10.1 also involves selecting and executing measures that eliminate or reduce to an acceptable level the vulnerabilities of friendly actions to adversary exploitation. (ADRP 3-37) (USAMSCOE)

<table>

</tbody>
</table>

**ART 6.10.1.1 IDENTIFY ESSENTIAL ELEMENTS OF FRIENDLY INFORMATION**

6-129. Units identify friendly vulnerabilities that are exploitable by enemies and potential adversaries. Units include recommendations concerning countermeasures and corrective action. (ADRP 5-0) (USACAC)
No.  Scale  Measure
01  Yes/No  Commander and staff identified friendly vulnerabilities that can be exploited by an enemy.
02  Time  To develop essential elements of friendly information (EEFI).
03  Time  To disseminate initial and subsequent EEFI requirements to subordinate elements of the force.
04  Time  Between updates of priority intelligence requirements.
05  Time  To disseminate to all force elements and agencies information obtained due to the answering of EEFI.
06  Time  In advance of collection that EEFI were identified.
07  Time  Since most current information regarding EEFI were last collected.
08  Time  Of turnaround to process new EEFI.
09  Percent  Of friendly activities and resource expenditures accurately predicted by friendly reference materials, checklists, and other previously prepared documents and databases.
10  Percent  Of total EEFI identified only during execution.
11  Percent  Of EEFI collected in time to meet current operational needs.
12  Percent  Of EEFI included in collection plan.
13  Number  Of EEFI not identified during planning.

ART 6.10.1.2 APPLY APPROPRIATE OPERATIONS SECURITY COUNTERMEASURES

6-130. Units deny adversaries information about friendly capabilities and intentions by identifying, controlling, and protecting indicators associated with planning and conducting military operations. (FM 3-13) (USACAC)

No.  Scale  Measure
01  Yes/No  Unit application of operations security (OPSEC) measures prevented the enemy from detecting the correct indicators of friendly operations until it was too late for the enemy to react.
02  Yes/No  Units changed patterns of operation on an irregular basis.
03  Time  To apply appropriate OPSEC measures.
04  Time  To brief unit information operations element and unit plans cell on OPSEC requirements.
05  Time  To identify target sets and desired effect, by priority.
06  Percent  Of OPSEC surveys reflected in OPSEC plans.
07  Percent  Of routine actions with timing or location changed at least weekly.
08  Percent  Of favorable signal security assessments.
09  Number  Of public media disclosures.
10  Number  Of critical essential elements of friendly information that must be concealed from the enemy.

ART 6.10.1.3 PERFORM EMERGENCY DESTRUCTION OF CLASSIFIED AND SENSITIVE MATERIALS

6-131. Units establish and execute procedures for the emergency destruction of classified materials. (AR 380-5) (USAICOE)

No.  Scale  Measure
01  Yes/No  Emergency destruction of classified and sensitive documents and other materials was accomplished without compromising classified and sensitive information.
02  Time  To identify classified and sensitive materials for destruction.

ART 6.10.4 PERFORM LOGISTICS SECURITY ASSESSMENTS

6-134. Logistics security operations is a function primarily performed by the Army Criminal Investigation Command. The logistics security function protects the Army’s supply pipeline against criminal activities from the manufacturer, through logistics channels, all the way to the frontline Soldier. It involves preventing, detecting, and investigating criminal and terrorist activities such as supply diversion,
destruction, and sabotage or product substitution. The Army Criminal Investigation Command assesses logistics security to identify weaknesses and provide a prioritization of threats so that commanders can implement preventive measures to reduce the vulnerability of the logistics pipeline. Whenever possible, the Army Criminal Investigation Command will initiate actions to recover logistic losses and return them to Army control. (ATP 3-39.30) (USAMPS)

ART 6.11.1.1 COORDINATE EXPLOSIVE ORDNANCE DISPOSAL SUPPORT

6-137. Explosive ordnance disposal (EOD) provides the supported commander the capability to render safe and dispose of all explosive ordnance, to include unexploded ordnance, improvised explosive devices (IEDs), and improvised explosives. The ability to render safe explosive ordnance is essential in providing intelligence to target IED networks, as well as update tactics, techniques, and procedures, both enemy and friendly. EOD personnel have the ability to dispose of all types of ordnance in the safest manner possible. Ordnance that is disposed of improperly can cause damage to both personnel and property within the blast and fragmentation zone. (ATP 4-32) (CASCOM)

ART 6.11.2 PROVIDE EXPLOSIVE ORDNANCE DISPOSAL SUSTAINMENT SUPPORT

6-144. Units neutralize domestic or foreign munitions and improvised devices that present a threat to military operations and military and civilian facilities, materiel, and personnel, regardless of location. The Departments of Justice, State, and Energy may receive this support per current agreements and directives. ART 6.11.2 includes providing explosive ordnance disposal (EOD) support to the United States Secret Service, Department Departments of Justice, State, and Energy, and Department of Defense to protect the President and other designated persons. ART 6.11.2 also includes performing bomb and sabotage device recognition and safety precaution training. (FM 3-34.214) (USAES)

ART 6.11.2.1 REMOVE STUCK ROUNDS AND DOWNLOAD MISFired Munitions in Weapon Systems

6-145. Removal of stuck rounds is a routine explosive ordnance disposal (EOD) operation. In a removal of stuck rounds mission, the EOD unit removes stuck rounds in mortars, artillery tubes, and other weapon systems; inspects possible unsafe ammunition removed during EOD or operator procedures to determine if it is safe for storage or transport; and destroys ammunition that EOD personnel determine to be unsafe for storage or transport. A battle damaged vehicle with ammunition on board requires EOD unit to download munitions and clear the vehicle before it can be repaired. EOD also supports the postblast investigation and performs technical intelligence on enemy weapons effects on United States vehicles through appropriate channels. (FM 3-34.214) (USAES)

ART 6.11.2.2 PROVIDE EXPLOSIVE ORDNANCE DISPOSAL SUPPORT TO WEAPON STORAGE SITE INSPECTIONS

6-146. Site exploitation operations focus on locating, characterizing, seizing, securing, and searching facilities, supplies, weapons, equipment, personnel, and infrastructures. Explosive ordnance disposal (EOD) exploitation operations may additionally include disablement operations to render chemical, biological, radiological, nuclear, and high-yield explosives (CBRNE) materiel, systems, and equipment ineffective for use against the joint, interagency, and multinational forces. Disablement operations include neutralization, incineration, destruction, confiscation, and evacuation of CBRNE and associated materials. (FM 3-34.214) (USAES)
ART 6.11.2.3 CONDUCT TECHNICAL ASSESSMENTS ON UNEXPLODED EXPLOSIVE ORDNANCE; IMPROVISED EXPLOSIVE DEVICES; AND CHEMICAL, BIOLOGICAL, RADIOLOGICAL, NUCLEAR, AND HIGH-YIELD EXPLOSIVES HAZARDS

6-147. Explosive ordnance disposal (EOD) personnel provide technical support to maneuver units by identifying and requesting disposition of first seen ordnance and explosive remnants of war, improvised explosive devices (IEDs), and chemical, biological, radiological, nuclear, and high-yield explosives (CBRNE) hazards of intelligence value. At the theater level, EOD personnel also prepare and submit an appropriate intelligence report based upon type of ordnance and type of function. EOD personnel determine if items are safe for shipment and storage. EOD personnel develop and attempt render-safe procedures. EOD personnel conduct postblast analysis for forensic evidence and, if the need exists, EOD personnel can collect chemical and biological samples for analysis. EOD personnel can recognize and test for CBRNE hazards. (FM 3-34.214) (USAES)

</table>
6-155. Detention involves the detainment of a population or group that poses some level of threat to military operations. Detention operations are conducted by military police to shelter, sustain, guard, protect, and account for populations (detainees or United States [U.S.] military prisoners) as a result of military or civil conflict or to facilitate criminal prosecution. Detainee operations require detailed advanced planning. The Detainee Treatment Act of 2005, DODD 2310.01E, and the Geneva Conventions mandate that all individuals captured, detained, evacuated, or held by U.S. forces will be treated humanely. This policy applies from the moment they are under the control of U.S. forces until the detainees’ disposition is determined. A detainee disposition describes the intended status of a detainee’s liberty, detention, or fate upon release from Department of Defense (DOD) control. No person in the custody or under the control of the DOD, regardless of nationality or physical location, shall be subject to torture or cruel, inhumane, or degrading treatment or punishment, in accordance with and as defined in U.S. law. (U.S. military prisoners are covered under ART 6.12.3 [Intern United States Military Prisoners]). (FM 3-39) (USAMPS)

Note: ART 4.1.7.1.4 (Provide Engineer Support to Bases and Installations) addresses the construction, management, and maintenance of bases and installations to include facilities such as those required for the detention of detainees.
ART 6.12.1 PERFORM ENEMY PRISONER OF WAR OPERATIONS

6-156. This ART covers how units provide safe and humane treatment for enemy prisoners of war (EPWs). This task includes the collection, screening, processing, transfer, detention, safeguarding, and release of EPWs. (FM 3-63) (USAMPS)

ART 6.13.1 PERFORM LAW ENFORCEMENT

6-160. Law enforcement is those activities performed by personnel authorized by legal authority to compel compliance with, and investigate violations of, laws, directives, and punitive regulations. Law enforcement occurs in support of governance and the rule of law; for law enforcement to occur, a legal system must exist. Typically, law enforcement is performed by personnel trained as police officers who are held directly accountable to the governmental source of their authority. (ATP 3-39.10) (USAMPS)

ART 6.13.3 CONDUCT TRAFFIC MANAGEMENT AND ENFORCEMENT

6-162. Units develop and implement plans and policies concerning traffic flow, traffic safety, and enforcement of traffic laws. Units conduct traffic accident investigation and prevention as well as implement traffic control studies, surveys, and necessary traffic enforcement programs. They assist in implementing traffic education and safety programs. In support of the deployed operational commander, units maintain the security and viability of the strategic and tactical lines of communications so commanders can deploy and employ their forces. Units support the commander’s freedom of movement by operating traffic control posts, defiles, or mobile patrols; erecting route signs on main or alternate supply routes; or conducting a reconnaissance for bypassed or additional routes. Units conduct traffic studies for the ground commander and provide recommendations to ensure trafficability on critical routes including identification of reserved or restricted routes, traffic control measures, and other protection measures. Units provide a permanent representative to the highway traffic headquarters in the theater of operations. Units conduct host-nation training and support pertaining to traffic management and enforcement. (FM 3-39) (USAMPS)

Note: This task links to ART 7.3.2.3 (Perform Host-Nation Police Training and Support), ART 6.4 (Conduct Operational Area Security), ART 7.3.3.2 (Control Movement of Dislocated Civilians), ART 7.3.3.4 (Conduct Populace and Resource Control), and ART 7.4.1 (Provide Support for Domestic Civil Law Enforcement Agencies).

**ART 6.13.4 EMPLOY FORENSIC CAPABILITIES**

6-163. Units employ forensic capabilities, including the use of forensic evidence and biometric identification, via site exploitation activities through numerous modes such as fingerprints, deoxyribonucleic acid (known as DNA), iris scans, firearm and tool mark analysis, and forensic examination of crime scenes and incident sites. Forensic and biometric evidence may be collected in support of criminal investigations involving crimes committed by persons against Army forces or property under the jurisdiction of military law enforcement personnel. This includes minor crimes and major incidents involving rape, sexual assault, death, serious bodily injury, and war crimes. Forensic and biometric capabilities also can support tactical operations with forensic analysis of exploited collected evidence, identification of personnel, or other investigatory requirements. Units support operational commanders by identifying threat personnel, organizations, and processes to enable appropriate engagement by military forces. Units conduct host-nation training and support pertaining to forensic and biometric capabilities. (FM 3-39) (USAMPS)

*Note:* This task links to ART 7.3.2.3 (Perform Host-Nation Police Training and Support) and ART 7.4.1 (Provide Support for Domestic Civil Law Enforcement Agencies).

Tactical proficiency is not defined by mastery of written doctrine, but by the ability to employ available means to win battles and engagements. A tactical solution may not match any previous example; however, the language used to communicate that concept must be technically precise and doctrinally consistent, using commonly understood and accepted terms and concepts. This chapter sustains this doctrinal consistency by delineating the tactical missions and operations conducted by Army tactical forces. A tactical mission task is the specific activity performed by a unit while executing a form of tactical operation or form of maneuver. It may be expressed in terms of either actions by a friendly force or effects on an enemy force (FM 3-90-1). Tactical mission tasks provide commanders, their staffs, combat developers, training developers, and doctrine analysts a resource to assist in identifying missions that units are to accomplish. Training developers use this chapter to base collective training plans on one or more of these missions.
SECTION I – ART 7.1: CONDUCT OFFENSIVE TASKS

7-1. Measures of any mission accomplishment are both objective and subjective in their evaluation by commanders. The most critical measure for all Army tactical missions and tasks is if the mission is accomplished. There is no other measure above this one. To measure mission accomplishment, commanders also consider if mission accomplishment was within the—

- Higher commander’s intent of what the force must do and the conditions.
- Specified timeline.
- Commander’s risk assessment for fratricide avoidance and collateral damage.
- Unit’s capability of continuing or being assigned future missions and operations.

7-2. An offensive task is a task conducted to defeat and destroy enemy forces and seize terrain, resources, and population centers. Offensive tasks impose the commander’s will on the enemy. Against an adaptive and capable enemy, offensive tasks are the most direct and surest means of seizing, retaining, and exploiting the initiative. Executing offensive tasks compels the enemy to react, creating or revealing weaknesses that attacking forces can exploit. Successful offensive tasks place tremendous pressure on defenders, creating a cycle of deterioration that can lead to their disintegration. Army forces conduct four tactical offensive tasks: movement to contact, attack, exploitation, and pursuit. (ADRP 3-0) (USACAC)

ART 7.0: Tactical Mission Tasks and Military Operations

ART 7.1.1 CONDUCT A MOVEMENT TO CONTACT

7-3. The movement to contact is an offensive task designed to develop the situation and establish or regain contact. Forces conducting a movement to contact seek to make contact with the smallest forces feasible. A movement to contact may result in a meeting engagement. (ADRP 3-90) (USACAC)

ART 7.1.1.1 CONDUCT A MEETING ENGAGEMENT

7-4. A meeting engagement is a combat action that occurs when a moving force, incompletely deployed for battle, engages an enemy at an unexpected time and place. Such encounters normally occur by chance in small-unit operations, typically when two moving forces collide. They may result in brigade or larger unit operations when information collection operations have been ineffective. Meeting engagements can also occur when opposing forces are aware of the general presence, but not the exact location, of each other, and both decide to attack immediately. (FM 3-90-1) (USACAC)

ART 7.1.2 CONDUCT AN ATTACK

7-6. An attack is an offensive task that destroys or defeats enemy forces, seizes and secures terrain, or both. Attacks incorporate coordinated movement supported by direct and indirect fires. They may be either decisive or shaping operations. Attacks may be hasty or deliberate, depending on the time available for assessing the situation, planning, and preparing. (ADRP 3-90) (USACAC)

ART 7.1.2.1 CONDUCT AN AMBUSH

7-7. An ambush is an attack by fire or other destructive means from concealed positions on a moving or temporarily halted enemy. An ambush stops, denies, or destroys enemy forces by maximizing the element of surprise. Ambushes can employ direct fire systems as well as other destructive means, such as command-detonated mines, indirect fires, and supporting nonlethal capabilities. They may include an assault to close with and destroy the enemy forces. (FM 3-90-1) (USACAC)

ART 7.1.2.1.1 Conduct a Point Ambush

7-8. A point ambush is a surprise attack by lethal or nonlethal capabilities from concealed positions on a moving or temporarily halted enemy near a given point. It may include an assault to close with and destroy enemy forces. (FM 3-21.10) (USAMCOE)

ART 7.1.2.1.2 Conduct an Area Ambush

7-9. An area ambush consists of a series of surprise attacks by lethal or nonlethal capabilities from concealed positions on a moving or temporarily halted enemy in a specific area. It may include an assault to close with and destroy enemy forces. (FM 3-21.20) (USAMCOE)

ART 7.1.2.1.3 Conduct an Antiarmor Ambush

7-10. An antiarmor ambush is a surprise attack by fire or other destructive means from concealed positions on moving or temporarily halted enemy armored vehicles. The ambush ends with the displacement of the antiarmor system to preclude its destruction by enemy counterambush actions. (FM 3-21.91) (USAMCOE)
ART 7.1.2.2 ASSAULT AN OBJECTIVE

7-11. The assault on an objective is a short, violent, but well-ordered attack against an objective. It is the climax of an attack and involves the act of closing with the enemy, including the possible conduct of hand-to-hand fighting. (JP 3-18) (JS)

ART 7.1.2.3 CONDUCT A COUNTERATTACK

7-12. A counterattack is an attack by part or all of a defending force against an attacking force with the general objective of denying attackers their goals. Commanders normally conduct counterattacks from a defensive posture. They direct counterattacks to defeat or destroy enemy forces or to regain control of terrain and facilities after enemy successes. They counterattack after enemies launch an attack, reveal their main effort, or offer an assailable flank. (ADRP 1-02) (USACAC)

ART 7.1.2.4 CONDUCT A DEMONSTRATION

7-13. A demonstration is an attack designed to deceive enemies as to the location or time of the decisive operation by a display of force. Forces conducting a demonstration do not seek contact. Demonstrations are shaping operations. They seek to mislead enemies concerning the attacker’s true intentions. They facilitate decisive operations by fixing enemies or diverting their attention from the decisive operation. Commanders allow enemies to detect a demonstration. (FM 3-90-1) (USACAC)

ART 7.1.2.5 CONDUCT A FEINT

7-14. A feint is a form of attack used to deceive the enemy as to the location or time of the actual decisive operation. Forces conducting a feint seek direct fire contact with the enemy but avoid decisive engagement. Feints divert attention from the decisive operation and prevent the enemy from focusing elements of combat power against it. They are usually shallow, limited-objective attacks conducted before or during the decisive operation. (FM 3-90-1) (USACAC)

ART 7.1.2.6 CONDUCT A SPOILING ATTACK

7-15. A spoiling attack is a tactical maneuver employed to seriously impair a hostile attack while the enemy is in the process of forming or assembling for an attack. Normally conducted from a defensive posture,spoiling attacks strike where and when enemies are most vulnerable—during preparations for attack in assembly areas and attack positions or while they are moving toward their line of departure. Therefore, proper timing and coordination with higher headquarters are critical requirements for spoiling attacks. A spoiling attack depends on accurate information on enemy dispositions. (FM 3-90-1) (USACAC)

ART 7.1.3 CONDUCT AN EXPLOITATION

7-16. Exploitation is an offensive task that usually follows a successful attack and is designed to disorganize the enemy in depth. Exploitations seek to disintegrate enemy forces to the point where they have no alternative but surrender or take flight. Exploitations take advantage of tactical opportunities, foreseen or unforeseen. Division and higher headquarters normally plan exploitations as branches or sequels. Forensic and biometric capabilities aid in the operational outcome of a supported exploitation event. (ADRP 3-90) (USACAC)

ART 7.1.4 CONDUCT A PURSUIT

7-17. A pursuit is an offensive task designed to catch or cut off a hostile force attempting to escape, with the aim of destroying it. Pursuits are decisive operations that follow successful attacks or exploitations. They occur when enemies fail to organize a defense and attempt to disengage. If it becomes apparent that resistance has broken down entirely and the enemy is fleeing, a force can transition to a pursuit from any
type of offensive operation. Pursuits entail rapid movement and decentralized control. (ADRP 3-90) (USACAC)

SECTION II – ART 7.2: CONDUCT DEFENSIVE TASKS

7-18. A defensive task is a task conducted to defeat an enemy attack, gain time, economize forces, and develop conditions favorable for offensive or stability tasks. The defense alone normally cannot achieve overarching mission objectives. However, it can create conditions for a counteroffensive that allows Army forces to regain the initiative. Defensive tasks can also establish a protective barrier behind which stability operations can progress. The defense counters enemy’s offensive operations. Defensive tasks defeat attacks, destroying as much of the attacking enemy force as possible. They also preserve control over land, resources, and populations. Defensive tasks retain terrain, guard populations, and protect critical capabilities. They can be used to gain valuable time and economize forces to allow execution of offensive tasks elsewhere. Three tasks are associated with the defense: mobile defense, area defense, and retrograde. Defending commanders combine the three tasks to fit the situation. (ADRP 3-0) (USACAC)

ART 7.2.1 CONDUCT A MOBILE DEFENSE

7-19. The mobile defense concentrates on the destruction or defeat of the enemy through a decisive attack by a striking force. A mobile defense requires defenders to have greater mobility than attackers. Defenders combine offensive, defensive, and delaying actions to lure attackers into positions where attackers are vulnerable to counterattack. (ADRP 3-90) (USACAC)

ART 7.2.2 CONDUCT AN AREA DEFENSE

7-20. The area defense concentrates on denying an enemy force access to designated terrain for a specific time rather than destroying the enemy outright. The bulk of the defending force combines static defensive
positions, engagement areas, and small, mobile reserves to retain ground. Keys to successful area defenses include effective and flexible control, synchronization, and distribution of fires. Area defenses can also be part of a larger mobile defense. (ADRP 3-90) (USACAC)

ART 7.2.2.1 DEFEND A BATTLE POSITION
7-21. This task involves denying an enemy force access to the terrain encompassed by a specific battle position. The battle position is a tactical control graphic that depicts the location and general orientation of the majority of the defending forces. Five kinds of battle positions exist to include the strong point. (ADRP 3-90) (USACAC)

ART 7.2.2.2 DEFEND AN AREA OF OPERATIONS
7-22. This task involves denying an enemy force access across a designated area of operations. Defending an area of operations allows the commander to distribute forces to suit the terrain and plan engagement areas that integrate direct and indirect fires. (ADRP 3-90) (USACAC)

ART 7.2.3 CONDUCT A RETROGRADE
7-23. The retrograde is a defensive task that involves organized movement away from the enemy. The three forms of retrograde operations are delays, withdrawals, and retirements. A commander can direct the conduct of denial operations and stay-behind operations as subordinate activities within the context of a retrograde operation. Commanders use retrogrades as part of a larger concept of operations to create conditions to regain the initiative and defeat the enemy. Retrogrades improve the current situation or prevent a worse situation from occurring. (ADRP 3-90) (USACAC)

ART 7.2.3.1 CONDUCT A DELAY
7-24. A delay is a form of retrograde in which a force under pressure trades space for time by slowing the enemy’s momentum and inflicting maximum damage on the enemy without, in principle, becoming decisively engaged. Delays gain time for friendly forces to establish defenses, cover defending or withdrawing units, protect friendly unit flanks, contribute to economy of force, draw the enemy into unfavorable positions, and determine the enemy main effort. (ADRP 3-90) (USACAC)

ART 7.2.3.2 CONDUCT A WITHDRAWAL
7-25. A withdrawal is a planned operation in which a force in contact disengages from an enemy force. Withdrawals may involve all or part of a committed force. Commanders conduct withdrawals to preserve the force, release it for a new mission, avoid combat under undesirable conditions, or reposition forces. Enemy pressure may or may not be present during withdrawals. Withdrawing forces may be unassisted or assisted by another friendly force. (ADRP 3-90) (USACAC)

ART 7.2.3.3 CONDUCT A RETIREMENT
7-26. A retirement is a retrograde in which a force not in contact with the enemy moves away from the enemy. (ADRP 3-90) (USACAC)

ART 7.2.3.4 CONDUCT DENIAL OPERATIONS
7-27. Denial operations hinder or deny the enemy the use of space, personnel, supplies, or facilities. It may include destroying, removing, or contaminating those supplies and facilities, or erecting obstacles. (FM 3-90-1) (USACAC)
ART 7.2.3.5 CONDUCT STAY-BEHIND OPERATIONS

7-28. A stay-behind operation occurs when a commander leaves a unit in position to conduct a specified mission while the remainder of the force withdraws or retires from an area. (FM 3-90-1) (USACAC)

ART 7.2.3.6 BREAKOUT FROM ENCIRCLEMENT

7-29. A breakout from encirclement is an operation conducted by an encircled force to regain freedom of movement or contact with friendly units. It differs from other attacks only in that a simultaneous defense in other areas of the perimeter must be maintained. (ADRP 3-90) (USACAC)

SECTION III – ART 7.3: CONDUCT STABILITY TASKS

7-30. Stability tasks are tasks conducted outside the United States in coordination with other instruments of national power to maintain or reestablish a safe and secure environment and provide essential governmental services, emergency infrastructure reconstruction, and humanitarian relief. (See JP 3-0.) Operations focused on stability can be conducted in support of a host-nation or interim government or as part of an occupation
when no government exists. These operations involve both coercive and constructive actions by the military force. They are designed to establish a safe and secure environment; facilitate reconciliation among local or regional adversaries; establish political, legal, social, and economic institutions; and facilitate the transition to legitimate local governance. Army forces conduct five primary stability tasks: civil security, civil control, restore essential services, support to governance, and support to economic and infrastructure development. (ADP 3-07) (USAPKSOI)

**Note:** This task branch only addresses those tasks that support the conduct of Army stability operations. Other tasks that support operations focused on stability are addressed elsewhere in ADRP 1-03:

- ART 6.4.4 (Provide Protective Services for Selected Individuals) addresses the protection of personnel.
- ART 6.4.2 (Conduct Critical Installations and Facilities Security) addresses the protection of facilities.
- ART 6.11 (Provide Explosive Ordnance Disposal Protection Support) addresses the conduct of unexploded ordnance disposal.

### ART 7.3.1 ESTABLISH CIVIL SECURITY

7-31. Civil security involves providing for the safety of the state and its population, including protection from internal and external threats. Civil security includes a diverse set of activities, ranging from enforcing peace agreements to executing disarmament, demobilization, and reintegration. For the other stability tasks to be effective, civil security is required. Establishing a safe, secure, and stable environment for the local populace is key to obtaining their support for the overall stability operation. To help establish civil security, military forces enforce ceasefires, supervise disengagement of belligerent forces, and neutralize potential adversaries. As soon as host-nation security forces can safely perform this task, Army forces transition civil security responsibilities to them. (ADP 3-07) (USAPKSOI)

**Note:** ART 7.6.3.4 (Conduct Peace Enforcement Operations) addresses the measures that help military forces establish a sustained peace.

ART 7.3.1.1 RESTORE AND MAINTAIN ORDER

7-32. Operations to restore order are conducted to halt violence and to support, reinstate, or establish civil authorities. These operations provide security and stability after a conflict while setting the preconditions for beginning disarmament, demobilization, and reintegration. This is critical to providing effective security for the local populace by reducing their exposure to the threat of violent conflict and help military forces establish a sustained peace by focusing on processes and activities fundamental to conflict transformation. ART 7.3.1.2 CONDUCT DISARMAMENT, DEMOBILIZATION, AND REINTEGRATION OF FORMER COMBATANTS

7-33. Disarmament, demobilization, and reintegration of former combatants are fundamental to most efforts for establishing stability and lasting peace. They include physically disbanding armed groups, removing the means of combat from former combatants and belligerents, and reintegrating them into society.
Disarmament may include seizing ammunition, collecting and destroying weapons and supplies, closing weapons and ammunition factories, and preventing resupply. (FM 3-07) (USAPKSOI)

**ART 7.3.1.2.1 Forcibly Separate Belligerents**

7-34. Forcible separation may involve reducing the combat capability of one or more of the belligerent parties by disarming and demobilizing them. The peace enforcement force normally retains the right of first use of force. Forces conducting forcible separation require extensive offensive combat capability. The goal is to force the belligerent parties to disengage, withdraw, and subsequently establish a buffer zone or demilitarized zone. Security operations—such as screening, combat and reconnaissance patrolling, performing cordon and search, and establishing checkpoints and roadblocks to control movement into and within the buffer zone or demilitarized zone—may be conducted to maintain the separation of belligerent parties. ART 7.3.1.2.4 Establish Protected Areas

7-37. The requirement to establish and supervise a protected or safe area can arise when any community is at risk from persistent attack. Unless those in the safe area are disarmed, it may be used as a base from which to conduct raids and attacks. Commanders must be clear on what is expected of the force tasked to establish and maintain a protected or safe area. (FM 3-07) (USAPKSOI)
ART 7.3.1.3 CONDUCT BORDER CONTROL, BOUNDARY SECURITY, AND FREEDOM OF MOVEMENT

7-38. Border controls are necessary to regulate immigration, control the movements of the local populace, collect excise taxes or duties, limit smuggling, and control the spread of disease vectors through quarantine. Generally, border and coast guard forces secure national boundaries while customs officials regulate the flow of people, animals, and goods across state borders. (FM 3-07) (USAPKSOI)

ART 7.3.1.4 PROTECT RECONSTRUCTION AND STABILIZATION PERSONNEL AND FACILITIES

7-39. It may be necessary for Army forces to extend protection and support to key civilian personnel to ensure their continued contribution to the overall stability operation. In the interest of transparency, military forces specifically request and carefully negotiate this protection. Additionally, forces may provide transportation and security for nongovernmental organizations and other government agencies. (FM 3-07) (USAPKSOI)
ART 7.3.2 ESTABLISH CIVIL CONTROL

7-40. Civil control regulates selected behavior and activities of individuals and groups. This control reduces risk to individuals or groups and promotes security. Civil control centers on rule of law, supported by efforts to rebuild the host-nation judiciary and corrections systems. Civil control channels the population’s activities to allow provision of security and essential services while co-existing with a military force conducting operations. (ADRP 3-07) (USAPKSOI)

ART 7.3.2.3 PERFORM HOST-NATION POLICE TRAINING AND SUPPORT

7-43. Units support and establish viable host-nation police forces and penal organizations capable of maintaining a safe and secure environment, upholding the rule of law, and reinforcing the legitimacy of the government. Units ensure coordination of host-nation police and penal capabilities with the host-nation judicial system to maintain credibility and legitimacy for the government. Transitional planning should occur as soon as possible with key interagency policing experts to facilitate long-term development of police institutions. (ATP 3-39.10) (USAMPS)

<table>

ART 7.3.2.4 SUPPORT JUDICIAL REFORM

7-44. The reform of judicial bodies is integral to rule of law and provides the necessary framework for security reform. The support provided to judicial institutions parallels efforts with police and security forces to enhance the state’s capability in the security sector. In a failed state, military forces may initially perform these functions and can be a critical enabler of success over time. (FM 3-07) (USAPKSOI)

ART 7.3.2.5 SUPPORT PROPERTY AND DISPUTE RESOLUTION PROCESSES

7-45. One of the most vital services provided by the judiciary branch is the resolution of property disputes. In a fragile state, long-standing disputes over ownership and control of property are common. Authorities must implement dispute resolution mechanisms. This prevents the escalation of violence that can occur in the absence of law and order as people seek resolution on their own terms. Typically, the military’s role in resolving disputes is limited to transitional military authority where these mechanisms are implemented in the absence of a functioning host-nation government. (FM 3-07) (USAPKSOI)

ART 7.3.3 RESTORE ESSENTIAL SERVICES

7-49. Army forces establish or restore the most basic services and protect them until a civil authority or the host nation can provide them. Normally, Army forces support other government, intergovernmental, and
host-nation agencies. When the host-nation or other agency cannot perform its role, Army forces may provide the basics directly. (ADRP 3-07) (USAPKSOI)

ART 7.3.3.1 PROVIDE ESSENTIAL CIVIL SERVICES

7-50. Army forces provide essential services, assets, or specialized resources to help civil authorities deal with situations beyond their capabilities. Activities of military forces to provide essential civil services are often defined in terms of the immediate humanitarian needs of the people: providing the food, water, shelter, and medical support necessary to sustain the population until local civil services are restored. (FM 3-07) (USAPKSOI)

### ART 7.3.3.4 Conduct Populace and Resource Control

7-53. Units provide security for a populace, deny personnel and materials to the enemy, mobilize population and material resources, and detect and reduce the effectiveness of enemy agents. Populace controls also include implementing martial law during a complete breakdown of law and order; maintaining curfews; restricting movement, travel permits, and registration cards; and resettling villagers. Resource control measures include licenses, regulations or guidelines, checkpoints (for example, roadblocks), reaction controls, amnesty programs, and inspections of facilities. Two subdivisions of populace and resource control operations are dislocated civilian operations and evacuation of host-nation noncombatants. (ATP 3-39.30) (USAMPS)

ART 7.3.3.7 CONDUCT MEDICAL STABILITY OPERATIONS

7-56. Civil-military medicine is a discipline within operational medicine comprising public health and medical issues that involve a civil-military interface (foreign or domestic), including military medical support to civil authorities (domestic), medical elements of security cooperation activities, and medical civil military operations. (JP 4-02) (JS)

ART 7.3.3.8 SUPPORT PUBLIC HEALTH PROGRAMS

7-57. The military contribution to the public health sector, especially early in an operation, enables the complementary efforts of local and international aid organizations. The initial efforts of military forces aim to stabilize the public health sector. These efforts may include assessments of the medical and public health systems such as infrastructure, medical staff, training and education, medical logistics, and public health programs. Following these initial response tasks, civilian organizations tailor their efforts to reforming the
three public health sectors through health systems strengthening and other public health capacity-building activities. (FM 3-07) (USAPKSOI)

<tr>
<td>12</td>
<td>Yes/No</td>
<td>Unit assisted in coordinating United States government, host-nation, and private resources to support public health programs.</td>
</tr>
</tbody>
</table>

**ART 7.3.4 SUPPORT GOVERNANCE**

7-58. Stability operations establish conditions that enable actions by civilian and host-nation actions to succeed. By establishing security and control, stability operations provide a foundation for transitioning authority to other government or intergovernmental agencies and eventually to the host nation. Once this transition is complete, commanders focus on transferring control to a legitimate civil authority according to the desired end state. (ADRP 3-07) (USAPKSOI)

**ART 7.3.4.1 SUPPORT TRANSITIONAL ADMINISTRATION**

7-59. When the host-nation government has collapsed or been deposed, initial response efforts focus on immediately filling the void in governance. In either situation, the reliability and trustworthiness of local officials is suspect; due care and prudence is necessary to avoid empowering officials whose interests and loyalties are inconsistent with those of the force. (FM 3-07) (USAPKSOI)

**ART 7.3.4.2 SUPPORT DEVELOPMENT OF LOCAL GOVERNANCE**

7-60. Establishing effective governance at the local level is necessary before developing governance institutions and processes throughout the state. Initially, effective local governance depends almost entirely on the ability to provide essential civil services to the people; restoring these services is also fundamental to humanitarian relief efforts. (FM 3-07) (USAPKSOI)

ART 7.3.4.3 SUPPORT ELECTIONS

7-61. Military forces may be required to provide security assistance to the host-nation civil authorities or international election commission agencies to prevent the disruption of elections. The primary role of military forces in support of elections is to facilitate civil order by providing a secure environment and should not be perceived as influencing the election outcome. United States (U.S.) forces should not be perceived as influencing elections by endorsing political platforms, parties, or candidates. Ideally, host-nation government and institutions will have the lead in developing and implementing elections with U.S. military in a supporting role. This support may include assisting the electoral commission in the planning and coordination of the election execution process and augmenting the host-nation security forces, as directed. Overt U.S. forces involvement in elections may be perceived as detrimental to an open, democratic, and legitimate election and taint the outcome. Planning and execution must be consistent with U.S. law, military guidance, and host-nation government regulations. The integrity of the election is the responsibility of the host-nation government or international election commission. (FM 3-07) (USAPKSOI)

*Note:* Army forces performing ancillary tasks—such as security patrols, observation posts, and medical support—contribute to the performance of this task. (FM 3-07) (USAPKSOI)
Chapter 7

NO. | Scale | Measure
---|---|---
05 | Yes/No | Unit monitored intelligence and civil information reports for potential security issues and other contingencies.
06 | Yes/No | Unit assessed security force capabilities and vulnerabilities to accomplish mission requirements.
07 | Yes/No | Unit conducted area and route security assessment.
08 | Yes/No | Unit augmented host-nation security forces in providing area security and reconnaissance in pre-elections, during elections, or post-elections, as required.
09 | Yes/No | Unit helped develop shaping security plans prior to election.
10 | Yes/No | Unit helped develop decisive security plans during conduct of election.
11 | Yes/No | Unit helped develop contingency security plans for various election outcome scenarios.

**ART 7.3.5 SUPPORT ECONOMIC AND INFRASTRUCTURE DEVELOPMENT**

7-62. Support to economic and infrastructure development helps a host nation develop capability and capacity in these areas. It may involve direct and indirect military assistance to local, regional, and national entities, economies, and economic capacity building systems. Infrastructure development complements and reinforces efforts to stabilize the economy. It focuses on the society’s physical aspects that enable the state’s economic viability. These physical aspects of infrastructure include transportation (roads, bridges, railways, airports, and ports and waterways), telecommunications, energy (natural resources, the electrical power sector, and energy production and distribution), and general (engineering and construction, and municipal services) infrastructure. (ADRP 3-07) (USAPKSOI)

NO. | Scale | Measure
---|---|---
01 | Yes/No | Unit developed partnerships with local organizations to meet community needs, assist with the development of local economic capacity building systems (education and training, health care, money and banking, rule of law, and economic governance), and increase local capacity to develop and maintain transportation, telecommunications, energy, and information critical infrastructure.
02 | Time | To assist host-nation people develop local and regional transportation plans.
03 | Time | To assist host-nation people develop local and regional telecommunication plans.
04 | Time | To assist host-nation people develop local and regional energy plans.
05 | Time | To assist host-nation people construct facilities that restored and promoted overall host-nation governance, commerce, and social well-being.

**ART 7.3.5.1 SUPPORT ECONOMIC DEVELOPMENT AND STABILIZATION**

7-63. Economic recovery begins with an actively engaged labor force. When a military force occupies an operational area, the demand for local goods, services, and labor creates employment opportunities for the local populace. Local projects, such as restoring public services, rebuilding schools, or clearing roads, offer additional opportunities for the local labor pool. Drawing on local goods, services, and labor presents the force with the first opportunity to infuse cash into the local economy, which in turn stimulates market activity. (FM 3-07) (USAPKSOI)

NO. | Scale | Measure
---|---|---
01 | Yes/No | Unit assessed civilian unemployment in the area of operations to determine the suitability of implementing economic development initiatives.
02 | Yes/No | Unit implemented sustainable and coordinated initiatives to provide immediate employment.
03 | Yes/No | Unit worked with local people and businesses to create employment opportunities for local people.
04 | Yes/No | Unit assessed the labor force for critical skills requirements and deficiencies.

ART 7.3.5.2 SUPPORT PRIVATE SECTOR DEVELOPMENT

7-64. Developing the private sector typically begins with employing large portions of the labor force. In addition to acquiring goods and services from the local economy, the tasks that support private sector development infuse much-needed cash into local markets and initiate additional public investment and development. (FM 3-07) (USAPKSOI)

ART 7.3.5.3 PROTECT NATURAL RESOURCES AND ENVIRONMENT

7-65. Protecting a nation’s natural resources is an extension of the requirement to secure and protect other institutions of the state. Additionally, it preserves the long-term economic development and investment capacity of a fragile state. This capacity includes the revenues generated by the storage, distribution, and trade in natural resources. Rival factions often target these resources to finance illegitimate interests. ART 7.3.5.4 SUPPORT GENERAL INFRASTRUCTURE RECONSTRUCTION PROGRAMS

7-66. General infrastructure reconstruction programs focus on rehabilitating the state’s ability to produce and distribute fossil fuels, generate electrical power, exercise engineering and construction support, and provide municipal and other services to the populace. As with the restoration of essential services, support to general infrastructure programs requires a thorough understanding of the civil component of the area of operations. (ATP 3-07.5) (USAPKSOI)

ART 7.3.5.5 SUPPORT HOST-NATION TELECOMMUNICATIONS INFRASTRUCTURE RECONSTRUCTION PROGRAM

7-67. This ART focuses on providing initial assessment of the operational readiness and capabilities of the host nation’s official public communications systems (and when or if necessary private telecommunications systems). The systems enable a government to communicate with its populace. This ART includes mass media systems including radio station equipment and antennae systems, television stations and antenna systems, data network equipment and servers that connect to the wider Internet, and wired or wireless telephone central systems and antennae. This requires thoroughly understanding the technical operation of commercial off-the-shelf equipment and systems used in providing mass communications systems. (FM 3-07) (USAPKSOI)

SECTION IV – ART 7.4: CONDUCT DEFENSE SUPPORT OF CIVIL AUTHORITIES

7-68. Defense support of civil authorities is support provided by United States Federal military forces, Department of Defense civilians, Department of Defense contract personnel, Department of Defense component assets, and National Guard forces (when the Secretary of Defense, in coordination with the governors of the affected states, elects and requests to use those forces in Title 32, United States Code, status) in response to requests for assistance from civil authorities for domestic emergencies, law enforcement support, and other domestic activities, or from qualifying entities for special events (DODD 3025.18). Defense support of civil authorities is a task that takes place only in the homeland, although some of its tasks are similar to stability tasks. Defense support of civil authorities is always conducted in support of another primary or lead federal agency. (ADP 3-28) (USACAC)

ART 7.4.1 PROVIDE SUPPORT FOR DOMESTIC CIVIL LAW ENFORCEMENT AGENCIES

7-69. Support to domestic civil law enforcement involves activities related to the Department of Justice’s counterterrorism activities, counterdrug activities, military assistance during civil disturbances, and general support. Army support involves providing resources, training, or augmentation. Federal military forces remain under the military chain of command while supporting civil law enforcement. The supported law enforcement agency coordinates Army forces activities per appropriate civil laws and interagency agreements. Army National Guard units in state status can be a particularly useful military resource. They may be able to provide assistance to civil authorities when federal units cannot due to the Posse Comitatus Act. Title 10, United States Code, prohibits the military from directly participating in arrests, searches, seizures, or other similar activities unless authorized by law. (ADRP 3-28) (USACAC)

Note: Support to civil law enforcement includes border protection enforcement, combating terrorism, critical infra Army missions related to supporting civil law enforcement in counterdrug operations are discussed under ART 7.6.1.5 (Provide Military Support to Counterdrug Efforts). structure protection as well as Department of Defense support to counterdrug operations.
ART 7.4.2 PROVIDE SUPPORT FOR DOMESTIC CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR INCIDENTS

7-70. Chemical, biological, radiological, and nuclear weapons and explosive ordnance disposal support provided in defense support of civil authorities are tasks addressed elsewhere in the ADRP 1-03. (ADRP 3-28) (USACAC)

Note:

- ART 6.8.5 (Provide Technical Chemical, Biological, Radiological, and Nuclear Expertise) discusses the coordination of essential services and activities required to manage and mitigate damage due to the use of chemical, biological, radiological, and nuclear threats and hazards.
- ART 6.11.1.2 (Coordinate Domestic Explosive Ordnance Disposal Support) addresses assistance to include providing explosive ordnance disposal service when requested by local, state, or federal authorities in the interest of public safety.
- ART 6.11.1.3 (Coordinate Interagency Support) addresses training for personnel, federal agencies, and public officials involved with civil emergency preparedness, law enforcement, and fire protection as requested.

ART 7.4.3 PROVIDE SUPPORT FOR DOMESTIC DISASTERS

7-71. Military response to natural and manmade disasters occurs at four levels: at the direction of the governor for state National Guard forces; after a declaration by the President, which the governor of the affected state requests; the direction of Secretaries of the Army, Marine Corps, Navy, or Air Force for capabilities not assigned to combatant commanders (such as bases and installations); and through immediate response authority, according to conditions allowing military support in urgent situations. (ADRP 3-28) (USACAC)

ART 7.4.4 PROVIDE OTHER DESIGNATED SUPPORT

7-72. Community assistance is a broad range of activities that provides support and maintains a strong connection between the military and civilian communities. Community assistance activities provide effective means of projecting a positive military image, provide training opportunities, and enhance the relationship between Army forces and the American public. They should fulfill community needs that would not otherwise be met. Community assistance activities can enhance individual and unit combat readiness. Army assistance to the community can include air ambulance support, search and rescue activities, firefighting capability, explosive ordnance disposal, emergency or broad-based medical care, wildlife and domestic animal management, assistance in safety and traffic control, emergency snow removal, temporary supplemental housing for the displaced or disadvantaged, and postal augmentation. (ADRP 3-28) (USACAC)

ART 7.4.5 CONDUCT CIVIL SUPPORT OPERATIONS

7-73. National Guard civil support, together with defense support of civil authorities, comprises support provided by the components of the Army to civil authorities within the United States and its territories. National Guard civil support consists of support for domestic disasters; support for domestic civilian law enforcement; support for domestic chemical, biological, radiological, or nuclear incidents; or other designated domestic support provided by the National Guard of the states to civil authorities while in state active duty status or Title 32 status when authorized in statute or approved by the Secretary of Defense. (ADRP 3-28) (USACAC)

### SECTION V – ART 7.5: CONDUCT TACTICAL MISSION TASKS

**ART 7.5**
Conduct Tactical Mission Tasks

- **ART 7.5.1** Attack by Fire an Enemy Force or Position
- **ART 7.5.11** Destroy a Designated Enemy Force or Position
- **ART 7.5.21** Conduct a Cordon and Search
- **ART 7.5.28** Turn an Enemy Force
- **ART 7.5.29** Conduct Soldier Surveillance and Reconnaissance
- **ART 7.5.30** Conduct Surveillance
- **ART 7.5.31** Conduct Intelligence Operations
  - **ART 7.5.31.1** Conduct Counterintelligence
  - **ART 7.5.31.2** Conduct Human Intelligence
  - **ART 7.5.31.3** Conduct Measurement and Signature Intelligence
  - **ART 7.5.31.4** Conduct Signals Intelligence
  - **ART 7.5.31.5** Conduct Technical Intelligence
- **ART 7.5.32** Conduct Weapons Technical Intelligence Activities
- **ART 7.5.2** Block an Enemy Force
- **ART 7.5.12** Disengage from a Designated Enemy Force
- **ART 7.5.21.1** Conduct Tactical Site Exploitation
- **ART 7.5.21.2** Conduct Site Exploitation at a Sensitive Site
- **ART 7.5.21.3** Conduct Technical Exploitation
- **ART 7.5.21.4** Employ Forensic Tools
- **ART 7.5.3** Breach Enemy Defensive Positions
- **ART 7.5.13** Disrupt a Designated Enemy Force’s Formation, Tempo, or Timetable
- **ART 7.5.21.5** Conduct Technical Exploitation
- **ART 7.5.33** Conduct Technical Exploitation
- **ART 7.5.4** Bypass Enemy Obstacles, Forces, or Positions
- **ART 7.5.14** Conduct an Exfiltration
- **ART 7.5.22** Reduce an Encircled or Bypassed Enemy Force
- **ART 7.5.34** Reduce an Encircled or Bypassed Enemy Force
- **ART 7.5.5** Canalize Enemy Movement
- **ART 7.5.15** Fix an Enemy Force
- **ART 7.5.23** Retain a Terrain Feature
- **ART 7.5.35** Retain a Terrain Feature
- **ART 7.5.6** Clear Enemy Forces
- **ART 7.5.16** Follow and Assume the Missions of a Friendly Force
- **ART 7.5.24** Secure a Unit, Facility, or Location
- **ART 7.5.36** Secure a Unit, Facility, or Location
- **ART 7.5.7** Conduct Counterreconnaissance
- **ART 7.5.17** Follow and Support the Actions of a Friendly Force
- **ART 7.5.25** Seize an Area
- **ART 7.5.37** Seize an Area
- **ART 7.5.8** Contain an Enemy Force
- **ART 7.5.18** Interdict an Area or Route to Prevent, Disrupt, or Delay Its Use by an Enemy Force
- **ART 7.5.26** Support by Fire the Maneuver of Another Friendly Force
- **ART 7.5.38** Support by Fire the Maneuver of Another Friendly Force
- **ART 7.5.9** Control an Area
- **ART 7.5.19** Isolate an Enemy Force
- **ART 7.5.27** Suppress a Force or Weapon System
- **ART 7.5.39** Suppress a Force or Weapon System
- **ART 7.5.10** Defeat an Enemy Force
- **ART 7.5.20** Neutralize an Enemy Force
7-74. A tactical mission task is the specific activity performed by a unit while executing a form of tactical operation or form of maneuver. Tactical mission tasks describe lethal and nonlethal results or effects the commander wants to generate or create to accomplish the mission (they are the what or why of a mission statement). The tasks in this section are often given to units as the tasks or purpose of their mission statement. The most critical measure for all tactical mission tasks is if the mission is accomplished. (FM 3-90-1) (USACAC)

ART 7.5.1 ATTACK BY FIRE AN ENEMY FORCE OR POSITION

7-75. Attack by fire uses direct fires, supported by indirect fires, to engage an enemy without closing to destroy, suppress, fix, or deceive the enemy. (FM 3-90-1) (USACAC)

ART 7.5.2 BLOCK AN ENEMY FORCE

7-76. Block denies the enemy access to an area or prevents an advance in a direction or along an avenue of approach. Block is also an obstacle effect that integrates fire planning and obstacle efforts to stop an attacker along a specific avenue of approach or prevent the attacking force from passing through an engagement area. (FM 3-90-1) (USACAC)

ART 7.5.3 BREACH ENEMY DEFENSIVE POSITIONS

7-77. Breach is a tactical mission task in which the unit employs all available means to break through or establish a passage through an enemy defense, obstacle, minefield, or fortification. A breach is a synchronized combined arms operation under the control of the maneuver commander. (FM 3-90-1) (USACAC)

ART 7.5.4 BYPASS ENEMY OBSTACLES, FORCES, OR POSITIONS

7-78. Bypass is a tactical mission task in which the commander directs the unit to maneuver around an obstacle, position, or enemy force to maintain the momentum of the operation, while deliberately avoiding combat with the enemy force. (FM 3-90-1) (USACAC)

ART 7.5.5 CANALIZE ENEMY MOVEMENT

7-79. Canalize is when the commander restricts enemy movement to a narrow area by exploiting terrain coupled with the use of obstacles, fires, or friendly maneuver. (FM 3-90-1) (USACAC)

ART 7.5.6 CLEAR ENEMY FORCES

7-80. Clear requires the commander to remove all enemy forces and eliminate organized resistance within an assigned area. Physical conditions of the area affect the specific tactics, techniques, and procedures employed. (FM 3-90-1) (USACAC)

ART 7.5.7 CONDUCT COUNTERRECONNAISSANCE

7-81. Counterreconnaissance encompasses all measures taken by a commander to counter enemy surveillance and reconnaissance efforts. Counterreconnaissance is not a distinct mission but a component of all forms of security operations. See ART 6.6.3 (Conduct Security Operations). (FM 3-90-1) (USACAC)

ART 7.5.8 CONTAIN AN ENEMY FORCE

7-82. Contain requires the commander to stop, hold, or surround enemy forces or to cause them to center their activity on a given front and prevent them from withdrawing any part of their forces for use elsewhere. (FM 3-90-1) (USACAC)
ART 7.5.9 CONTROL AN AREA

7-83. Control requires the commander to maintain physical influence over a specified area to prevent its use by an enemy or to create conditions necessary for successful friendly operations. (FM 3-90-1) (USACAC)

ART 7.5.10 DEFEAT AN ENEMY FORCE

7-84. Defeat occurs when an enemy force has temporarily or permanently lost the physical means or will to fight. The defeated force’s commander is unwilling or unable to pursue an adopted course of action, thereby yielding to the friendly commander’s will and no longer interfering to a significant degree with the actions of friendly forces. Defeat can result from the use of force or the threat of its use. (FM 3-90-1) (USACAC)

ART 7.5.11 DESTROY A DESIGNATED ENEMY FORCE OR POSITION

7-85. Destroy involves the physical rendering of an enemy force to combat ineffectiveness until it is reconstituted. Alternatively, to destroy a combat system is to damage it so badly that it cannot perform its function or be restored to a usable condition without being entirely rebuilt. (FM 3-90-1) (USACAC)

ART 7.5.12 DISENGAGE FROM A DESIGNATED ENEMY FORCE

7-86. Disengagement occurs when a commander has the unit break contact with the enemy to allow the conduct of another mission or to avoid decisive engagement. (FM 3-90-1) (USACAC)

ART 7.5.13 DISRUPT A DESIGNATED ENEMY FORCE’S FORMATION, TEMPO, OR TIMETABLE

7-87. Disrupt is when a commander integrates direct and indirect fires, terrain, and obstacles to upset an enemy formation or tempo, interrupt the timetable, or cause forces to commit prematurely or attack in a piecemeal fashion. (FM 3-90-1) (USACAC)

ART 7.5.14 CONDUCT AN EXFILTRATION

7-88. Exfiltrate is where a commander removes personnel or units from areas under enemy control by stealth, military deception, surprise, or clandestine means. (FM 3-90-1) (USACAC)

ART 7.5.15 FIX AN ENEMY FORCE

7-89. Fix is where a commander prevents the enemy from moving any part of the force from a specific location for a specific time. (FM 3-90-1) (USACAC)

ART 7.5.16 FOLLOW AND ASSUME THE MISSIONS OF A FRIENDLY FORCE

7-90. Follow and assume is when a second committed force follows a force conducting an offensive operation and is prepared to continue the mission of that force when it becomes fixed, attritted, or otherwise unable to continue. (FM 3-90-1) (USACAC)
ART 7.5.17 FOLLOW AND SUPPORT THE ACTIONS OF A FRIENDLY FORCE

7-91. Follow and support is when a committed force follows and supports the mission accomplishment of a leading force conducting an offensive operation. (FM 3-90-1) (USACAC)

ART 7.5.18 INTERDICT AN AREA OR ROUTE TO PREVENT, DISRUPT, OR DELAY ITS USE BY AN ENEMY FORCE

7-92. Interdict is where the commander prevents, disrupts, or delays enemy use of an area or route. (FM 3-90-1) (USACAC)

ART 7.5.19 ISOLATE AN ENEMY FORCE

7-93. Isolate requires a unit to seal off—physically and psychologically—an enemy force from its sources of support, deny it freedom of movement, and prevent the isolated enemy force from having contact with other enemy forces. (FM 3-90-1) (USACAC)

ART 7.5.20 NEUTRALIZE AN ENEMY FORCE

7-94. Neutralize results in rendering enemy personnel or materiel incapable of interfering with friendly operations. (FM 3-90-1) (USACAC)

ART 7.5.21 CONDUCT A CORDON AND SEARCH

7-95. Cordon and search is a technique of conducting a movement to contact that involves isolating a target area and searching suspected locations within that target area to capture or destroy possible enemy forces and contraband. (FM 3-90-1) (USACAC)

ART 7.5.21.1 CONDUCT TACTICAL SITE EXPLOITATION

7-96. Tactical site exploitation describes the actions taken to ensure that information, materiel, and personnel are discovered at a point of occurrence or event, gathered, and analyzed so the unit and its higher headquarters can use the resulting facts, information, or intelligence to answer information requirements, protect the force, and produce an advantage within the operational variables (a comprehensive set of information categories used to define an operational environment) to support tactical, operational, and strategic objectives. (ATP 3-90.15) (USACAC)

ART 7.0: Tactical Mission Tasks and Military Operations

**ART 7.5.21.2 CONDUCT SITE EXPLOITATION AT A SENSITIVE SITE**

7-97. Units detect, collect, process, and analyze information, materials, and people during the conduct of operations at a sensitive site. A sensitive site is a geographically limited area that contains, but is not limited to, biometric residue (or remains), adversary information systems, evidence of war crimes, critical government facilities, and areas suspected of containing high-value targets. (JP 3-31) (JS)

**ART 7.5.21.3 CONDUCT TECHNICAL EXPLOITATION**

7-98. Technical exploitation is characterized by the detailed examination and testing of information and materiel by technical and scientific enablers using forensically sound procedures. Technical exploitation may occur on site if time, equipment, and trained personnel are available and conditions permit. Units perform activities such as technical processing, scientific testing, analysis, interpretation, document translation, conversion of electronic data into standardized formats, and decryption of encoded material. (ATP 3-90.15) (USACAC)

**ART 7.5.21.4 EMPLOY FORENSIC TOOLS**

7-99. When conducting site exploitation, units employ forensic tools while searching for, collecting, and analyzing information, materiel, and people discovered at a site. Forensic science (often shortened to forensics) is the application of multidisciplinary scientific processes to establish facts. The integration and employment of forensic tools must be trained and practiced throughout planning, preparation, execution, and assessment of operations in accordance with established standards, doctrine, and policy. (ATP 3-90.15) (USACAC)

ART 7.5.22 REDUCE AN ENCIRCLED OR BYPASSED ENEMY FORCE

7-100. ART 7.5.22 involves the destruction of an encircled or bypassed enemy force. (FM 3-90-1) (USACAC)

ART 7.5.23 RETAIN A TERRAIN FEATURE

7-101. ART 7.5.23 is when the commander ensures a terrain feature already controlled by a friendly force remains free of enemy occupation or use. (FM 3-90-1) (USACAC)

ART 7.5.24 SECURE A UNIT, FACILITY, OR LOCATION

7-102. ART 7.5.24 involves preventing a unit, facility, or geographical location from being damaged or destroyed as a result of enemy action. (FM 3-90-1) (USACAC)

ART 7.5.25 SEIZE AN AREA

7-103. This ART involves taking possession of a designated area using overwhelming force. (FM 3-90-1) (USACAC)

ART 7.5.26 SUPPORT BY FIRE THE MANEUVER OF ANOTHER FRIENDLY FORCE

7-104. This ART is when a maneuver force moves to a position where it can engage the enemy by direct fire to support another maneuvering force. (FM 3-90-1) (USACAC)

ART 7.5.27 SUPPRESS A FORCE OR WEAPON SYSTEM

7-105. This ART results in the temporary degradation of the performance of a force or weapon systems below the level needed to accomplish its mission. (FM 3-90-1) (USACAC)

ART 7.5.28 TURN AN ENEMY FORCE

7-106. ART 7.5.28 involves forcing an enemy force to move from one avenue of approach or mobility corridor to another. (FM 3-90-1) (USACAC)

ART 7.5.29 CONDUCT SOLDIER SURVEILLANCE AND RECONNAISSANCE

7-107. Every Soldier, as a part of a small unit, is a potential information collector and an essential component to answer commander’s critical information requirements and facilitate the commander’s situational understanding. Each Soldier develops a special level of awareness simply due to exposure to events occurring in the area of operations (AO) and has the opportunity to collect information by observation and interaction with the population. These observations and interactions provide depth and context to information collected through surveillance and reconnaissance. Collecting and reporting this
information within an AO is a critical element to achieving situational understanding of the AO. Leaders must create a climate that allows all Soldiers to feel free to report what they see and learn on a mission. (FM 2-91.6) (USAICOE)

Note: This task is supported by ART 2.3.4.1.1 (Establish a Mission Intelligence Briefing Plan) and direct support ART 2.3.4.1.2 (Establish a Debriefing Plan).

ART 7.5.30 CONDUCT SURVEILLANCE

7-108. Surveillance involves observing an area to collect information. Surveillance tasks can be performed by a variety of assets (ground, air, sea, and space), means (Soldier and systems), and mediums (throughout the electromagnetic spectrum). (FM 3-55) (USACAC)

ART 7.5.31 CONDUCT INTELLIGENCE OPERATIONS

7-109. Intelligence operations are the tasks undertaken by military intelligence units and Soldiers to obtain information to satisfy validated requirements (ADRP 2-0). Intelligence operations collect information about the activities and resources of the threat or information concerning the characteristics of an operational environment. At the tactical level, intelligence operations, reconnaissance, security operations, and surveillance are the four primary tasks conducted as part of information collection. The intelligence disciplines of counterintelligence, human intelligence, measurement and signature intelligence, signals intelligence, and technical intelligence routinely conduct tasks associated with intelligence operations. Intelligence operations are conducted by military intelligence collection assets. (FM 2-0) (USAICOE)
ART 7.5.31.1 CONDUCT COUNTERINTELLIGENCE

7-110. Counterintelligence (CI) at the tactical level is primarily focused on CI support to protection. CI assets at the tactical level are instrumental in protecting bases from infiltration, collection, and targeting by foreign intelligence and security services and international terrorist organizations. (See FM 2-22.2.) The decision at what level to employ a CI team is situation-dependent. The risk to the CI assets must be balanced with the need to collect against priority intelligence requirements and to protect the force as a whole. Rules of engagement, status-of-forces agreements, directions from higher headquarters, and the overall threat level may also restrict the deployment and use of CI teams. (FM 2-0) (USAICOE)

ART 7.5.31.2 CONDUCT HUMAN INTELLIGENCE

7-111. Human intelligence is the collection by a trained human intelligence collector of foreign information from people and multimedia to identify elements, intentions, composition, strength, dispositions, tactics, equipment, and capabilities (FM 2-22.3). Human intelligence (HUMINT) uses human sources as a tool and a variety of collection methods, both passive and active, to gather information to satisfy the commander’s intelligence requirements and cue other information collection assets. Successful HUMINT collection requires detailed planning and extensive research of the population within the area of operations. The requirements for HUMINT collection must be detailed enough to allow identification of sources that can provide the needed information. HUMINT collectors must have specific training certifications to conduct certain methods of HUMINT collection. Commanders should manage training certifications requirements and plan ahead to ensure they have sufficient certified personnel to conduct HUMINT collection. (FM 2-0) (USAICOE) (See also DHE-M 3301.002.)

ART 7.5.31.3 CONDUCT MEASUREMENT AND SIGNATURE INTELLIGENCE

7-112. Remote sensors are used to perform such tasks as perimeter defense, surveillance, environmental monitoring (including radiological, nuclear, and early warning), and target acquisition. Remote sensors are not a military intelligence collection asset; however, they do provide information used to cue military intelligence collection assets to activity and should be considered when preparing the information collection plan. Soldiers or robotic vehicles place remote sensors either inside or outside buildings and structures. Units can employ remote sensors in almost any tactical situation. However, these sensors work best in areas that restrict major movement to a few key lines of communications and have easily discriminating traffic patterns of military and civilian activities. Remote sensor missions are ideally suited to support relatively stable situations, such as long-term defensive or security operations, in which the time and resources are available to develop an extensive sensor network throughout the area of operations. Remote sensors have limited utility in fast-moving mobile missions, raids, and other limited-duration operations unless adequate time and means are provided to emplace sensors before executing the operation. In addition, the employment of sensors in open terrain or heavily congested urban concentrations requires detailed planning to ensure the sensor network can provide the desired information in those environments. (FM 2-0) (USAICOE)

ART 7.5.31.4 CONDUCT SIGNALS INTELLIGENCE

7-113. Two major missions performed by signals intelligence (known as SIGINT) are signals intercept and direction finding. Signals intercept includes those actions used to search for, intercept, and identify threat electromagnetic signals for the purpose of immediate threat recognition. Direction finding is a procedure for obtaining lines of bearing of threat emitters for the purpose of determining their location. During collection, the Prophet platoon forms an extended, integrated baseline that supports both intercepting and locating threat emitters across the width and depth of the supported unit’s front. A baseline consists of two or more Prophet teams deployed in a roughly linear formation. When operating in a multistation baseline, collection assets work together to locate and, if directed, track a threat emitter’s movement. (FM 2-0) (USAICOE)
ART 7.5.31.5 CONDUCT TECHNICAL INTELLIGENCE

7-114. Technical intelligence (TECHINT) provides rapid reporting on newly identified foreign weapons systems, vehicles, equipment, munitions, modifications, and capabilities to combatant commands, joint task forces, and national intelligence centers. TECHINT supports operational and planning requirements across the range of military operations. Support to targeting is a key function of TECHINT. TECHINT analyzes previously inaccessible and unknown systems to collect rapid intelligence for use by Soldiers and collects physical aspects for long-term assessment at national exploitation centers. (ATP 2-22.4) (USAICOE)

ART 7.5.32 CONDUCT WEAPONS TECHNICAL INTELLIGENCE ACTIVITIES

7-115. Units conduct weapons technical intelligence (WTI) activities, to include the collection, exploitation, and analysis of material associated with improvised explosive devices (IEDs), improvised weapons, associated components, and other weapons systems. WTI material may be collected in support of force protection, targeting, material sourcing, or prosecution. WTI capabilities support tactical operations in an effort to provide limited on-site analysis of collected material, identification of personnel, or facilitate follow-on operations. (ATP 2-22.4) (USAICOE)

ART 7.6.1 CONDUCT MILITARY ENGAGEMENTS

7-117. Military engagement encourages regional stability. Engagement activities are key peacetime military preventative actions that enhance bonds between potential multinational partners, increase understanding of the region, help ensure access when required, strengthen future multinational operations, and prevent crises from developing. Military engagement in peacetime comprises all military activities that involve other nations and are intended to shape the security environment in peacetime. It includes programs and exercises that the United States military conducts with other nations to shape the international environment, improve mutual understanding, and improve interoperability with treaty partners or potential coalition partners. (ADRP 3-07) (USAPKSOI)

ART 7.6.1.1 PARTICIPATE IN MULTINATIONAL TRAINING EVENTS AND EXERCISES

7-118. Army forces support the Chairman of the Joint Chiefs of Staff exercise program that is the Chairman of the Joint Chiefs of Staff’s principal vehicle for performing joint and multinational training. The program provides combatant commanders with their primary means to train staffs and forces in joint and
multinational operations, to evaluate war plans, and to execute their engagement strategies. (ADRP 3-07) (USAPKSOI)

ART 7.6.1.2 CONDUCT SECURITY ASSISTANCE

7-119. Security assistance refers to a group of programs that support United States national policies and objectives by providing defense articles, military training, and other defense-related services to host nations by grant, loan, credit, or cash sales. Army forces support security assistance efforts through military training teams, maintenance support personnel and training, and related activities, such as humanitarian mine removal operations. (FM 3-22) (USACAC)

ART 7.6.1.3 CONDUCT SECURITY FORCE ASSISTANCE

7-120. Security force assistance is activities that contribute to unified action by the United States government to support the development of the capacity and capability of foreign security forces (FSF) and their supporting institutions. (FM 3-22) (USACAC)

Note: ART 7.6.1.3 (Conduct Security Force Assistance) is not one of the five primary Army stability tasks. ART 7.6.1.3 tasks may be conducted as part of the primary Army stability tasks of Establish Civil Security and Establish Civil Control. ART 7.6.1.3 tasks may be conducted as part of decisive action in operations focused on stability, offensive operations, defensive operations, or other military activities across the range of military operations.

ART 7.6.1.3.2 Train Foreign Security Forces

7-122. United States (U.S.) forces assist foreign security forces (FSF) by developing programs and institutions to train and educate FSF. Train refers to all activities taken to create, improve, and integrate training, leader development, and education at the individual, leader, collective, and staff levels. This may include the development and execution of programs of instruction, training events, and leader development activities. (FM 3-22) (USACAC)

### ART 7.0: Tactical Mission Tasks and Military Operations

#### ART 7.6.1.3.3 Equip Foreign Security Forces

7-123. The equipping of foreign security forces (FSF) is accomplished through several mechanisms. Equip refers to all activities to create, improve, and integrate materiel and equipment, procurement, fielding, accountability, and maintenance through life cycle management. This may include new equipment fielding, operational readiness processes, repair, and recapitalization. (FM 3-22) (USACAC)

### ART 7.6.1.3.4 Rebuild Foreign Security Forces

7-124. United States (U.S.) forces assist the host nation to assess, rebuild, and build the existing capabilities and capacities of foreign security forces. Rebuild and build refers to all activities to create, improve, and integrate facilities. This may include physical infrastructures such as bases and stations, lines of communications, ranges and training complexes, and administrative structures. (FM 3-22) (USACAC)
No. | Scale | Measure
--- | --- | ---
01 | Yes/No | Unit modified anticipated and prepared capacity building in accordance with current host-nation infrastructure.
02 | Yes/No | Unit coordinated host-nation infrastructure requirements with country teams.
03 | Yes/No | Unit coordinated host-nation infrastructure requirements with host nation.
04 | Yes/No | Staff assessed constraints and limitations in host-nation resources.
05 | Yes/No | Staff assessed constraints and limitations in host-nation funding.
06 | Yes/No | Unit considered potential training facilities and areas (such as ranges, urban terrain, and training sites).
07 | Yes/No | Unit developed a prioritized list of assessment criteria.
08 | Yes/No | Assessment team possessed at least one member trained to antiterrorism force protection level II.
09 | Yes/No | Unit prioritized host-nation infrastructure requirements for U.S. support efforts.
10 | Yes/No | Unit conducted a vulnerability assessment on foreign security forces facilities.
11 | Yes/No | Foreign security forces had a long-term basing plan.

**ART 7.6.1.3.5 Advise Foreign Security Forces**

7-125. United States forces advise foreign security forces (FSF) to improve their capability and capacity. Advise refers to all activities to provide subject matter expertise, mentorship, guidance, advice, and counsel to FSF while carrying out the missions assigned to the unit or organization. Advising occurs under combat or administrative conditions, at tactical through strategic levels, and in support of individuals or groups. (FM 3-22) (USACAC)

No. | Scale | Measure
--- | --- | ---
01 | Yes/No | Unit had a security force assistance integrated program.
02 | Yes/No | Unit determined the method of advising FSF.
03 | Yes/No | Unit identified relevant training—such as language, regional, and cultural—required for advisors.
04 | Yes/No | Unit developed sustainment and contingency plans in support of an advisory team.
05 | Yes/No | Unit assessed constraints and limitations in host-nation funding.
06 | Yes/No | Unit assessed the host-nation program of internal defense.
07 | Yes/No | Unit assessed host-nation doctrine.
08 | Yes/No | Unit assessed host-nation organization.
09 | Yes/No | Unit assessed host-nation instructors’ capabilities.
10 | Yes/No | Unit considered language differences that may impact FSF capabilities.
11 | Yes/No | Unit considered cultural differences that may impact FSF capabilities.
12 | Yes/No | Unit assessed internal and external threats to the host nation.
13 | Yes/No | Unit had the personnel and tools to determine effectiveness for FSF before, during, and after training.

**ART 7.6.1.3.6 Assess Foreign Security Forces**

7-126. Assess refers to all activities for determining progress toward accomplishing a task, creating an effect, or achieving an objective using measures of effectiveness and measures of performance to evaluate foreign security force capability. Once an objective is achieved, the focus should shift to sustaining it. (FM 3-22) (USACAC)

No. | Scale | Measure
--- | --- | ---
01 | Yes/No | Unit developed a plan on how to assess capabilities of foreign security forces (FSF).
02 | Yes/No | Unit assessed nontechnical skills (such as culture, language, and situational understanding) necessary for trainers and advisors to succeed in selected host nation.
ART 7.6.1.4 CONDUCT ARMS CONTROL OPERATIONS

7-127. Army forces normally conduct arms control operations to support arms control treaties and enforcement agencies. Army forces can help locate, seize, and destroy weapons of mass destruction after hostilities. Other actions include escorting deliveries of weapons and materials (such as enriched uranium) to preclude loss or unauthorized use, inspecting and monitoring production and storage facilities, and training foreign forces to secure weapons and facilities. Army forces may conduct arms control operations to prevent escalation of a conflict and reduce instability. This could include the mandated disarming of belligerents as part of a peace operation. (JP 3-0) (JS)

ART 7.6.1.5 PROVIDE MILITARY SUPPORT TO COUNTERDRUG EFFORTS

7-128. The Army participates in counterdrug operations under provisions of the national drug control strategy. Army forces may be employed in various operations to support other government agencies responsible for detecting, disrupting, interdicting, and destroying illicit drugs and the infrastructure (personnel, materiel, and distribution systems) of illicit drug-trafficking entities. When conducted inside the United States and its territories, they are defense support of civil authorities operations. When conducted outside the United States and its territories, counterdrug operations are considered stability operations. Army forces do not engage in direct action in counterdrug operations. Units that support counterdrug operations comply with United States and foreign legal limitations concerning the acquisition of information from civilians and the conduct of law enforcement activities. (ADRP 3-28) (USACAC)

ART 7.6.1.5.1 Support Detection and Monitoring of Drug Shipments

7-129. Units provide aerial and ground reconnaissance to support counterdrug operations by law enforcement agencies. The goal is to provide early notification to—and, as necessary, prolonged tracking of—aerial and surface targets for appropriate law enforcement agencies. This support enables law enforcement agencies to intercept, search, and arrest traffickers, and seize illegal drugs and illegally obtained property. Aerial reconnaissance may be conducted with fixed- or rotary-wing aircraft, unmanned aircraft systems, or ground-based radars. Land reconnaissance may be executed by observation posts, patrols, ground surveillance radars, and remote ground sensors. (ADRP 3-28) (USACAC)
ART 7.6.1.5.2 Provide Command, Control, Communications, Computers, and Intelligence Support to Counterdrug Efforts

7-130. Army personnel and equipment may assist law enforcement agencies and host nations in designing, implementing, and integrating command, control, communications, computers, and intelligence systems. Army personnel support national and departmental drug operations and law enforcement agency analytical centers. In addition, Army forces provide liaison to law enforcement agencies and host nations to facilitate smooth and successful integration of military support. Army units and personnel provide intelligence support targeted at the full range of narcotics traffickers’ operations. The principal means of providing this support is through tactical analysis teams. These teams co-locate with the United States country team, support law enforcement agencies, and provide focused detection and monitoring of narcotics trafficking activities. (ADRP 3-28) (USACAC)

ART 7.6.1.5.3 Provide Planning Support to Counterdrug Efforts

7-131. Army personnel support counterdrug planning of both law enforcement agencies and host nations. Understanding the supported agency or host nation, including its culture and people, is critical. Planning support provided to law enforcement agencies accounts for the organization’s mission, current goals, structure or chain of command, measures of success, and relationships with other government agencies or countries. Planning support provided to host nations is similar to that provided to domestic law enforcement agencies. However, the host-nation culture, historical perspectives, political climate, and economic conditions are also considered. (ADRP 3-28) (USACAC)

ART 7.6.1.5.4 Provide Logistic Support to Counterdrug Efforts

7-132. Army forces can assist law enforcement agencies or host nations during their conduct of counterdrug operations with logistic management and execution. This includes transportation, maintenance, engineer design and construction, use of facilities, equipment loans, or military working dog support. Army forces can provide supplies and field services directly, if authorized, or assist other agencies in procuring and managing them from other sources. Commanders who assist law enforcement with transportation of evidence, seized property, or contraband ensure a law enforcement officer accompanies the shipment to maintain continuity of the chain of custody. (ADRP 3-28) (USACAC)

ART 7.6.1.5.5 Provide Training Support to Counterdrug Efforts

7-133. Training support to law enforcement agencies and host nations includes basic military skills, such as basic marksmanship, patrolling, mission planning, medical, and survival skills. Commanders provide support using a mix of mobile training teams; participation in operational planning groups, joint or combined exercises, institutional training, noninstitutional training, and training simulations; and extended training service specialists. (ADRP 3-28) (USACAC)

ART 7.6.1.5.6 Provide Manpower Support to Counterdrug Efforts

7-134. Army forces may provide various individuals or units to support interagency and host-nation counterdrug efforts. Categories of manpower support are eradication, administrative—including judge advocate officers, legal specialists, and accounting specialists—linguist, liaison officer, inspection, military police, and intelligence analyst. (ADRP 3-28) (USACAC)

ART 7.6.1.5.7 Provide Research, Development, and Acquisition Support to Counterdrug Efforts

7-135. The Army Counterdrug Research, Development, and Acquisition Office makes military research, development, and acquisition efforts available to law enforcement agencies. The office informs the agencies of new technical capabilities that have possible law enforcement application. It can also assist them in contracting and procuring technical equipment. (ADRP 3-28) (USACAC)
ART 7.6.2 CONDUCT LIMITED INTERVENTIONS

7-136. A limited intervention is an action of defined and limited scope, often in response to a crisis. Limited interventions are executed to achieve a clearly defined end state, limited in scope. Corresponding limitations are imposed on the supporting operations and size of the forces involved. These operations may be phased but are not intended to become campaigns. Although limited interventions are confined in terms of end state and forces, their execution may be lengthy. Joint task forces usually conduct these limited interventions. (JP 3-0) (JS)

ART 7.6.2.1 PERFORM NONCOMBATANT EVACUATION OPERATIONS

7-137. Noncombatant evacuation operations relocate threatened civilian noncombatants from locations in a host nation to secure areas. Normally, these operations involve United States citizens whose lives are in danger, either from the threat of hostilities or from a natural disaster. They may also include host-nation citizens and third-country nationals. Army forces, normally as part of a joint task force, conduct noncombatant evacuation operations to assist and support the Department of State. Noncombatant evacuation operations usually involve swift insertions of a force, temporary occupation of an objective, and a planned withdrawal upon accomplishment of the mission. This operation can occur in three environments: permissive, uncertain, or hostile. The environment in which a noncombatant evacuation operation occurs can quickly change from one to another with little warning. The commander prepares to operate in all three environments. This task includes sustainment functions involving emergency medical treatment, transportation, administrative processing, and coordination with the Department of State and other agencies involved in the evacuation. Task organization for noncombatant evacuation operations is based on an operational environment in which the action is performed. However, since the environment can change rapidly, the permissive form of noncombatant evacuation operations can become uncertain or hostile. (JP 3-68) (JS)

ART 7.6.2.2 CONDUCT A STRIKE

7-138. Strikes are attacks conducted to damage or destroy an objective or capability or to compel a hostile government or force to defer from taking hostile actions. Strikes are usually planned and executed as part of or in support of a joint operation. (JP 3-0) (JS)

ART 7.6.2.3 CONDUCT A RAID

7-139. A raid is an attack, usually small scale, involving a swift entry into hostile territory to secure information, confuse the enemy, or destroy installations. It usually ends with a planned withdrawal from the objective area upon mission accomplishment. Raids have narrowly defined purposes. They require both detailed intelligence and deliberate planning. Raids may destroy key enemy installations and facilities, capture or free prisoners, or disrupt enemy command and control or other important systems. (FM 3-90-1) (USACAC)

ART 7.6.2.4 CONDUCT A SHOW OF FORCE

7-140. Shows of force are flexible deterrence options designed to demonstrate United States (U.S.) resolve. They involve increasing the visibility of United States forces to defuse a situation that, if allowed to continue, may be detrimental to national interests or objectives. The United States conducts shows of force for three reasons: to bolster or reassure allies, deter potential aggressors, and gain or increase influence. Shows of force demonstrate a credible and specific threat to an aggressor or potential aggressor. They involve increasing the visibility of United States forces in the eyes of the target audience by establishing an area presence and performing exercises and demonstrations. Presence patrols executed by small tactical units are one technique of conducting shows of force. Although actual combat is not desired, shows of force can rapidly and unexpectedly escalate. Therefore, units assigned a show of force mission assume that combat is probable and prepare accordingly. All actions ordinarily associated with the projection of a force to conduct combat operations pertain to show of force deployments. (JP 3-0) (JS)
ART 7.6.2.5 CONDUCT FOREIGN HUMANITARIAN ASSISTANCE

7-141. Foreign humanitarian assistance operations occur outside the United States and its territories. Army forces usually conduct them to relieve or reduce the results of natural or man-made disasters before, during, or after the event. They also relieve conditions—such as pain, disease, hunger, or privation—that present a serious threat to life or loss of property. Army forces supplement or complement efforts of host-nation civil authorities or other agencies that provide assistance. Army forces participate in foreign humanitarian assistance operations that may be unilateral, multinational, or United Nations-coordinated responses. Foreign humanitarian assistance is limited in scope and duration. It focuses exclusively on prompt aid to resolve an immediate crisis. Long-term activities designed to support full recovery and a return to predisaster conditions normally will become part of a combatant commander’s theater engagement plan. In such cases, a foreign humanitarian assistance operation transitions to a stability operation. (ADRP 3-07) (USACAC)

ART 7.6.2.6 ENFORCE SANCTIONS AND EXCLUSION ZONES

7-142. Enforcement of sanctions includes a broad range of possible missions. Commanders must understand that actions to enforce sanctions, while endorsed by the United Nations Security Council, have traditionally been considered acts of war and should posture their forces accordingly. (JP 3-07.3) (JS)

ART 7.6.3 CONDUCT PEACE OPERATIONS

7-143. Peace operations is a broad term that encompasses multiagency and multinational crisis response and limited contingency operations involving all instruments of national power with military missions to contain conflict, redress the peace, and shape the environment to support reconciliation and rebuilding and facilitate the transition to legitimate governance (JP 3-07.3). Peace operations include peacekeeping, peace enforcement, peacemaking, peace building, and conflict prevention efforts. (ATP 3-07.31) (USACAC)

ART 7.0: Tactical Mission Tasks and Military Operations

No. | Scale | Measure
---|---|---
04 | Yes/No | Unit controlled weapons and borders.
05 | Yes/No | Unit regulated movement of persons and goods across borders.
06 | Yes/No | Unit secured key sites.
07 | Yes/No | Unit established visible control measures and made them known to the local population.
08 | Yes/No | Unit established public security and freedom of movement.
09 | Yes/No | Unit established protected areas and secure bases.

ART 7.6.3.1 CONDUCT PEACEKEEPING OPERATIONS

7-144. Peacekeeping operations are military operations undertaken with the consent of all major parties to a dispute. They are designed to monitor and facilitate implementation of agreements (cease fire, truce, or other such agreements) and support diplomatic efforts to reach a long-term political settlement. Peacekeeping operations usually involve observing, monitoring, or supervising and assisting parties to a dispute. To achieve their objectives, Army forces conducting peacekeeping operations rely on the legitimacy acknowledged by all major belligerents and international or regional organizations. They use or threaten the use of force only in self-defense or as a last resort. (ATP 3-07.31) (USACAC)

No. | Scale | Measure
---|---|---
01 | Yes/No | Unit supervised disengagement of belligerent forces.
02 | Yes/No | Unit monitored exchange of prisoners of war.
03 | Yes/No | Unit developed confidence-building measures between host-nation belligerents.
04 | Yes/No | Unit investigated alleged breaches of agreements.
05 | Yes/No | Unit supported and sustained confidence-building measures among belligerents.
06 | Yes/No | Unit identified United Nations mandate and security council resolution requirements.
07 | Yes/No | Unit coordinated with nongovernmental organizations as required.
08 | Yes/No | Unit identified responsibility to protect requirements.
09 | Yes/No | Unit developed building partner capacity measures for the host nation.
10 | Yes/No | Unit identified effectiveness of rule of law, to include anticorruption efforts, population trust, and confidence for rule of law elements.
11 | Time | To transfer monitor requirements to host-nation security institutions.

ART 7.6.3.1.1 Conduct Observation

7-145. Observation missions are performed primarily by unarmed military observers but may also be performed by peacekeeping forces. In either case, observer force helps ensure that parties to the dispute follow the agreements. (ATP 3-07.31) (USACAC)

No. | Scale | Measure
---|---|---
01 | Yes/No | Unit established observation posts, mounted and dismounted patrols, and aerial reconnaissance.
02 | Yes/No | Unit observed, monitored, verified, and reported any alleged violation of the governing agreements.
03 | Yes/No | Unit confirmed or supervised a cease fire.
04 | Yes/No | Unit investigated alleged cease-fire violations, boundary incidents, and complaints. The observer force investigated alleged infractions to gain evidence regarding agreement violations.
05 | Yes/No | Unit conducted regular liaison visits in the area of operations.
ART 7.6.3.1.2 Supervise Cease Fires, Withdrawals, and Disengagements

7-146. Lightly armed forces normally perform supervision and assistance missions. The force undertaking these tasks requires large service support organizations, equipment, and finances. In addition to those tasks being performed by military observers in observation missions, peacekeeping forces may perform other tasks when they are within the scope of the military mission, such as supervising cease fires. (ATP 3-07.31) (USACAC)

ART 7.6.3.2 CONDUCT PEACE BUILDING OPERATIONS

7-147. Peace building operations are post-conflict actions, predominantly diplomatic and economic, that strengthen and rebuild governmental infrastructure and institutions to avoid a relapse into conflict. (ATP 3-07.31) (USACAC)

Note: The tasks in ART 7.3 (Conduct Stability Tasks) describe the tasks that pertain to peace building.

ART 7.6.3.3 CONDUCT PEACEMAKING OPERATIONS

7-148. Peacemaking is the process of diplomacy, mediation, negotiation, or other forms of peaceful settlements that arranges an end to a dispute and resolves issues that led to it. (ATP 3-07.31) (USACAC)

Note: Selective tasks in ART 7.6.1 (Conduct Military Operations) can support peacemaking operations.

ART 7.6.3.4 CONDUCT PEACE ENFORCEMENT OPERATIONS

7-149. Peace enforcement is application of military force, or the threat of its use, normally pursuant to international authorization, to compel compliance with resolutions or sanctions designed to maintain or restore peace and order (JP 3-07.3). Unlike peacekeeping operations, peace enforcement operations do not require the consent of all parties. Peace enforcement operations maintain or restore peace and support
diplomatic efforts to reach a long-term political settlement. Army forces assigned a peace enforcement mission must be able to apply sufficient combat power for self-defense and to perform tasks forcibly. Units must also be prepared to transition to peacekeeping operations. Peace enforcement operations normally include one or more of six subordinate operations: forcible separation of belligerents, establishment and supervision of protected areas, sanction and exclusion zone enforcement, movement denial and guarantee, restoration and maintenance of order, and protection of humanitarian assistance. (ATP 3-07.31) (USACAC)

**ART 7.6.3.5 CONDUCT CONFLICT PREVENTION OPERATIONS**

7-150. Conflict prevention consists of actions taken before a predictable crisis to prevent or limit violence, deter parties, and reach an agreement before armed hostilities begin. Conflict prevention often involves diplomatic initiatives. It also includes efforts designed to reform a country’s security sector and make it more accountable to civilian control. Conflict prevention may require deploying forces to contain a dispute or prevent it from escalating into hostilities. (ATP 3-07.31) (USACAC)

**ART 7.6.4 CONDUCT IRREGULAR WARFARE**

7-151. *Irregular warfare* is a violent struggle among state and non-state actors for legitimacy and influence over the relevant population(s) (JP 1). United States Army forces operations grouped under irregular warfare are foreign internal defense, support for insurgencies, counterinsurgency, combating terrorism, and unconventional warfare. (JP 3-26) (JS)
ART 7.6.4.1 CONDUCT FOREIGN INTERNAL DEFENSE OPERATIONS

7-152. Foreign internal defense is participation by civilian and military agencies of a government in any of the action programs taken by another government or other designated organization to free and protect its society from subversion, lawlessness, and insurgency. Foreign internal defense missions are applicable to a wide variety of operational environments. United States policy currently deals with threats through the indirect use of military force in concert with the diplomatic, informational, military, and economic instruments of national power. Direct use of military force is the exception rather than the rule. This approach relies on supporting efforts of the government of the nation in which the problem is developing. (ATP 3-05.2) (USAJFKSWCS)

ART 7.6.4.1.1 Provide Indirect Support to Foreign Internal Defense

7-153. Indirect support builds strong national infrastructures through economic and military capabilities that contribute to self-sufficiency. This can include unit exchange programs, personel exchange programs, individual exchange programs, and combination programs. (ATP 3-05.2) (USAJFKSWCS)

ART 7.6.4.1.3 Conduct Combat Operations in Support to Foreign Internal Defense

7-155. The President approves combat operations. Combat operations are a temporary solution until host-nation forces can stabilize the situation and provide security for the populace. Emphasis should be placed on host-nation forces in the forefront during these operations to maintain host-nation legitimacy with the population. Combat operations can include counterinsurgency operations. (ATP 3-05.2) (USAJFKSWCS)

ART 7.6.4.2 CONDUCT COUNTERINSURGENCY OPERATIONS

7-156. **Counterinsurgency** is comprehensive civilian and military efforts designed to simultaneously defeat and contain insurgency and address its root causes (JP 3-24). In counterinsurgency, host-nation forces and their partners operate to defeat armed resistance, reduce passive opposition, and establish or reestablish the legitimacy of the host-nation government. Counterinsurgency is the predominant joint operation in Operations Iraqi Freedom and Enduring Freedom. (FM 3-24) (USACAC)

ART 7.6.4.3 COMBAT TERRORISM

7-157. **Terrorism** is the calculated use of unlawful violence or threat of unlawful violence to inculcate fear. It is intended to coerce or intimidate governments or societies in pursuit of goals that are generally political, religious, or ideological. Enemies who cannot compete with Army forces conventionally often turn to terrorist tactics. Terrorist attacks often create a disproportionate effect on even the most capable conventional forces. Tactics used by terrorists range from arson to the use of weapons of mass destruction. Army forces routinely conduct operations to deter or defeat these attacks. Offensively-oriented operations are categorized as counterterrorism while defensively-oriented operations are categorized as antiterrorism. (JP 3-07.2) (JS)

**Note:** This task branch only addresses counterterrorism operations. ART 6.5 (Apply Antiterrorism Measures) addresses antiterrorism measures.

ART 7.6.4.4 CONDUCT COUNTERTERRORISM OPERATIONS

7-158. **Counterterrorism** is activities and operations taken to neutralize terrorists and their organizations and networks in order to render them incapable of using violence to instill fear and coerce governments or societies to achieve their goals (JP 3-26). By law, the counterterrorism mission is assigned to designated special operations forces that are organized and trained to combat terrorism. Those forces conduct counterterrorism outside the territory of the United States. Relevant national security decision directives, national security directives, contingency plans, and other relevant classified documents address sensitive and compartmentalized counterterrorism programs. Commanders who employ conventional forces against organized terrorist forces operating in their area of operations are conducting conventional offensive operations, not counterterrorism operations. (ATP 3-37.2) (USAMSCOE)

ART 7.6.4.5 CONDUCT UNCONVENTIONAL WARFARE

7-159. Unconventional warfare is a broad spectrum of military and paramilitary operations, normally of long duration, predominantly conducted through, with, or by host-nation or surrogate forces that are organized, trained, equipped, supported, and directed in varying degrees by an external source. It includes, but is not limited to, guerrilla warfare, subversion, sabotage, intelligence activities, and unconventional assisted recovery. Unconventional warfare is operations conducted by, with, or through irregular forces in support of a resistance movement, insurgency, or conventional military operations. (ATP 3-05.1) (USAJFKSWCS)

Appendix A

Task Development

ARMY TACTICAL TASK

A-1. Proponents and users must understand the parts of an Army tactical task (ART). The Army Universal Task List (AUTL) identifies “what” units or Soldiers perform in terms common to the Army staff and Army organizations responsible to the Chief of Staff of the Army. The AUTL does not address a particular materiel, weapon, or information system to be used. The ART description does not address “how” or “why” a task is performed (found in Army doctrine or other governing criteria), or “who” performs the task (found in the commander’s concept of operations and Army doctrine). The AUTL provides potential measures of performance (but not the standards) to assist command, planners, and trainers in defining mission capability requirements.

A-2. An ART is a single task and only includes the “what” of the task. Use of multiple verbs denotes multiple tasks, thereby making it difficult to assess task performance in terms of readiness reporting. Using words, such as “by,” “through,” or “during,” usually leads to describing the “how” of the task. “How” a unit performs a task differs from “what” task the unit performs. “How” a unit performs a task resides in doctrine, the concept of operations, and standard operating procedures. Only Army tasks are included in the AUTL. ARTs describe, in broad terms, the current capabilities of the Army. Army tasks are actions or processes accomplished by an Army organization under an Army command using Army doctrine. Commanders of Army forces assign ARTs for Army forces and staffs to perform.

A-3. ARTs provide the means to execute Army capabilities required by authoritative national-level guidance, directives, policy, and doctrine. An ART references doctrine contained in Army doctrine or an approved Army concept (such as described through the Army Operations Concept). Army doctrine or approved Army concepts identify “how” a unit performs an ART. This doctrine also defines enough of the activity to help units develop a task description. Proponents may also reference joint doctrine, multi-Service doctrine, and doctrine developed by the Air Land Sea Application (known as ALSA) Center for tactical war tasks.

WRITING

A-4. Writing an ART involves identifying the authoritative components of the ART (task number, task title, and task description) as well as identifying the nonauthoritative components of the ART (task reference and proponent, task note, and task measures). Proponents ensure tasks in the AUTL and training development capability (known as TDC) use a common language.

IDENTIFYING THE ART NUMBER

A-5. The art number aligns with the most applicable warfighting function. Some tasks draw heavily from across the warfighting functions, such as tactical mission tasks. Proponents place these ARTs under the main heading ART 7.0, otherwise placement of the ART is based on applicable doctrine.

WRITING THE TASK TITLE

A-6. The ART title provides a standard way of identifying that collective activity for all Army units and for the purposes of training, operating, and reporting combat development. Proponents base ART titles on discussions in the primary doctrinal reference and—
Use one action verb and one object (with doctrinally based exceptions such as search and rescue).

Do not list a qualifier at the end of the task title.

Avoid answering “with what” in the task title.

A-7. An example of a good task title would be “Conduct Terminal Operations.” Another example of a good task title would be “Conduct Suppression of Enemy Air Defenses.” Each example fits the criteria discussed in paragraph A-6.

A-8. Examples of bad task titles would be “Plan and Conduct Defense and Security of the Company Area and Material Using Unit Equipment.” This example has two verbs (plan and conduct). It also answers “with what” (Using Unit Equipment). Another example of a poor title is “Conduct Initial Contingency Mission Analysis.” This example is poorly written because it contains multiple qualifiers to the basic task of “Conduct Mission Analysis.”

**WRITING THE TASK DESCRIPTION**

A-9. A task description clearly and concisely defines the ART. Proponents draw heavily from the primary doctrinal reference. ARTs describe the “what” of the task, focusing the task description on activities involved in performing the task. They avoid discussions on how units do the activity, why it is important, how it is distinct from other activities, or for what it is used. Those discussions belong in the reference. Proponents limit the task description to one paragraph. Shorter is better. A description is long enough to clearly articulate what the task is for commanders and staffs, doctrine developers, training developers, and combat developers.

A-10. When writing task descriptions, proponents—

- Use active voice (see DA Pam 25-40).
- Write the full form of an acronym the first time in text. Spell out the term and follow it with the abbreviation in parentheses. Once proponents have defined the acronym in this way, they can use it alone throughout the rest of the ART.
- Provide the doctrinal reference and proponent for the proposed ART.

**IDENTIFYING THE REFERENCE AND PROONENT**

A-11. Each ART requires a doctrinal reference and a proponent at the end of the task description. The reference identifies the primary doctrinal publication that discusses the collective task. ARTs reference only current, authenticated doctrine or an approved Army concept (such as described through the Army operations concepts). Immediately after the reference, an ART identifies a center of excellence or school as the proponent for the task. See AR 5-22 to identify the proponent center of excellence or school. Usually, the proponent of the reference is the proponent of the task.

**WRITING THE MEASURES**

A-12. Proponents provide suggested measures of performance (MOPs) and measures of effectiveness (MOEs) that are relevant, collectible, and distinct for each ART. JP 3-0 defines a measure of performance as a criterion used to assess friendly actions that is tied to measuring task accomplishment. A measure of effectiveness is a criterion used to assess changes in system behavior, capability, or operational environment that is tied to measuring the attainment of an end state, achievement of an objective, or creation of an effect (JP 3-0).

A-13. Relevance is the most important consideration whether the measure provides an indication of task completion (MOPs) or purpose accomplishment (MOEs). A good basis must also exist for the theory that this MOP is expected to change if the unit completes the task. Authors brainstorm as many potential MOEs and MOPs as possible for the ART, then select the most relevant.
A-14. A measure is collectible if the data associated with it can be reasonably obtained. For example, a unit probably cannot collect the measure “number of enemy air defense systems adversely affected by electronic warfare.” But it probably can collect the measure “number of enemy air defense attacks reported.”

A-15. Proponents write distinct measures. Redundant measures provide only limited value for detailing the description of the task. For example, if the task lists “number of enemy mortar attacks,” “number of enemy artillery attacks,” and “number of enemy rocket attacks” as measures, then “number of indirect fire attacks” is redundant.

A-16. Proponents list the MOEs first. There is usually one MOE and it should measure accomplishment of the fundamental doctrinal purpose for the task. That is, “Did the task get accomplished?” The MOE should be the most important measure. Only if the unit fails to achieve an adequate MOE does the MOP become an issue. Proponents limit the number of MOPs to those that clearly bear directly on task accomplishment.

TASK DUPLICATION

A-17. Proponents avoid duplicating ARTs. A task should not duplicate the “what” described in another ART. Proponents reject new ART submissions that merely specify a particular type of task or a particular entity performing the task.

TRAINING DEVELOPMENT CAPABILITY

A-18. Periodically, the proponent aligns ART titles with relevant training and evaluation outlines in the training development capability. The Combined Arms Center (USACAC) Training Management Directorate at Fort Leavenworth, Kansas maintains the AUTL database and ensures accurate common doctrinal language. ARTs provide the task title and description; training and evaluation outlines (known as TOEs) provide the detailed information—the conditions and standards—units need to train on that ART.

A-19. Proponents apply the following principles when aligning ART with training and evaluation outline task titles:

- ARTs use identical wording in the task titles of conceptually identical tasks. ARTs do not force identical task titles when the ART and the training and evaluation outline deal with conceptually distinct tasks.
- ARTs do not distinguish for echelon and unit type while training and evaluation outlines do. When echelon and unit type are the only difference, multiple training and evaluation outlines may align with a single ART. For example, ART “Conduct a Raid” aligns with the training and evaluation outline “Conduct an Artillery Raid.”
- ARTs use different verbs to imply different tasks. For example, “coordinate” and “conduct” are different tasks. Coordinate means to bring into a common action, movement, or condition. Whereas conduct means to direct or take part in the operations or management of operations. Warfighting function chapter heading ARTs (ARTs 1.0, 2.0, 3.0, 4.0, 5.0, 6.0, and 7.0) are not used to link supporting collective task training and evaluation outlines. ARTs detail organizational and staff activities as opposed to entire operations, which are complicated and not adequately covered by a single collective task training and evaluation outline. Training deficiencies are also difficult to determine due to task complexity.
This page intentionally left blank.
Appendix B
Task Submission Guidance

SUBMISSION

B-1. Army forces operate in an operational environment of continually evolving threats, technology, doctrine, and resources. As a result, the Army continuously re-assesses and updates the Army Universal Task List (AUTL) as appropriate. The timely updating of the AUTL informs the Digital Training Management System (known as DTMS), Combined Arms Training Strategy (known as CATS) Army Training Network, and Army tasks in the Joint Electronic Library plus (known as JEL+). To ensure that the AUTL remains relevant to the warfighter and provides utility to the user, proponents ensure these updates draw heavily from the unique perspective and insights from experienced users in the field.

B-2. When a proponent develops an Army tactical task (ART), it creates a new ART, modifies an existing ART, or deletes an obsolete or superseded ART. Once a proponent completes development, it submits the draft ART to the Combined Arms Doctrine Directorate (CADD) and to the Training Management Directorate (TMD) using the “Task Note” selection in the training development capability (TDC). The AUTL submission process (figure B-1) shows the review steps for each submission.

Figure B-1. AUTL submission process

B-3. A submitting organization submits tasks to add to, modify in, or delete from the AUTL. It can be the proponent of other tasks. Each submitting organization has two points of contact responsible for task submission in the TDC. Tasks may also be submitted directly to the CADD AUTL coordinator to review submissions. The submitting organization submits the names of primary and alternate points of contact to CADD and TMD.

B-4. The proponent reviews the existing ARTs and new submissions. The proponent determines if a submission is a new task, a modification to an existing task, or the deletion of an existing task. For a new
task submission, the respective proponent identifies the Army publication and other appropriate references to provide a doctrinal explanation of “how” a unit completes a task using approved Army doctrine terminology. This similar process applies to modification and deleting tasks with little variation. When a proponent identifies an obsolete ART, it submits a deletion request to the TMD for approval before recommending the ART’s deletion.

B-5. The submitting organization completes a front-end analysis checklist before sending submission to the CADD and TMD. (Appendix C discusses the front-end analysis checklist.) When a submission is in TDC, the submitting organization notifies both CADD and TMD.

B-6. CADD and TMD independently review and then jointly approve the initial front-end analysis for new or modified ARTs. CADD employs an AUTL coordinator to review submissions. This individual ensures the proposed task meets basic submission requirements, conforming to the guidance outlined in this publication. (Appendix A discusses submission requirements.) The AUTL coordinator works with CADD, TMD, and the submitting organization to ensure doctrinal accuracy and correctness. Once completed, tasks are edited prior to an Armywide staffing. CADD and TMD independently review and jointly concur a proponent’s request to delete an ART.

STAFFING

B-7. Once the AUTL coordinator completes the review process, CADD staffs the proposed tasks or changes for an Armywide review and comments. After receiving comments from the Army, the proponent for the applicable ART and CADD’s AUTL coordinator adjudicate the comments. The outcome of the adjudication process is implemented and the tasks are approved and accepted. CADD posts the updates for the AUTL database with the approved, modified, or deleted tasks in the TDC.

ADMINISTRATIVE INSTRUCTIONS

B-8. The AUTL lists a single Army reference for each task after the task definition. It also gives the abbreviation for the proponent center of excellence or school for the task after the publication reference. Proponents—as defined by AR 5-22—are responsible for developing the training and evaluation outline that supports each ART.
Appendix C

Front-End Analysis

OVERALL

C-1. When using the Army Universal Task List (AUTL), the submitting organization completes a front-end analysis. The submitting organization answers questions concerning overall tasks, task titles and descriptions, notes and background, and measures. To the extent possible, questions elicit affirmative answers.

C-2. The submitting organization asks general, overall questions concerning each Army tactical task (ART). The submitting organization ideally answers all questions in the affirmative:

- Is the task universal? (An organization does not create an ART to validate a particular organization or mission.)
- Is this task different from all other tasks within the AUTL?
- If there is a similar task, does the submitting organization recommend a modification to an existing task or the deletion of an existing task?
- Is the task consistent with and compliant with existing Army doctrine language and terminology in ADRP 1-02?
- Does the task have an Army doctrinal reference?
- Is the task appropriately placed in the correct warfighting function?
- Does the use of acronyms and abbreviations comply with ADRP 1-02 and JP 1-02?
- Are Army reference publications current and authenticated on the Army Publishing Directorate Web site?

TITLE AND DESCRIPTION

C-3. The submitting organization asks the following questions concerning the ART title and its description. The submitting organization then ideally answers all questions in the affirmative:

- Does the ART title contain just one verb and one object?
- Is the task description approximately three to five sentences in length?
- Does the task title and its description just reference the what of the task and not the why or how?
- Does the task avoid words such as “by,” “through,” or “during?”
- Does the task avoid specifying means and resources used to accomplish the task?
- Does the task avoid specifying where the activity will take place?
- Is the task an organizational activity? (An ART should not be an operation or more than one action or activity.)
- Does the task avoid encompassing several tasks within the task title or description?

NOTES AND BACKGROUND

C-4. The submitting organization asks the following questions concerning any task notes and background information. The submitting organization ideally answers all questions in the affirmative:
Does the note and background information avoid referencing other tasks in the AUTL?

Does the note and background information mention that this task replaces another task? (Use only if applicable.)

If resources or means are included in the note and background, does it limit the task by stating this is the only way to accomplish the task or include verbiage such as “This task MAY include…” (similar and nonlimiting note)?

**MEASURES**

C-5. The submitting organization asks questions concerning the specific measures (the table) of each ART, such as—

- Are measures quantifiable or qualitative? How can the measures be fixed to make them more quantifiable (for example, changing the Scale: Yes/No to Percent)?
- Are there at least three measures?
- Does each measure contain only a single measurement?
- Does the task avoid using complex measurements or measure more than one output?
- Are measures written to reflect outputs or results of performance of the subject task (rather than entire operation)? Write a Yes/No measure as a statement answered as yes or no; end the measure with a period.
- Do Percent and Number measures start with the word Of?
- Do Time measures start with a precursor (for example, To, From, After, and so on)?
The glossary lists acronyms and terms with Army and joint definitions. Where Army and joint definitions differ, (Army) precedes the definition. The proponent manual for other terms is listed in parentheses after the definition.

**SECTION II – TERMS**

**ambush**

An attack by fire or other destructive means from concealed positions on a moving or temporarily halted enemy. (FM 3-90-1)
approach march
The advance of a combat unit when direct contact with the enemy is intended. (ADRP 3-90)

Army design methodology
A methodology for applying critical and creative thinking to understand, visualize, and describe unfamiliar problems and approaches to solving them. (ADP 5-0)

assessment
The determination of the progress toward accomplishing a task, creating a condition, or achieving an objective. (JP 3-0)

attack
An offensive task that destroys or defeats enemy forces, seizes and secures terrain, or both. (ADRP 3-90)

battle position
A defensive location oriented on a likely enemy avenue of approach. (ADRP 3-90)

breach
A tactical mission task in which the unit employs all available means to break through or establish a passage through an enemy defense, obstacle, minefield, or fortification. (FM 3-90-1)

bypass
A tactical mission task in which the commander directs the unit to maneuver around an obstacle, position, or enemy force to maintain the momentum of the operation, while deliberately avoiding combat with the enemy force. (FM 3-90-1)

cordon and search
A technique of conducting a movement to contact that involves isolating a target area and searching suspected locations within that target area to capture or destroy possible enemy forces and contraband. (FM 3-90-1)

counterinsurgency
Comprehensive civilian and military efforts designed to simultaneously defeat and contain insurgency and address its root causes. (JP 3-24)

counterterrorism
Activities and operations taken to neutralize terrorists and their organizations and networks in order to render them incapable of using violence to instill fear and coerce governments or societies to achieve their goals. (JP 3-26)

cover
A security task to protect the main body by fighting to gain time while also observing and reporting information and preventing enemy ground observation of and direct fire against the main body. (ADRP 3-90)

defense support of civil authorities
Support provided by United States Federal military forces, Department of Defense civilians, Department of Defense contract personnel, Department of Defense component assets, and National Guard forces (when the Secretary of Defense, in coordination with the governors of the affected states, elects and requests to use those forces in Title 32, United States Code, status) in response to requests for assistance from civil authorities for domestic emergencies, law enforcement support, and other domestic activities, or from qualifying entities for special events. (DODD 3025.18)

defensive task
A task conducted to defeat an enemy attack, gain time, economize forces, and develop conditions favorable for offensive or stability tasks. (ADRP 3-0)
distribution
The operational process of synchronizing all elements of the logistic system to deliver the “right things” to the “right place” at the “right time” to support the geographic combatant commander. (JP 4-0)

electronic attack
Division of electronic warfare involving the use of electromagnetic energy, directed energy, or antiradiation weapons to attack personnel, facilities, or equipment with the intent of degrading, neutralizing, or destroying enemy combat capability and is considered a form of fires. (JP 3-13.1)

electronic protection
Division of electronic warfare involving actions taken to protect personnel, facilities, and equipment from any effects of friendly or enemy use of the electromagnetic spectrum that degrade, neutralize, or destroy friendly combat capability. (JP 3-13.1)

electronic warfare
Military action involving the use of electromagnetic and directed energy to control the electromagnetic spectrum or to attack the enemy. (JP 3-13.1)

electronic warfare support
Division of electronic warfare involving actions tasked by, or under direct control of, an operational commander to search for, intercept, identify, and locate or localize sources of intentional and unintentional radiated electromagnetic energy for the purpose of immediate threat recognition, targeting, planning and conduct of future operations. (JP 3-13.1)

encirclement operations
Operations where one force loses its freedom of maneuver because an opposing force is able to isolate it by controlling all ground lines of communications and reinforcement. (ADRP 3-90)

envelopment
A form of maneuver in which an attacking force seeks to avoid the principal enemy defenses by seizing objectives behind those defenses that allow the targeted enemy force to be destroyed in their current positions. (FM 3-90-1)

execution
Putting a plan into action by applying combat power to accomplish the mission. (ADP 5-0)

exploitation
An offensive task that usually follows a successful attack and is designed to disorganize the enemy in depth. (ADRP 3-90)

fires warfighting function
The related tasks and systems that provide collective and coordinated use of Army indirect fires, air and missile defense, and joint fires through the targeting process. (ADRP 3-0)

flank attack
A form of offensive maneuver directed at the flank of an enemy. (FM 3-90-1)

forms of maneuver
Distinct tactical combinations of fire and movement with a unique set of doctrinal characteristics that differ primarily in the relationship between the maneuvering force and the enemy. (ADRP 3-90)

forward passage of lines
Occurs when a unit passes through another unit’s positions while moving toward the enemy. (ADRP 3-90)

frontal attack
A form of maneuver in which an attacking force seeks to destroy a weaker enemy force or fix a larger enemy force in place over a broad front. (FM 3-90-1)
gap-crossing operation
   A mobility operation consisting of river crossing, brigade-level crossing, and special gap-crossing operations conducted to project combat power across a linear obstacle (wet or dry gap). (ATTP 3-90.4)

general engineering
   Those engineering capabilities and activities, other than combat engineering, that modify, maintain, or protect the physical environment (JP 3-34)

graphic control measure
   A symbol used on maps and displays to regulate forces and warfighting functions. (ADRP 5-0)

guard
   A security task to protect the main body by fighting to gain time while also observing and reporting information and preventing enemy ground observation of and direct fire against the main body. Units conducting a guard mission cannot operate independently because they rely upon fires and functional and multifunctional support assets of the main body. (ADRP 3-90)

human intelligence
   (Army) The collection by a trained human intelligence collector of foreign information from people and multimedia to identify elements, intentions, composition, strength, dispositions, tactics, equipment, and capabilities. (FM 2-22.3)

infiltration
   A form of maneuver in which an attacking force conducts undetected movement through or into an area occupied by enemy forces to occupy a position of advantage behind those enemy positions while exposing only small elements to enemy defensive fires. (FM 3-90-1)

information collection
   An activity that synchronizes and integrates the planning and employment of sensors and assets as well as the processing, exploitation, and dissemination systems in direct support of current and future operations. (FM 3-55)

information management
   The science of using procedures and information systems to collect, process, store, display, disseminate, and protect data, information, and knowledge products. (ADRP 6-0)

intelligence operations
   (Army) The tasks undertaken by military intelligence units and Soldiers to obtain information to satisfy validated requirements. (ADRP 2-0)

intelligence warfighting function
   The related tasks and systems that facilitate understanding the enemy, terrain, and civil considerations. (ADRP 3-0)

irregular warfare
   A violent struggle among state and non-state actors for legitimacy and influence over the relevant population(s). (JP 1)

knowledge management
   The process of enabling knowledge flow to enhance shared understanding, learning, and decisionmaking. (ADRP 6-0)

LandWarNet
   The Army’s portion of the Department of Defense information networks. (FM 6-02)

linkup
   A meeting of friendly ground forces, which occurs in a variety of circumstances. (ADRP 3-90)
maneuver
The employment of forces in the operational area through movement in combination with fires to
achieve a position of advantage in respect to the enemy. (JP 3-0)

measure of effectiveness
A criterion used to assess changes in system behavior, capability, or operational environment that is
tied to measuring the attainment of an end state, achievement of an objective, or creation of an effect.
(JP 3-0)

measure of performance
A criterion used to assess friendly actions that is tied to measuring task accomplishment. (JP 3-0)

meeting engagement
A combat action that occurs when a moving force, incompletely deployed for battle, engages an enemy
at an unexpected time and place. (FM 3-90-1)

military deception
Actions executed to deliberately mislead adversary military, paramilitary, or violent extremist
organization decision makers, thereby causing the adversary to take specific actions (or inactions) that
will contribute to the accomplishment of the friendly mission. (JP 3-13.4)

mission command
The exercise of authority and direction by the commander using mission orders to enable disciplined
initiative within the commander’s intent to empower agile and adaptive leaders in the conduct of
unified land operations. (ADP 6-0)

mission command warfighting function
The related tasks and systems that develop and integrate those activities enabling a commander to
balance the art of command and the science of control in order to integrate the other warfighting
functions (ADRP 3-0)

movement and maneuver warfighting function
The related tasks and systems that move and employ forces to achieve a position of relative advantage
over the enemy and other threats. (ADRP 3-0)

movement to contact
(Army) An offensive task designed to develop the situation and establish or regain contact.
(ADRP 3-90)

observation post
A position from which military observations are made, or fire directed and adjusted, and which
possesses appropriate communications. While aerial observers and sensor systems are extremely useful,
those systems do not constitute aerial observation posts. (FM 3-90-2)

obstacle
Any natural or man-made obstruction designed or employed to disrupt, fix, turn, or block the
movement of an opposing force, and to impose additional losses in personnel, time, and equipment on
the opposing force. (JP 3-15)

offensive task
A task conducted to defeat and destroy enemy forces and seize terrain, resources, and population
centers. (ADRP 3-0)

operations process
The major mission command activities performed during operations: planning, preparing, executing,
and continuously assessing the operation. (ADP 5-0)

passage of lines
An operation in which a force moves forward or rearward through another force’s combat positions
with the intention of moving into or out of contact with the enemy. (JP 3-18)
peace enforcement
Application of military force, or the threat of its use, normally pursuant to international authorization, to compel compliance with resolutions or sanctions designed to maintain or restore peace and order. (JP 3-07.3)

peace operations
A broad term that encompasses multiagency and multinational crisis response and limited contingency operations involving all instruments of national power with military missions to contain conflict, redress the peace, and shape the environment to support reconciliation and rebuilding and facilitate the transition to legitimate governance. (JP 3-07.3)

penetration
A form of maneuver in which an attacking force seeks to rupture enemy defenses on a narrow front to disrupt the defensive system. (FM 3-90-1)

planning
The art and science of understanding a situation, envisioning a desired future, and laying out effective ways of bringing that future about. (ADP 5-0)

preparation
Those activities performed by units and Soldiers to improve their ability to execute an operation. (ADP 5-0)

protection warfighting function
The related tasks and systems that preserve the force so the commander can apply maximum combat power to accomplish the mission. (ADRP 3-0)

pursuit
An offensive task designed to catch or cut off a hostile force attempting to escape, with the aim of destroying it. (ADRP 3-90)

rearward passage of lines
Occurs when a unit passes through another unit’s positions while moving away from the enemy. (ADRP 3-90)

reconnaissance
A mission undertaken to obtain, by visual observation or other detection methods, information about the activities and resources of an enemy or adversary, or to secure data concerning the meteorological, hydrographic, or geographic characteristics of a particular area. (JP 2-0)

reconnaissance in force
A deliberate combat operation designed to discover or test the enemy’s strength, dispositions, and reactions or to obtain other information. (ADRP 3-90)

reconnaissance objective
A terrain feature, geographic area, enemy force, adversary, or other mission or operational variable, such as specific civil considerations, about which the commander wants to obtain additional information. (ADRP 3-90)

relief in place
An operation in which, by direction of higher authority, all or part of a unit is replaced in an area by the incoming unit and the responsibilities of the replaced elements for the mission and the assigned zone of operations are transferred to the incoming unit. (JP 3-07.3)

screen
A security task that primarily provides early warning to the protected force. (ADRP 3-90)

search and attack
A technique for conducting a movement to contact that shares many of the characteristics of an area security mission. (FM 3-90-1)
sensitive site
A geographically limited area that contains, but is not limited to, adversary information systems, war crimes sites, critical government facilities, and areas suspected of containing high value targets. (JP 3-31)

site exploitation
A series of activities to recognize, collect, process, preserve, and analyze information, personnel, and/or materiel found during the conduct of operations. (JP 3-31)

Soldier and leader engagement
Interpersonal interactions by Soldiers and leaders with audiences in an area of operations. (FM 3-13)

special reconnaissance
Reconnaissance and surveillance actions conducted as a special operation in hostile, denied, or diplomatically and/or politically sensitive environments to collect or verify information of strategic or operational significance, employing military capabilities not normally found in conventional forces. (JP 3-05)

spoiling attack
A tactical maneuver employed to seriously impair a hostile attack while the enemy is in the process of forming or assembling for an attack. (FM 3-90-1)

sustainment warfighting function
The related tasks and systems that provide support and services to ensure freedom of action, extend operational reach, and prolong endurance. (ADRP 3-0)

tactical mission task
The specific activity performed by a unit while executing a form of tactical operation or form of maneuver. It may be expressed in terms of either actions by a friendly force or effects on an enemy force. (FM 3-90-1)

tactical road march
A rapid movement used to relocate units within an area of operations to prepare for combat operations. (ADRP 3-90)

task-organizing
The act of designing an operating force, support staff, or sustainment package of specific size and composition to meet a unique task or mission. (ADRP 3-0)

terrain management
The process of allocating terrain by establishing areas of operation, designating assembly areas, and specifying locations for units and activities to deconflict activities that might interfere with each other. (ADRP 5-0)

turning movement
A form of maneuver in which the attacking force seeks to avoid the enemy’s principle defensive positions by seizing objectives behind the enemy’s current positions thereby causing the enemy force to move out of their current positions or divert major forces to meet the threat. (FM 3-90-1)
